INTRODUCTION

A GUIDE TO PRICING

Prices shown in the *Standard Catalog of Handguns* are designed as a *guide*, not as a quote, and the prices given reflect *retail* values. This is very important to remember. You will seldom realize full retail value if you trade in a gun or sell it to a dealer. In that situation, your gun will be valued at its *wholesale* price, which is generally substantially below retail value to allow for the seller's profit margin.

Prices for firearms can vary with the time of the year, the geographical location and the general economy. It is not practical to list prices in this book with regard to time of year or location. What is given is a reasonable price based on sales at gun shows, auction houses, and information obtained from knowledgeable collectors and dealers. In certain cases there will be no price indicated under a particular condition but rather the notation "N/A" or the symbol "–." This indicates that there is no known price available for that gun in that condition or the sales for that particular model are so few that a reliable price cannot be given. This will usually be encountered only with very rare guns, with newly introduced firearms, or more likely with antique firearms in those conditions most likely to be encountered. Most antique firearms will be seen in the good, fair and poor categories.

Standard Catalog of Handguns can be used as an identification guide and as a source of starting prices for a planned transaction. If you start by valuing a given gun according to the values shown in this book, you will not be too far off the mark.

In the final analysis, a firearm is worth only what someone is willing to pay for it. New trends arise quickly, and there are many excellent bargains to be found in today's market. With patience and good judgment–and with this book under your arm–you, too, can find them.

ABOUT THE EDITOR

Jerry Lee has been editor of several leading magazines in the firearms field including *Guns*, *Petersen's Handguns*, *Rifle Shooter*, and *Wing & Shot*. For many years he also was editor of the *Guns & Ammo* and *Shooting Times* specialty and annual publications. These include such titles as *Book of the 1911*, *Book of the AR-15*, *Combat Arms*, *Surplus Firearms*, *Book of the Model 70*, *Firearms for Law Enforcement*, *Gun Guide*, and many others. He was also responsible for editing the content of custom magazines and catalogs for Smith & Wesson, Remington, Ruger, Mossberg, CZ, Hornady, Nikon, and other manufacturers. Jerry is an NRA Life Member and has written several articles for that organization's website. His passion in firearms mainly centers around Colt handguns, rimfire rifles and 20-gauge shotguns. Jerry and Susan, his wife of more than 40 years, live in West Virginia.

AUCTION HOUSES

Among the many resources used by the editors to determine trends in firearms values are the prices realized at recent auctions. These include the following auction houses, which are considered to be among the very best in the field of modern and antique firearms.

Amoskeag Auctions, 250 Commercial Street, Suite 3011, Manchester, NH 03101;
www.amoskeag-auction.com
Bonhams & Butterfields, 220 San Bruno Avenue, San Francisco, CA 94103;
www.bonhams.com
Heritage Auctions, 3500 Maple Avenue, 17th Floor, Dallas, Texas 75219;
www.ha.com
James D. Julia, Inc., 203 Skowhegan Rd., Fairfield, ME 04937;
www.juliaauctions.com
Little John's Auctions, 1740 W. La Veta Ave., Orange, CA 92868;
www.littlejohnsauctionservice.com
Rock Island Auction Co., 7819 42nd Street West, Rock Island, IL 61201;
www.rockislandauction.com

GRADING SYSTEM

In most cases, the condition of a firearm determines its value. As with all collectible items, a grading system is necessary to give buyers and sellers a measurement that most closely reflects a general consensus on condition. While all grading systems are subjective, the system presented in this publication attempts to describe a firearm in universal terms. It is strongly recommend that the reader be closely acquainted with this grading system before attempting to determine the correct value of a particular firearm.

NIB (NEW IN BOX)

This category can sometimes be misleading. It means that the firearm is in its original factory carton with all of the appropriate papers. It also means the firearm is new, that it has not been fired, and has no wear. This classification brings a substantial premium for both the collector and shooter. It should be noted that NIB values are not the same as MSRP (manufacturer's suggested retail price), but rather are "street prices" that can be considerably lower than the MSRP. A NIB value should closely represent the selling price for a new, unfired gun in the box.

EXCELLENT

Collector quality firearms in this condition are highly desirable. The firearm must be in at least 98 percent condition with respect to blue wear, stock or grip finish, and bore. The firearm must also be in 100 percent original factory condition without refinishing, repair, alterations, or additions of any kind. Sights must be factory original, as well. This grading classification includes both modern and antique (manufactured prior to 1898) firearms.

VERY GOOD

Firearms in this category are also sought after both by the collector and shooter. Modern firearms must be in working order and retain approximately 92 percent original metal and wood finish. It must be 100 percent factory original, but may have some small repairs, alterations, or non-factory additions. No refinishing is permitted in this category. Antique firearms must have 80 percent original finish with no repairs.

GOOD

Modern firearms in this category may not be considered to be as collectible as the previous grades, but antique firearms are considered desirable. Modern firearms must retain at least 80 percent metal and wood finish, but may display evidence of old refinishing. Small repairs, alterations, or non-factory additions are sometimes encountered in this class. Factory replacement parts are permitted. The overall working condition of the firearm must be good, as well as safe. The bore may exhibit wear or some corrosion, especially in antique arms. Antique firearms may be included in this category if the metal and wood finish is at least 50 percent of the

factory original.

FAIR

Firearms in this category should be in satisfactory working order and safe to shoot. The overall metal and wood finish on the modern firearm must be at least 30 percent and antique firearms must have at least some original finish or old re-finish remaining. Repairs, alterations, non-factory additions, and recent refinishing would all place a firearm in this classification. However, the modern firearm must be in working condition, while the antique firearm may not function. In either case the firearm must be considered safe to fire if in a working state.

POOR

Neither collectors nor shooters are likely to exhibit much interest in firearms in this condition. Modern firearms are likely to retain little metal or wood finish. Pitting and rust will be seen in firearms in this category. Modern firearms may not be in working order and may not be safe to shoot. Repairs and refinishing would be necessary to restore the firearm to safe working order. Antique firearms in this category will have no finish and will not function. In the case of modern firearms their principal value lies in spare parts. On the other hand, antique firearms in this condition can be used as "wall hangers," or might be an example of an extremely rare variation or have some kind of historical significance.

Example prices are shown for the conditions described above in this format:

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*

PRICING

Prices given in this book are designed as a guide, not as a quote, and the prices given reflect retail values. This is very important to remember. You will seldom realize full retail value if you trade in a gun or sell it to a dealer. In this situation, your gun will be valued at its wholesale price, which is generally substantially below retail value to allow for the seller's profit margin.

It should also be remembered that prices for firearms can vary with the time of the year, geographical location, and the general economy. As might be expected, guns used for hunting are more likely to sell in late summer or early fall as hunting season approaches. Likewise, big-game rifles chambered for powerful magnum cartridges will likely have more appeal in western states than in the Deep South, while semi-automatic rifles or shotguns will not sell well in states where their use for hunting is prohibited, such as is the case in Pennsylvania.

It is not practical to list prices in this book with regard to time of year or location. What is given here is a reasonable price based on sales at gun shows, auction houses, and information obtained from knowledgeable collectors and

dealers. In certain cases there will be no price indicated under a particular condition, but rather the notation "N/A" or the symbol "–." This indicates that there is no known price available for that gun in that condition or the sales for that particular model are so few that a reliable price cannot be ascertained. This will usually be encountered only with very rare guns, with newly introduced firearms, or more likely with antique firearms in those conditions most likely to be encountered. Most antique firearms will be seen in the Good, Fair and Poor categories.

Standard Catalog of Firearms can be used as an identification guide and as a source of starting prices for a planned firearms transaction. If you begin by valuing a given firearm according to the values shown in this book, you will not be too far off the mark.

In the final analysis, a firearm is worth only what someone is willing to pay for it. New trends arise quickly, and there are many excellent bargains to be found in today's market. With patience and good judgment–and with this book under your arm–you, too, can find them.

ADDITIONAL CONSIDERATIONS

Firearms have been admired and coveted, not only for their usefulness, but also for their grace and beauty. Since the beginning of the 19th century, gun makers have adorned their firearms with engraving, fine woods or special order features that set their products apart from the rest. There is no feasible way to give the collector every possible variation of the firearms presented in this book. However, in a general way, certain special factors will significantly influence the price of a firearm.

Perhaps the most recognizable special feature collectors agree that affects the price of a rifle or shotgun is engraving. The artistry, beauty and intricate nature of engraving draw all collectors toward it. But firearms engraving is a field unto itself requiring years of experience to determine proper chronological methods and the ability to identify the engraver in question.

Factory engraving generally brings more of a premium than after-market engraving. To be able to determine factory work is a difficult task, and can be full of pitfalls. In some cases, factories like Colt and Winchester may have records to verify original factory engraving work, whereas other manufacturers such as Parker, Remington or Savage may not. Whenever a firearm purchase is to be made with respect to an engraved gun, it is in the collector's best interest to secure an expert opinion and or a factory letter prior to the purchase. Engraved firearms are expensive. A mistake could cost the buyer or seller thousands of dollars; proceed with caution.

The 19th and 20th centuries were times when guns were purchased by or given to historically important individuals. Firearms have also been an important part of significant historical events such as the Battle of the Little Bighorn or the Battle of Bull Run. Many of these firearms are in museums where the public can enjoy, see and appreciate them. Others are in private collections that seldom, if ever, are offered for sale. If the collector should ever encounter one of these historically important firearms, it cannot be stressed strongly enough to secure an expert determination as to authenticity. Museum curators are perhaps the best source of information for these types of firearms. As with engraved guns, historical firearms are usually expensive, and without documentation their value is questionable.

Special features and variations are also a desirable part of firearms collecting. As with engraving, special order guns can bring a considerable premium. The Colt factory has excellent records regarding its firearms and will provide the collector with a letter of authenticity. Winchester records are not as comprehensive but rifles made prior to 1908 may have documentation. Other firearm manufacturers either do not have records or do not provide the collector with documentation. This leaves the collector in a difficult position. Special order sights, stocks, barrel lengths, calibers, gauges and chokes must be judged on their own merits. As with other factors, an expert should be consulted prior to purchase. Experienced collectors,

researchers, and museums will generally provide the kind of information a collector needs before purchasing a special order or unique firearm.

Perhaps the best advice is for the collector to take his time. Do not be in a hurry, and do not allow yourself to be rushed into making a decision. Learn as much as possible about the firearms you are interested in collecting or shooting. Try to keep current with prices through this publication and the auction houses listed nearby. Go to gun shows, not just to buy or sell, but to observe and learn. It is also helpful to join a gun club or collector's association. These groups have experienced members who are glad to help the beginner or veteran.

Firearms collecting is a rewarding hobby. Firearms are part of our nation's history and represent an opportunity to learn more about their role in the American experience. If done skillfully, firearms collecting can be a profitable hobby as well.

AFC

Auguste Francotte
Liege, Belgium

This was one of the most prolific makers of revolvers in Liege during the last half of the 19th century. It is estimated that over 150 different revolvers were made and marketed by them before they were forced out of business by the German occupation of 1914. Francotte produced many variations from Tranter copies to pinfires, early Smith & Wesson designs to the 11mm M1871 Swedish troopers revolver. They made break-open revolvers and produced only one semi-auto, a

6.35mm blowback design. A good portion of their pistols were produced for the wholesale market and were sold under other names. These particular revolvers will bear the letters "AF" stamped somewhere on the frame. Because of the vast number and variety of pistols produced by this company, cataloging and pricing is beyond the scope of this or any general reference book. It is suggested that any examples encountered be researched on an individual basis. For more information on Francotte see the information under that listing.

Model 1895

One of the earliest Francotte pistols. Chambered for the 8mm cartridge, it is a lever-operated repeater. Marked "A. Francotte & Co. Makers" on the top of the slide.

ALKARTASUNA FABRICA DE ARMAS

Guernica, Spain

This company began production during World War I to help Gabilondo y Urresti supply sidearms to the French. After the hostilities ceased, they continued to produce firearms under their own name. They produced a number of variations in both 6.35mm and 7.65mm marked "Alkar." Collector interest is very thin. The factory burned down in 1920, and by 1922 business had totally ceased.

ALL RIGHT FIREARMS CO.

Lawrence, Massachusetts

Little All Right Palm Pistol

Squeezer-type pocket pistol invented by E. Boardman and A. Peavy in 1876, was made in.22 cal. and had a 5-shot cylinder with a 1-5/8" or 2-3/8" barrel. The barrel is octagonal with a tube on top of it which houses the sliding trigger. The finish is nickel. The black hard rubber grips have “Little All Right” & “All Right Firearms Co., Manufacturers Lawrence, Mass. U.S.A.” molded into them. There were several hundred produced in the late 1870s.

ALLEN, ETHAN

Grafton, Massachusetts

The company was founded by Ethan Allen in the early 1800s. It became a prolific gun-making firm that evolved from Ethan Allen to Allen & Thurber, as well as the Allen & Wheelock Company. It was located in Norwich, Connecticut, and Worchester, Massachusetts, as well as Grafton. It eventually became the Forehand & Wadsworth Company in 1871 after the death of Ethan Allen. There were many and varied firearms produced under all of the headings described above. If one desires to collect Ethan Allen firearms, it would be advisable to educate oneself, as there are a number of fine publications available on the subject. The basic models and their values are listed.

First Model Pocket Rifle

Manufactured by Ethan Allen in Grafton, Massachusetts. It was a bootleg-type, under-hammer, single-shot pistol chambered for.31 percussion. Larger-caliber versions have also been noted. It had barrel lengths from 5" to 9" that were part-octagon in configuration. It had iron mountings and was blued with walnut grips. The barrel was marked, “E. Allen/ Grafton/Mass.” as well as “Pocket Rifle/Cast Steel/ Warranted.” There were approximately 2,000 manufactured from 1831 to

1842.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	1650	750	200

Bar Hammer Pistol

A double-action pistol with a top-mounted bar hammer. It was chambered for.28 to.36 caliber percussion. The half-octagon barrels were from 2" to 10" in length. They screwed out of the frame so it was possible to breech load them. The finish was blued with rounded walnut grips. They were marked, “Allen & Thurber/Grafton Mass.” There were approximately 2,000 manufactured between the early 1830s and 1860.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	1650	725	200

Tube Hammer Pistol

This version was similar to the Bar Hammer with a curved hammer without a spur. There were only a few hundred manufactured between the early 1830s and the early 1840s.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	2900	1300	400

Side Hammer Pistol

A single-shot, target-type pistol that was chambered for.34,.41, and.45 caliber percussion. It had a part-octagon barrel that was from 6" to 10" in length. There was a wooden ramrod mounted under the barrel. This model had a good quality rear sight that was adjustable. The ornate trigger guard had a graceful spur at its rear. The finish was blued with a rounded walnut grip. The barrel was marked, “Allen & Thurber, Worchester.” There were approximately 300 manufactured in the late 1840s and early 1850s.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	1400	650	200

Center Hammer Pistol

A single-action chambered for.34,.36, or.44 percussion. It had a half-octagon barrel from 4" to 12" in length. It had a centrally mounted hammer that was offset to the right side to allow for sighting the pistol. The finish was blued with walnut grips. It was marked, “Allen & Thurber, Allen Thurber & Company.” Some specimens are marked, “Allen & Wheelock.” There were several thousand

manufactured between the late 1840s and 1860.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	1400	650	200

Double-Barrel Pistol

A SxS, double-barrel pistol with a single trigger. It was chambered for.36 caliber percussion with 3" to 6" round barrels. The finish was blued with walnut grips. Examples with a ramrod mounted under the barrel have been noted. The flute between the barrels was marked, “Allen & Thurber,” “Allen Thurber & Company,” or “Allen & Wheelock.” There were approximately 1,000 manufactured in the 1850s.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	1250	600	150

Allen & Wheelock Center Hammer Pistol

A single-action pocket pistol chambered for.31 to.38 caliber percussion. It had octagon barrels from 3" to 6" in length. The finish was blued with square butt walnut grips. The barrel was marked, “Allen & Wheelock.” There were approximately 500 manufactured between 1858 and 1865.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	1100	550	100

Allen Thurber & Company Target Pistol

A deluxe, single-action target pistol that was chambered for.31 or.36 caliber percussion. It had a heavy, octagon barrel that was from 11" to 16" in length. There was a wooden ramrod mounted underneath the barrel. The mountings were of German silver, and there was a detachable walnut stock with a deluxe, engraved patchbox. This weapon was engraved, and the barrel was marked, “Allen Thurber & Co./Worchester/Cast Steel.” This firearm was furnished in a fitted case with the stock, false muzzle, and various accessories. It was considered to be a very high grade target pistol in its era. The values listed are for a complete-cased outfit. There were very few manufactured in the 1850s.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	9000	4000	1000

NOTE: For pistols without attachable stock deduct 75 percent.

Ethan Allen Pepperboxes

During the period from the early 1830s to the 1860s, this company manufactured over 50 different variations of the revolving, pepperbox-type pistol. They were commercially quite successful and actually competed successfully with the Colt revolving handguns for more than a decade. They were widely used throughout the United States, as well as in Mexico, and during our Civil War. They are widely collectible because of the number of variations that exist. The potential collector should avail himself of the information available on the subject. These pepperboxes can be divided into three categories.

No. 1: Manufactured from the 1830s until 1842, at Grafton, Massachusetts.

No. 2: Manufactured from 1842 to 1847, at Norwich, Connecticut.

No. 3: Manufactured from 1847 to 1865, at Worchester, Massachusetts.

There are a number of subdivisions among these three basic groups that would pertain to trigger type, size, barrel length etc. It would be impossible to cover all 50 of these variations in a text of this type. We strongly suggest that qualified, individual appraisal be secured if contemplating a transaction. The values of these pepperbox pistols in excellent condition would be between $1,500 and $5,000. Most examples will be seen in the fair to good condition and will bring $1,000 to 2,000 depending on variation.

Large Frame Pocket Revolver

A double-action pocket revolver that was chambered for.34 caliber percussion. It had an octagon barrel from 3" to 5" in length. There were no sights. The 5-shot, unfluted cylinder was game scene engraved. The finish was blued with rounded walnut grips. It had a bar-type hammer. This was the first conventional revolver manufactured by this company, and it was directly influenced by the pepperbox pistol for which Ethan Allen had become famous. It was marked, “Allen & Wheelock” as well as “Patented April 16, 1845.” There were approximately 1,500 manufactured between 1857 and 1860.

Courtesy Milwaukee Public Museum, Milwaukee, Wisconsin

–	–	–	1400	700	350

Small Frame Pocket Revolver

This version was similar to the Large Frame Pocket Revolver except chambered for.31 caliber percussion, with a 2" to 3.5" octagon barrel. It was slightly smaller in size, finished and marked the same. There were approximately 1,000 made between 1858 and 1860.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	1400	700	350

Side Hammer Belt Revolver

A single-action revolver chambered for.34 caliber percussion. It had an octagon barrel from 3" to 7.5" in length. It featured a hammer that was mounted on the right side of the frame and a 5-shot, engraved, unfluted cylinder. The cylinder access pin is inserted from the rear of the weapon. The finish is blued with a case-colored hammer and trigger guard and flared butt walnut grips. It is marked, "Allen & Wheelock." There were two basic types. Values for the early model, of which 100 were manufactured between 1858 and 1861, are listed.

–	–	7500	4500	1875	500

Center Hammer Navy Revolver

Similar to the Army Revolver except chambered for.36 caliber percussion with a 7.5", full-octagon barrel. Examples have been noted with 5", 6", or 8" barrels. Otherwise, it was similar to the Army model.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	4300	1975	475

Center Hammer Percussion Revolver

A single-action revolver chambered for.36 caliber percussion. It had an octagonal, 3" or 4" barrel with a 6-shot, unfluted cylinder. The finish was blued with walnut grips. This model supposedly was made for the Providence, Rhode Island, Police Department and has become commonly referred to as the "Providence Police Model." There were approximately 700 manufactured between 1858 and 1862.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	2500	1750	750	200

LIPFIRE ARMY REVOLVER

A large, military-type, single-action revolver that was chambered for the.44 lipfire cartridge. It had a 7.5", half-octagon barrel with a 6-shot, unfluted cylinder that had notches at its rear for the cartridge lips. The finish was blued with a case-colored hammer and trigger guard and square butt walnut grips. The barrel was marked, "Allen & Wheelock, Worchester, Mass." It resembled the Center Hammer Percussion Army Revolver. There were two basic variations, with a total of 250 Lipfire Army Revolver manufactured in the early 1860s.

.32 Single-Shot Center Hammer

A larger-frame pocket pistol chambered for the.32 rimfire cartridge. It has a part-octagon or full-octagon barrel of 4" or 5" in length. It swung to the right side for loading. Otherwise, this model was similar to the.22-caliber version.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	1175	1050	300	100

Vest Pocket Derringer

A small pocket pistol chambered for the.22 rimfire cartridge. It had a 2", part-octagon barrel that swung to the right-hand side for loading. The cartridges were manually extracted. It featured a brass frame with a blued or plated barrel and walnut, bird's-head grips. The barrel was marked “Allen & Co. Makers.” This was an extremely small firearm, and there were approximately 200 manufactured between 1869 and 1871.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	1595	975	425	100

.32 Derringer

Similar to the Vest Pocket version, larger in size, and chambered for the.32 rimfire cartridge. It had a part-octagon barrel from 2" to 4" in length that swung to the right for loading. This version featured an automatic extractor. The barrel was marked “E. Allen & Co. Worchester, Mass.” This was a very rare firearm, made between 1865 and 1871.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	1495	875	395	100

.41 Derringer

The same size and configuration as the.32 caliber model except it was chambered for the.41 rimfire cartridge with barrel lengths of 2.5" to 2.75" in length. The markings were the same. There were approximately 100 manufactured between 1865 and 1871.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	2200	950	350	100

ALSOP, C.R.

Middletown, Connecticut

This firearms manufacturer made revolvers during 1862 and 1863. They made two basic models, the Navy and the Pocket model. Some collectors consider the Alsop to be a secondary U.S. martial handgun, but no verifying government contracts are known to exist.

First Model Navy Revolver

A.36 cal. revolver with a 3.5", 4.5", 5.5", or 6.5" barrel length and a 5-shot cylinder. It has a blued finish, wood grips, and a peculiar hump in its backstrap. The first model has a safety device which blocks the spur trigger. This device is found on serial numbers 1-100. Markings are: “C.R. Alsop Middletown, Conn. 1860 & 1861” on the barrel. The cylinder is marked “C.R. Alsop” & “Nov. 26th, 1861” ; the side plate, “Patented Jan. 21st, 1862.”

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3850	1300	500	350

Standard Model Navy Revolver

Exactly the same as the First Model without the safety device. They are serial numbered 101 to 300.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3350	900	300	225

Pocket Model Revolver

A.31 cal. 5-shot revolver with spur trigger, 4" round barrel, blued finish, and wood grips. It is very similar in appearance to the Navy model but smaller in size. It is

marked “C.R. Alsop Middletown, Conn. 1860 & 1861” on the barrel. The cylinder is marked “C.R. Alsop Nov. 26th, 1861.” They are serial numbered 1-300.

AMAC

American Military Arms Corporation
formerly Iver Johnson
Jacksonville, Arkansas

The Iver Johnson Arms Co. was founded in 1871 in Fitchsburg, Massachusetts. It was one of the oldest and most successful of the old-line arms companies on which our modern era has taken its toll. In 1984 the company moved to Jacksonville, Arkansas; in 1987 it was purchased by the American Military Arms Corporation. This company has released some of the older designs as well as some new models. In 1993 the company went out of business. The original Iver Johnson line is listed under its own heading.

Enforcer.30 Carbine

This is a 9.5" pistol version of the M1 Carbine. It has no buttstock.

AMERICAN ARMS

Garden Grove, California

Eagle.380

This pistol was a stainless steel copy of the Walther PPKS. It was a semi-auto blowback that was chambered for the.380 ACP. It was double-action and had a 3.25" barrel and a 6-shot detachable magazine. An optional feature was a black Teflon finish that would increase the value by 10 percent. This company ceased production in 1985.

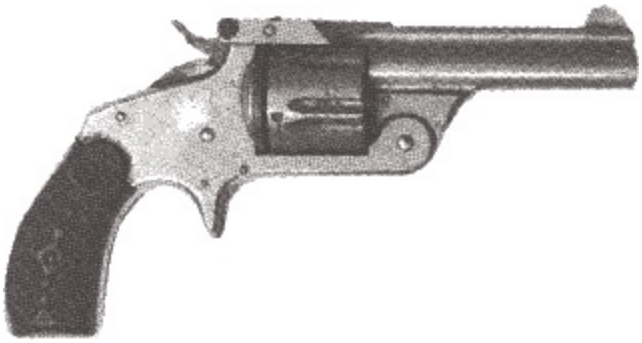
AMERICAN ARMS CO.

Boston, Massachusetts

The history of American Arms is rather sketchy, but it appears the company was formed in 1853 as the G. H. Fox Co. and then became the American Tool & Machine Co. in 1865. In 1870 they formed a new corporation called American Arms Company with George Fox as the principle stockholder. This corporation was dissolved in 1873; a second American Arms Co. was incorporated in 1877 and a third in 1890. It is unclear if these corporations had essentially the same owners, but George H. Fox appears as a principal owner in two of the three. One could assume that financial problems forced them to bankrupt one corporation and reorganize under another. American Arms manufactured firearms in Boston, Massachusetts, from 1866 until 1893. In 1893 they moved to Bluffton, Alabama and manufactured guns until 1901.

TOP BREAK REVOLVERS



Courtesy Milwaukee Public Museum, Milwaukee, Wisconsin

Spur Trigger–Single-Action Five-Shot Revolver

These revolvers were made between 1883 and 1887 in.38 S&W only. They feature an unusual manual ring extractor and double-fluted cylinder. They are nickel plated with hard rubber grips and are marked “American Arms Company Boston Mass.”

–	750	300	100	75	25

Hammerless Model 1890 Double-Action

These guns were manufactured from 1890 to 1901. It has an adjustable single- or double-stage trigger pull and several unusual safety devices. It comes in.32 and.38 S&W with a 3.25" ribbed barrel, fluted cylinder, nickel finish, hard rubber grips with logo and ivory or mother of pearl grips. It is marked “American Arms Co. Boston/Pat. May 25, 1886.” The top strap is marked “Pat. Pending” on early models and “Pat's May 25'86/Mar 11'89/June 17'90” on later models.

–	750	300	100	75	25

DOUBLE-BARREL DERRINGERS

American Arms Co. manufactured a two-barrel derringer-style pocket pistol. The barrels were manually rotated to load and fire the weapon. The pistol had a nickel-plated brass frame, blued barrels, and walnut grips. The markings were: “American Arms Co. Boston, Mass.” on one barrel and “Pat. Oct. 31, 1865” on the other barrel. There were approximately 2,000-3,000 produced between 1866 and 1878. Beware of fakes!

Combination.22 caliber R.F. and.32 caliber R.F.

Semmerling LM-4

The LM-4 was designed as the ultimate police backup/defense weapon. It is a manually operated, 5-shot repeater only 5.2" long, 3.7" high, and 1" wide. It is chambered for the.45 ACP and is undoubtedly the smallest 5-shot.45 ever produced. The LM-4 is made of a special tool steel and is either blued or, at extra cost, hard chrome-plated. A stainless steel version is also available. The LM-4 is not a semi-automatic, although it physically resembles one. The slide is flicked forward and back after each double-action squeeze of the trigger. This weapon is virtually hand-built and features high visibility sights and a smooth trigger.

AMERICAN FIRE ARMS MFG. CO., INC.

San Antonio, Texas

This company operated between 1972 and 1974, producing a.25 ACP pocket pistol and a stainless steel.38 Special derringer. A.380 auto was produced on an extremely limited basis.

American.38 Special Derringer

A well-made, stainless steel O/U derringer that was similar in appearance and function to the old Remington O/U. It had 3" barrels that pivoted upward for

loading. This gun was a single-action that had an automatic selector and a spur trigger. The smooth grips were of walnut. There were approximately 3,500 manufactured between 1972 and 1974.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	300	225	150	125	90

American.25 Automatic

A small, blowback, semi-automatic pocket pistol that was chambered for the.25 ACP cartridge. It had a 2" barrel and was made of either stainless steel or blued carbon steel. The grips were of plain uncheckered walnut, and the detachable magazine held 7 shots. It was manufactured until 1974.

Courtesy J.B. Wood

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	275	200	125	100	75

NOTE: For stainless steel add 20 percent.

American.380 Automatic

Similar to the.25 except larger. The barrel was 3.5", and the gun was made in stainless steel only. The grips were of smooth walnut, and it held 8 shots. There were only 10 of these.380's manufactured between 1972 and 1974. They are extremely rare, but there is little collector base for this company's products, and the value is difficult to estimate.

AMES, N.P. PISTOLS

Springfield, Massachusetts

Overall length-11-5/8"; barrel length-6"; caliber-.54. Markings: on lockplate, forward of hammer “N.P. AMES/SPRINGFIELD/MASS,” on tail, either “USN” or “USR” over date; on barrel, standard U.S. Navy inspection marks. N. P. Ames of Springfield, Massachusetts received a contract from the U.S. Navy in September 1842 for the delivery of 2,000 single-shot muzzleloading percussion pistols. All are distinguished by having a lock mechanism that lies flush with the right side of the stock. On the first 300 Ames pistols, this lock terminates in a point; the balance produced were made with locks with a rounded tail. This “boxlock” had been devised by Henry Nock in England, and was adapted to the U.S. Navy for the percussion pistols they ordered from Ames and Derringer. In addition to the 2,000 pistols for the Navy, the U.S. Revenue Cutter Service purchased 144 (distinguished by the “U S R” marks) for the forerunner of the U.S. Coast Guard. The latter commands triple the price over the “U S N” marked pistols, while the Navy pistols with pointed tails quadruple the value.

AMES SWORD CO.

Chicopee Falls, Massachusetts

Turbiaux Le Protector

Ames Sword Co. became one of three U.S. companies that produced this unique, French palm-squeezer pistol. The design consists of a round disk with a protruding barrel on one side and a lever on the other. The disk contains the cylinder that holds either seven 8mm rimfire or ten 6mm rimfire cartridges. The barrel protrudes between the fingers, and the lever trigger is squeezed to fire the weapon. The design was patented in 1883 and sold successfully in France into the 1890s. In

1892 Peter Finnegan bought the patents and brought them to Ames Sword. He contracted with them to produce 25,000 pistols for the Minneapolis Firearms Company. After approximately 1,500 were delivered, Finnegan declared insolvency, and after litigation, Ames secured the full patent rights. The Ames Company produced Protector Revolvers until at least 1917.
(See Chicago Firearms Co. and Minneapolis Firearms Co.)

AMT

formerly Arcadia Machine and Tool
Irwindale, California
See also–Galena Industries Inc.

AMT, one of several companies that succeeded Auto Mag Corp., the original manufacturer of Auto Mag pistols, operated from approx. 1984 to 1998. The prices in this section are for these earlier AMT-built guns. In 1998, Galena Ind. of Sturgis, SD purchased the rights to produce most of the AMT-developed firearms and manufactured several models from 1999 to 2001. In 2005, the rights to several AMT models were acquired by Crusader Gun Co. of Houston, parent company of High Standard Mfg. Co. Also see listing for Auto Mag.

Lightning

A single-action, semi-automatic.22 caliber pistol. Available with barrel lengths of 5" (Bull only), 6.5", 8.5", 10.5" and 12.5" (either Bull or tapered), and adjustable sights, as well as the trigger. The grips are checkered black rubber. Manufactured between 1984 and 1987.

ANCION MARX

Liege, Belgium

This company began production in the 1860s with a variety of cheaply made pinfire revolvers. They later switched to solid-frame, centerfire, “Velo-Dog” -type revolvers chambered for 5.5mm or 6.35mm. They were marketed in various

countries under many different trade names. Some of the names that they will be found under are Cobalt, Extracteur, LeNovo, Lincoln, and Milady. The quality of these revolvers is quite poor; and collector interest, almost non-existent. Values do not usually vary because of trade names.

ASTON, H./H. ASTON & CO. PISTOLS

Middleton, Connecticut

Overall length 14"; barrel length 8-1/2"; caliber.54. Markings: on lockplate, forward of hammer “U S/H. ASTON” or “U S/H. ASTON & CO.,” on tail “MIDDTN/CONN/(date)” ; on barrel, standard government inspection marks. Henry Aston of Middleton, Connecticut received a contract from the U.S. War Department in February 1845 for 30,000 single-shot percussion pistols. These were delivered between 1846 and 1852, after which Ira N. Johnston continued production under a separate contract. Three thousand of these pistols were purchased for Navy usage and many of these were subsequently marked with a small anchor on the barrel near the breech. These Navy purchases will command a slight premium.

ASTRA-UNCETA SA

Guernica, Spain

Astra is a brand name placed on guns built by Esperanza y Unceta and then Unceta y Cia. This Spanish company has now incorporated its trade name into its corporate name and is now know as Astra-Unceta SA. The firm under the direction of Don Pedron Unceta and Don Juan Esperanza began business in Eibar on July 17, 1908 and moved to Guernica in 1913. The Astra trademark was adopted on November 25, 1914. Esperanza began production of the Spanish Army's Campo Giro pistol in 1913. The Model 1921 was marketed commercially as the Astra 400. After the Spanish Civil War Unceta was one of only four handgun companies permitted to resume manufacturing operations. An interesting and informative side note is that pistols with 1000 to 5000 model numbers were made after 1945. Astra merged with Star before going out of business in 2006. The Astra name is planned to be resurrected as a Spanish concern.

Victoria

A 6.35mm semi-automatic pistol with a 2.5" barrel. Blued with black plastic grips. Manufactured prior to 1913.

KENT LOMONT

As pistols made by this maker are essentially prototypes, it is advised that potential purchasers secure a qualified appraisal.

L. E. JURRAS CUSTOM

This custom maker produced a limited number of Auto Mag pistols in 1977. These arms are worth approximately 35-50 percent more than standard production models.

TDE CORP.

El Monte, California

Serial number range A05016 through A08300, 6.5" vent rib barrel standard. Also available in 8" and 10" barrel lengths chambered for.44 AMP and.357 AMP.

AUTO ORDNANCE CORP.

Auto Ordnance makes reproductions of the 1911 Government Model pistol, the Thompson submachine gun (semiauto only) and the M-1 Carbine. Variations of the 1911 are marketed under both the Auto Ordnance and Thompson brand names. In 1999 the company was bought by Kahr Arms and moved from West Hurley, NY to Worcester, MA.

Auto Ordnance 1911A1

Standard model in.45 ACP with 5-inch barrel, Parkerized finish, fixed sights, plastic or checkered walnut grips. Also offered in 9mm,.38 Super, 10 mm (all discontinued in 1996), and.40 S&W (disc. 1993). Blue, satin nickel and two-tone finish were optional until 2005. In 2011 a 100th Anniversary Model was introduced with appropriate rollmarks.

BACON ARMS CO.

Norwich, Connecticut

Bacon Arms operated from 1862 until 1891. They have become known primarily for the production of cheaply made, solid-frame, rimfire revolvers known as “Suicide Specials.” Bacon manufactured and sold under a number of different trademarks. They were: Bacon, Bonanza, Conqueror, Express, Gem, Governor, Guardian, and Little Giant. Collector interest is low, and values for all trademarks are quite similar.

BAER CUSTOM, LES

Hillsdale, Illinois

This long-standing 1911 pistolsmith is now producing custom quality 1911 pistols on a semi-production basis. Each pistol features a large number of custom characteristics such as forged steel frame and full slide recoil rod, double-serrated slide, beveled magazine well, checkered front strap, beavertail safety, extended magazine release button, Bo-Mar sights, and many others depending on the specific model. A representative sampling of these fine Baer pistols appears below.

BERETTA 70 SERIES

These pistols began production in 1958 replacing Models 1934, 1935, 948, and 949. During the late 1960s several of these models briefly utilized a 100 series designation for the U.S. market. During the latter part of the 1970s a magazine safety was added to the 70 series and the pistols became known as the Model 70S. The 70S designation replaced model designations 70 through 75 making these older model numbers obsolete. Only the Model 76 designation continued.The 70 Series design included a cross bolt safety, sear block safety, a slide hold-open device, and a push-button magazine release. Shorty after its introduction the cross bolt safety pushbutton was replaced with a lever-type sear block safety located in the same place. **NOTE:** The above information was supplied by contributing editor John Stimson, Jr.

Model 70 (Model 100)

The Model 948 with cross bolt safety, hold-open device, and a push-button magazine release. Fixed sights. There are a number of subvariations available chambered for the.22 LR,.32 ACP, and the.380 ACP cartridges. Available with a 3.5" or 5.9" barrel and has a detachable magazine. Also known as the “Puma” when marketed in the U.S. by J.L. Galef & Sons. It was introduced in 1958 and discontinued in 1985.

BERGMANN, THEODOR

Gaggenau, Germany

Theodor Bergmann was a successful industrialist, designer and sometimes inventor

with a deep interest in firearms based in Gaggenau, Germany. His first automatic pistol patent dates from 1892, and by 1894 he had prototype pistols, refined with the help of Louis Schmeisser, being evaluated by various governments. When his designs went into commercial production in 1896, however, they were actually manufactured by the firm of V. Charles Schilling in Suhl, the heart of German arms manufacture. Later he licensed manufacture of his “Mars” pistol to Anciens Establishment Pieper (“Bayard”), and after WWI affiliated with the Lignose firm, producing a line of.25 caliber pocket pistols, first under the Bergmann name but later marketed as Lignose. Still later several pistol designs from the August Menz firm were marketed under the “Bergmann Erben” trademark, though it's doubtful if the Bergmann firm actually had much part in their production or sale.

Model 1894 Bergmann Schmeisser

The Model 1894 was made in prototype form only, with only a few examples surviving and known serial numbers no higher than the mid teens. Most are large framed and chambered for the 8mm Bergmann-Schmeisser cartridge, though at least one was made in 7.5mm Swiss revolver for Swiss army testing and a few very compact versions, with a unique folding trigger, for 5mm Bergmann. Early Bergmann pistols had no extractor, counting on gas pressure to blow the fired (rimless-grooveless) cartridge from the chamber. Too rare to price.

MODEL 1896, NUMBER 2

The 1896 Number 2 pistols were quite compact and chambered for the 5mm Bergmann cartridge. Early Number 2s also featured a folding trigger and no extractor, but after serial 500 or so reverted to a more conventional in-the-frame trigger and an extractor was added. About 2000 of the later model were produced. Cased sets are known, and add about 50 percent to the value.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3700	3200	2250	1375	800

MODEL 1896 NUMBER 3

The Number 3 was a larger version of the Number 2, chambered for the 6.5mm Bergmann cartridge. Early examples had a slim gripframe and, up to about serial 800, were made without extractor like the early Number 2s. These bring about a 20 percent premium over the later examples. Number 3 serials range to a little over 4000. Add about 20 percent for dealer markings (usually English), and 50 percent for cased sets. A few target models, with long barrel, adjustable sights and set triggers are known and will bring about three times the price of a standard Number 3.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	6300	5700	4950	3250	2750

Model 1896 Number 4

The Number 4 is identical to the Number 3 but chambered for a unique 8mm Bergmann cartridge and serialed in the same series with the Number 3. Both the Number 4 and its cartridge are rare; probably fewer than 200 were ever made.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	8000	6500	5000	3700	2900

Model 1897 Number 5

This was Bergmann's first attempt at a more powerful arm for the military market, with a unique side-moving locking system and a 10-shot removable box magazine. The 7.8mm cartridge resembled the 7.63mm Mauser, but with a longer neck. Add 60 percent for original metal framed leather holster-stock.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	8550	6900	4950	3000	2250

Bergmann Simplex

The Simplex combined some features of the 1896 pistols with improvements developed from the “Mars,” resulting in a reasonable compact pocket pistol that came on the market in the early 1900s. It was chambered for the unique Bergmann-Simplex 8mm cartridge, however, and that and competition from better Browning and other designs doomed it to a short production life. Very early examples had checkered wood grips and bring a premium, as do very late examples (above serial 3000) that have the magazine release behind the magazine instead of on the front of the frame.

NIB Exc. V.G. Good Fair Poor

Bergmann "Mars"

The Mars was Bergmann's first really successful pistol aimed at the military market. Early examples, about 100 of the total 1000 or so Mars pistols made, were chambered for the 7.63mm Mauser cartridge but later Mars pistols, identified by a large "9mm" on the chamber, were chambered for the special 9mm cartridge that later became known as the 9mm Bergmann-Bayard. The Mars was adopted by the Spanish government in 1905 as their first military automatic pistol, but none were ever delivered by Bergmann. At least two Mars pistols were also made in.45 caliber for U.S. Army trials in 1906, but did not perform well and were dropped from the trials; these are too rare to price.

NIB Exc. V.G. Good Fair Poor

– 7000 5300 3850 2500 1650

NOTE: Add 25 percent for a low serial number gun chambered for 7.63mm Mauser; add 50 percent for original Bergmann Mars holster stock.

Bergmann Bayard Model 1908

Shortly after receiving the Spanish contract for the Mars pistol, Bergmann's arrangement with Schilling to produce Bergmann pistols ended. However, he negotiated an arrangement with Anciens Establishment Pieper (Bayard) to produce the Mars and, after some minor modifications, AEP filled the Spanish contract. They also marketed the gun commercially, and later secured a production contract from the Danish army as the Model 1910. Spanish contract (proofed with a small circle divided into three segments) and very early commercial pistols have hard rubber grips that proved very fragile in service; these bring a premium as do original unmodified Danish contract guns (with a contract number and Danish letter D proof). A few Model 1908 Bergmann Bayards were equipped with leather and wood holster stocks; a complete rig is worth at least twice the price of an unslotted pistol.

BERGMANN POST WAR PISTOLS

Shortly after WWI ended Bergmann came on the market with a line of.25 caliber pocket pistols; the 2 and 3 were conventional vest pocket designs with a short and long gripframe respectively; the 2a and 3a were identical except for an "Einhand" (one-hand) feature that enabled the user to cycle the slide by pulling the front of the trigger guard with his trigger finger. Soon into production (at about serial 8000) Bergmann affiliated with the Lignose firm and later Model 2 and 3 pistols were marketed under the Lignose name.

Bergmann Erben Pistols

The Bergmann Erben pistols appear to be an attempt by the Bergmann family to keep the Bergmann name associated with firearms without actually investing any design or production effort. The Bergmann Erben pistols were all August Menz designs, and were undoubtedly made by Menz as well. Most noteworthy was the "Spezial" model, a very sophisticated double-action.32 pocket pistol that could be cocked for single-action fire by pulling and then releasing the trigger. Also noteworthy were several compact vest pocket.25s that also bore the Bergmann Erben name.

BERNARDON MARTIN

St. Etienne, France

This small firm was active between 1906 and 1912. The gun designer was Martin and the money man was Bernardon.

1907/8 Model

A 7.65mm caliber semi-automatic pistol. The left side of the slide is marked "Cal. 7.65mm St. Etienne." The trademark "BM" is molded into the grips. Sometimes found with a 32-round horseshoe magazine.Occasionally the Bernardon Martin pistol will be noted with the word "Hermetic" stamped on the slide in letters that do not match the other markings on the weapon. This was but another name for the Model 1907/8. Guns with this stamping were most likely assembled after the company ceased operations.

BILLINGHURST, WILLIAM

Rochester, New York

Billinghurst originally worked for James and John Miller of Rochester. After James Miller's death in 1837, Billinghurst established his own shop where he produced revolving rifles based upon Miller's 1829 patent. While these arms were originally made with percussion ignition systems (either pill or percussion cap), later examples using self-contained metallic cartridges are sometimes encountered. Billinghurst also established a well-deserved reputation for making extremely accurate percussion target pistols and rifles.

Under Hammer Pistol

This pistol is somewhat different than most of the under hammers encountered. The barrels are 12" to 18" in length and of a heavy octagonal construction. They are chambered from.30 to.38 caliber and utilize the percussion ignition system. Higher grade versions feature a part-round barrel, and it is important to note that no two pistols are alike. These pistols were furnished with detachable shoulder stocks, and a good many were cased with telescopic sights and false muzzles. This is a high quality weapon; and if encountered with the optional accessories, it would definitely warrant an individual appraisal. This firearm was manufactured in the 1850s and 1860s.

CENTURY GUN COMPANY/ NEW CENTURY MANFACTURING

Evansville, Knightstown & Greenfield, Indiana

This revolver design was originally manufactured in 1972 by Russell Wilson, who sandcasted the bronze frame (cloned from the Colt SAA configuration) in Evansville, IN. Gene Phelps purchased the manufacturing rights for this gun and formed a partnership with Earl Keller to produce a redesigned frame, also using sandcast bronze.The original Century revolver was made in Evansville, IN beginning in 1973 (1973 was the 100th anniversary of the.45-70 Govt. cartridge – hence the term Century) and production was halted in 1976 at ser. no. 524. In late 1976, Phelps and Keller (the two original partners on the venture) dissolved their partnership and each began manufacturing their own version of the.45-70 revolver. Gene Phelps completely redesigned the gun's interior and began manufacturing the Heritage I, with an investment-cast steel frame, and without the Century's novel cross-bolt safety. Keller's Century Manufacturing, Inc. continued to produce the original Century, with some design refinements, and in 1985 the company was purchased by Dr. Paul Majors, who died in Dec. of 2001.The most recent Century revolver featured a manganese bronze frame and other components in addition to having a cross-bolt safety. They were produced in.45-70 and various other cals., in Greenfield, IN. Earl Keller died in 1986. The second series was made in Greenfield, IN with limited production resuming in 1986. Earlier handmade “Evansville” Model 100s (disc.) are currently selling for between $2,500-$3,500, depending on the region and condition. Post-Evansville guns retail from a high around $1700 (Excellent) to $9000 (Good) in.45-70; other chamberings such as.444 Marlin and.50-70 Government generally bring 10 percent to 20 percent more.In Feb., 2002, Century Mfg. was purchased by Dave Lukens & Jeff Yelton and moved to Knightstown, IN. Dave and Jeff produced approximately 500 guns. In June, 2004, Century Mfg. was purchased by Bill, Stephen, Robert, and Thomas Jordan and renamed the company to New Century Manufacturing, LLC. Production was expected to begin in late 2004.(Courtesy New Century Manufacturing)

CHAPMAN, G. & J.

Philadelphia, Pennsylvania

A.32 caliber revolver with a 4" round barrel and 7-shot cylinder. The frame is made of brass while the barrel and cylinder are of steel. The barrel is marked “G.& J. Chapman/Philada/Patent Applied For/1861.” Manufactured during the1860s.

COLT'S PATENT FIRE ARMS MANUFACTURING COMPANY

Hartford, Connecticut

COLT PATERSON MODELS

Pocket or Baby Paterson Model No. 1

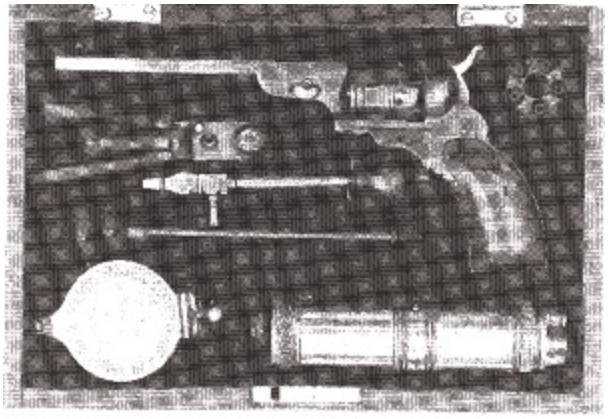
The Paterson was the first production revolver manufactured by Colt. It was first made in 1837. The Model 1 or Pocket Model is the most diminutive of the Paterson line. The revolver is serial numbered in its own range, #1 through #500. The numbers are not visible without dismantling the revolver. The barrel lengths run from 1.75" to 4.75". The standard model has no attached loading lever. The chambering is.28 caliber percussion and it holds five shots. The finish is all blued, and the grips are varnished walnut. It has a roll-engraved cylinder scene, and the barrel is stamped “Patent Arms Mfg. Co. Paterson N.J. Colt's Pt.” Cased examples in Very Good or better condition can bring upwards of $200,000.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*

–	–	125000	50000	19500	5000

Belt Model Paterson No. 2

The Belt Model Paterson is a larger revolver with a straight-grip and an octagonal barrel that is 2.5" to 5.5" in length. It is chambered for.31 caliber percussion and holds five shots. The finish is all blued, with varnished walnut grips and no attached loading lever. It has a roll-engraved cylinder scene, and the barrel is stamped “Patent Arms Mfg. Co. Paterson N.J. Colt's Pt.” The serial number range is #1-#850 and is shared with the #3 Belt Model. It was made from 1837-1840. An excellent cased example was auctioned by Rock Island Auction in 2007 for $414,000.

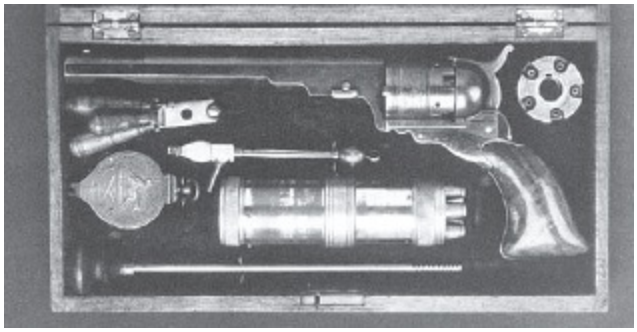


Courtesy Buffalo Bill Historical Center, Cody, Wyoming

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	400000	225000	75000	28500	7500

Belt Model Paterson No. 3

This revolver is quite similar to the Model #2 except that the grips are curved outward at the bottom to form a more handfilling configuration. They are serial numbered in the same #1-#850 range. Some attached loading levers have been noted on this model, but they are extremely rare and would add approximately 35 percent to the value.



NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	95000	40000	10000

Ehlers Model Pocket Paterson

John Ehlers was a major stockholder and treasurer of the Patent Arms Mfg. Co. when it went bankrupt. He seized the assets and inventory. These revolvers were Pocket Model Patersons that were not finished at the time. Ehlers had them finished and marketed them. They had an attached loading lever, and the abbreviation “Mfg Co.” was deleted from the barrel stamping. There were 500 revolvers involved in the Ehlers variation totally, and they were produced from 1840-1843.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	75000	30000	8000

Ehlers Belt Model Paterson

The same specifications apply to this larger revolver as they do to the Ehlers Pocket Model. It falls within the same 500 revolver involvement and is rare.

–	–	–	75000	30000	8000

Texas Paterson Model No. 5

This is the largest and most sought after of the Paterson models. It is also known as the Holster Model. It has been verified as actually seeing use by both the military and civilians on the American frontier. It is chambered for.36 caliber percussion, holds five shots, and has an octagonal barrel that ranges from 4" to 12" in length. It has been observed with and without the attached loading lever, but those with it are rare. The finish is blued, with a case-colored hammer. The grips are varnished walnut. The cylinder is roll-engraved; and the barrel is stamped “Patent Arms Mfg. Co. Paterson, N.J. Colts Pt.” Most Texas Patersons are well used and have a worn appearance. One in excellent or V.G. condition would be highly prized. A verified military model would be worth a great deal more than standard, so qualified appraisal would be essential. The serial number range is #1-#1000, and they were manufactured from 1838-1840. The attached loading lever brings approximately a 25 percent premium.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	150000	60000	17500

Walker Model Revolver

The Walker is a massive revolver. It weighs 4 lbs., 9 oz. and has a 9" part-round/part-octagonal barrel. The cylinder holds six shots and is chambered for.44 caliber percussion. There were 1,000 Walker Colts manufactured in 1847, and nearly all of them saw extremely hard use. Originally this model had a roll-engraved cylinder, military inspection marks, and barrel stamping that read “Address Saml. Colt-New York City.” Practically all examples noted have had these markings worn or rusted beyond recognition. Because the Walker is perhaps the most desirable and sought-after Colt from a collector's standpoint and because of the extremely high value of a Walker in any condition, qualified appraisal is definitely recommended. These revolvers were serial numbered A, B, C, and D Company 1-220, and E Company 1-120. An Excellent example was auctioned by James D. Julia in 2008 for $920,000.

Whitneyville Hartford Dragoon

This is a large, 6-shot,.44 caliber percussion revolver. It has a 7.5" part-round/part-octagonal barrel. The frame, hammer, and loading lever are case colored. The remainder is blued, with a brass trigger guard and varnished walnut grips. There were only 240 made in late 1847. The serial numbers run from 1100-1340. This model is often referred to as a Transitional Walker. Some of the parts used in its manufacture were left over from the Walker production run. This model has a roll-engraved cylinder scene, and the barrel is stamped “Address Saml. Colt New York-City.” This is an extremely rare model.

NIB Exc. V.G. Good Fair Poor
– – 45000 40000 25000 8500

Walker Replacement Dragoon

This extremely rare Colt (300 produced) is sometimes referred to as the “Fluck” in memory of the gentleman who first identified it as a distinct and separate model. They were produced by Colt as replacements to the military for Walkers that were no longer fit for service due to mechanical failures. They were large, 6-shot,.44 caliber percussion revolvers with 7.5" part-round/part-octagonal barrels. Serial numbers ran from 2216 to 2515. The frame, hammer, and loading lever are case-colored; the remainder, blued. The grips, which are longer than other Dragoons and similar to the Walkers, are of varnished walnut and bear the inspectors mark “WAT” inside an oval cartouche on one side and the letters “JH” on the other. The frame is stamped “Colt's/ Patent/U.S.” The letter “P” appears on various parts of the gun.

NIB Exc. V.G. Good Fair Poor

FIRST MODEL DRAGOON

Another large, 6-shot,.44 caliber percussion revolver. It has a 7.5" part-round/part-octagonal barrel. The frame, hammer, and loading lever are case colored; the remainder, blued with a brass grip frame and square backed trigger guard. The trigger guard is silver-plated on the Civilian Model only. Another distinguishing feature on the First Model is the oval cylinder stop notches. The serial number range is 1341-8000. There were approximately 5,000 made. The cylinder is roll-engraved; and the barrel stampings read “Address Saml. Colt, New York City.” “Colt's Patent” appears on the frame. On Military Models the letters “U.S.” also appear on the frame.

SECOND MODEL DRAGOON

Most of the improvements that distinguish this model from the First Model are internal and not readily apparent. The most obvious external change is the rectangular cylinder-stop notches. This model is serial numbered from 8000-10700, for a total production of approximately 2,700 revolvers manufactured in 1850 and 1851. There is a Civilian Model, a Military Model, and an extremely rare variation that was issued to the militias of New Hampshire and Massachusetts (marked "MS.").

THIRD MODEL DRAGOON

This is the most common of all the large Colt percussion revolvers. Approximately 10,500 were manufactured from 1851 through 1861. It is quite similar in appearance to the Second Model, and the most obvious external difference is the round trigger guard. The Third Model Dragoon was the first Colt revolver available with a detachable shoulder stock. There are three basic types of stocks, and all are quite rare as only 1,250 were produced. There are two other major variations we will note–the "C.L." Dragoon, which was a militia-issued model and is rare, and the late-issue model with an 8" barrel. These are found over serial number 18000, and only 50 were produced.

Hartford English Dragoon

This is a variation of the Third Model Dragoon. The only notable differences are the British proofmarks and the distinct #1-#700 serial number range. Other than these two features, the description given for the Third Model would apply. These revolvers were manufactured in Hartford but were finished at Colt's London factory from 1853-1857. Some bear the hand-engraved barrel marking “Col. Colt London.” Many of the English Dragoons were elaborately engraved, and individual appraisal would be a must. Two hundred revolvers came back to America in 1861 to be used in the Civil War.

MODEL 1848 BABY DRAGOON

This is a small, 5-shot,.31 caliber percussion revolver. It has an octagonal barrel in lengths of 3", 4", 5", and 6". Most were made without an attached loading lever, although some with loading levers have been noted. The frame, hammer, and loading lever (when present) are case colored; the barrel and cylinder, blued. The grip frame and trigger guard are silver-plated brass. There were approximately 15,500 manufactured between 1847 and 1850. The serial range is between 1-5500. The barrels are stamped “Address Saml. Colt/New York City.” Some have been noted with the barrel address inside brackets. The frame is marked “Colt's/Patent.” The first 10,000 revolvers have the Texas Ranger/Indian roll-engraved cylinder scene; the later guns the stagecoach holdup scene. This is a popular model, and many fakes have been noted.

Model 1849 Pocket Revolver

This is a small, either 5- or 6-shot,.31 caliber percussion revolver. It has an octagonal barrel 3", 4", 5", or 6" in length. Most had loading gates, but some did not. The frame, hammer, and loading lever are case colored; the cylinder and barrel are blued. The grip frame and round trigger guard are made of brass and are silver plated. There are both large and small trigger guard variations noted. This is the most plentiful of all the Colt percussion revolvers, with approximately 325,000 manufactured over a 23-year period, 1850-1873. There are over 200 variations of this model, and one should consult an expert for individual appraisals. There are many fine publications specializing in the field of Colt percussion revolvers that would be helpful in the identification of the variations. The values represented here are for the standard model.

London Model 1849 Pocket Revolver

Identical in configuration to the standard 1849 Pocket Revolver, the London-made models have a higher quality finish and their own serial number range, 1-11000. They were manufactured from 1853 through 1857. They feature a roll-engraved cylinder scene, and the barrels are stamped “Address Col. Colt/London.” The first 265 revolvers, known as early models, have brass grip frames and small round trigger guards. They are quite rare and worth approximately 50 percent more than the standard model that has a steel grip frame and large oval trigger guard.

–	–	3400	2950	1200	300

MODEL 1851 NAVY REVOLVER

This is undoubtedly the most popular revolver Colt produced in the medium size and power range. It is a 6-shot,.36-caliber percussion revolver with a 7.5" octagonal barrel. It has an attached loading lever. The basic model has a case colored frame hammer, and loading lever, with silver-plated brass grip frame and

trigger guard. The grips are varnished walnut. Colt manufactured approximately 215,000 of these fine revolvers between 1850 and 1873. The basic Navy features a roll-engraved cylinder scene of a battle between the navies of Texas and Mexico. There are three distinct barrel stampings–serial number 1-74000, "Address Saml. Colt New York City" ; serial number 74001-101000 "Address Saml. Colt. Hartford, Ct." ; and serial number 101001-215000 "Address Saml. Colt New York U.S. America." The left side of the frame is stamped "Colt's/Patent" on all variations. This model is also available with a detached shoulder stock, and values for the stocks today are nearly as high as for the revolver itself. Careful appraisal should be secured before purchase. The number of variations within the 1851 Navy model designation makes it necessary to read specialized text available on the subject.

11ONDON MODEL 1851 NAVY REVOLVER

These revolvers are physically similar to the U.S.-made model with the exception of the barrel address, which reads "Address Col. Colt. London." There are also British proofmarks stamped on the barrel and cylinder. There were 42,000 made between 1853 and 1857. They have their own serial number range, #1-#42,000. There are two major variations of the London Navy, and again a serious purchaser would be well advised to seek qualified appraisal as fakes have been noted.

COLT SIDE HAMMER MODELS
12ODEL 1855 SIDE HAMMER "ROOT" POCKET REVOLVER

The "Root," as it is popularly known, was the only solid-frame revolver Colt ever made. It has a spur trigger and walnut grips, and the hammer is mounted on the right side of the frame. The standard finish is a case colored frame, hammer, and loading lever, with the barrel and cylinder blued. It is chambered for both.28 caliber and.31 caliber percussion. Each caliber has its own serial number range–1-30000 for the.28 caliber and 1-14000 for the.31 caliber. The model consists of seven basic variations, and the serious student should avail himself of the fine publications dealing with this model in depth. Colt produced the Side Hammer Root from 1855-1870.

COLT PERCUSSION REVOLVERS
13ODEL 1860 ARMY REVOLVER

This model was the third most produced of the Colt percussion handguns. It was the primary revolver used by the Union Army during the Civil War. Colt delivered 127,156 of these revolvers to be used during those hostilities. This is a 6-shot.44 caliber percussion revolver. It has either a 7.5" or 8" round barrel with an attached loading lever. The frame, hammer, and loading lever are case colored; the barrel and cylinder are blued. The trigger guard and front strap are brass, and the backstrap is blued steel. The grips are one-piece walnut. The early models have the barrels stamped “Address Saml. Colt Hartford Ct.” Later models are stamped “Address Col. Saml. Colt New-York U.S. America.” “Colt's/Patent” is stamped on the left side of the frame; “.44 Cal.,” on the trigger guard. The cylinder is roll engraved with the naval battle scene. There were a total of 200,500 1860 Army Revolvers manufactured between 1860 and 1873.

MODEL 1861 NAVY REVOLVER

This model is a 6-shot, 7.5" round-barreled,.36 caliber percussion revolver. The frame, hammer, and attached loading lever are case colored. The barrel and cylinder are blued. The grip frame and trigger guard are silver-plated brass. The grips are of one-piece walnut. The cylinder has the roll-engraved naval battle scene, and the barrel stamping is “Address Col. Saml. Colt New-York U.S. America.” The frame is stamped “Colts/Patent” with “36 Cal.” on the trigger guard. There are not many variations within the 1861 Navy model designation, as less than 39,000 were made between 1861 and 1873.

MODEL 1862 POCKET NAVY REVOLVER

This is a smaller, 5-shot,.36 caliber percussion revolver that resembles the configuration of the 1851 Navy. It has a 4.5", 5.5", or 6.5" octagonal barrel with an attached loading lever. The frame, hammer, and loading lever are case colored; the barrel and cylinder, blued. The grip frame and trigger guard are silver-plated brass; and the one-piece grips, of varnished walnut. The stagecoach holdup scene is roll-engraved on the cylinder. The frame is stamped “Colt's/Patent” ; and the barrel, “Address Col. Saml. Colt New-York U.S. America.” There were approximately 19,000 manufactured between 1861 and 1873. They are serial numbered in the same range as the Model 1862 Police. Because a great many were used for metallic cartridge conversions, they are quite scarce today.The London Address Model with blued steel grip frame would be worth more than the standard model. Add 50 percent.

NOTE: Longer barrels will bring a premium over the 4.5" length.

MODEL 1862 POLICE REVOLVER

This is a slim, attractively designed revolver that some consider to be the most aesthetically pleasing of all the Colt percussion designs. It has a 5-shot, half-fluted cylinder chambered for.36 caliber. It is offered with a 3.5", 4.5", 5.5", or 6.5" round barrel. The frame, hammer, and loading lever are case colored; the barrel and cylinder, blued. The grip frame is silver-plated brass; and the one-piece grips, varnished walnut. The barrel is stamped “Address Col. Saml Colt New-York U.S. America” ; the frame has “Colt's/Patent” on the left side. One of the cylinder flutes is marked “Pat Sept. 10th 1850.” There were approximately 28,000 of these manufactured between 1861 and 1873. Many were converted to metallic cartridge use, so they are quite scarce on today's market.The London Address Model would be worth approximately twice the value of the standard model.

Courtesy Milwaukee Public Museum, Milwaukee, Wisconsin

NOTE: Longer barrels will bring a premium over the 3.5" or 4.5" length.

COLT METALLIC CARTRIDGE CONVERSIONS

THUER CONVERSION REVOLVER

Although quite simplistic and not commercially successful, the Thuer Conversion was the first attempt by Colt to convert the percussion revolvers to the new metallic cartridge system. This conversion was designed around the tapered Thuer cartridge and consists of a ring that replaced the back part of the cylinder, which had been milled off. This ring is stamped “Pat. Sep. / 15. 1868.” The ejection position is marked with the letter “E.” These conversions have rebounding firing pins and are milled to allow loading from the front of the revolver. This conversion was undertaken on the six different models listed; and all other specifications, finishes, markings, etc., not directly affected by the conversion

would be the same as previously described. From a collectible and investment standpoint, the Thuer Conversion is very desirable. Competent appraisal should be secured if acquisition is contemplated.

RICHARDS CONVERSION, 1860 ARMY REVOLVER

This was Colt's second attempt at metallic cartridge conversion, and it met with quite a bit more success than the first. The Richards Conversion was designed for the.44 Colt cartridge and has a 6-shot cylinder and an integral ejector rod to replace the loading lever that had been removed. The other specifications pertaining to the 1860 Army Revolver remain as previously described if they are not directly altered by the conversion. The Richards Conversion adds a breechplate with a firing pin and its own rear sight. There were approximately 9,000 of these Conversions manufactured between 1873 and 1878.

–	–	9500	7000	3000	1200

Richards-Mason Conversion, 1860 Army Revolver

This conversion is different from the Richards Conversion in a number of readily apparent aspects. The barrel was manufactured with a small lug much different in appearance than seen on the standard 1860 Army. The breechplate does not have its own rear sight, and there is a milled area to allow the hammer to contact the base of the cartridge. These Conversions were also chambered for the.44 Colt cartridge, and the cylinder holds 6 shots. There is an integral ejector rod in place of the loading lever. The barrels on some are stamped either "Address Col. Saml. Colt New-York U.S. America" or "Colt's Pt. F.A. Mfg. Co. Hartford, Ct." The patent dates 1871 and 1872 are stamped on the left side of the frame. The finish of these revolvers, as well as the grips, were for the most part the same as on the unconverted Armies; but for the first time, nickel-plated guns are found. There were approximately 2,100 of these Conversions produced in 1877 and 1878.

MODEL 1862 POLICE AND
POCKET NAVY CONVERSIONS

The conversion of these two revolver models is the most difficult to catalog of all the Colt variations. There were approximately 24,000 of these produced between 1873 and 1880. There are five basic variations with a number of sub-variations. The confusion is usually caused by the different ways in which these were marked. Depending upon what parts were utilized, caliber markings could be particularly confusing. One must also consider the fact that many of these conversion revolvers found their way into secondary markets, such as Mexico and Central and South America, where they were either destroyed or received sufficient abuse to obliterate most identifying markings. The five basic variations are all chambered

for either the.38 rimfire or the.38 centerfire cartridge. All held 5 shots, and most were found with the round roll-engraved stagecoach holdup scene. The half-fluted cylinder from the 1862 Police is quite rare on the conversion revolver and not found at all on some of the variations. The finishes on these guns were pretty much the same as they were before conversion, but it is not unusual to find nickel-plated specimens. Blued models will bring a premium over nickel in the same condition. The basic variations are listed.

MODEL 1871-1872 OPEN TOP REVOLVER

This model was the first revolver Colt manufactured especially for a metallic cartridge. It was not a conversion. The frame, 7.5" or 8" round barrel, and the 6-shot cylinder were produced for the.44 rimfire metallic cartridge. The grip frame and some internal parts were taken from the 1860 Army and the 1851 Navy. Although this model was not commercially successful and was not accepted by the U.S. Ordnance Department, it did pave the way for the Single-Action Army that came out shortly thereafter and was an immediate success. This model is all blued, with a case colored hammer. There are some with silver-plated brass grip frames, but most are blued steel. The one-piece grips are of varnished walnut. The cylinder is roll-engraved with the naval battle scene. The barrel is stamped “Address Col. Saml. Colt New-York U.S. America.” The later production revolvers are barrel stamped “Colt's Pt. F.A. Mfg. Co. Hartford, Ct. U.S.A.” The first 1,000 revolvers were stamped “Colt's/Patent.” After that, 1871 and 1872 patent dates appeared on the frame. There were 7,000 of these revolvers manufactured in 1872 and 1873.

COLT DERRINGERS AND POCKET REVOLVER

First Model Derringer

This is a small all-metal single-shot. It is chambered for the.41 rimfire cartridge. The 2.5" barrel pivots to the left and downward for loading. This model is engraved with a scroll pattern and has been noted blued, silver, or nickel-plated. The barrel is stamped “Colt's Pt. F.A. Mfg. Co./Hartford Ct. U.S.A/ No.1.” “.41 Cal.” is stamped on the frame under the release catch. There were approximately 6,500 of this model manufactured from 1870-1890. It was the first single-shot pistol Colt produced.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3750	2500	1200	400

Second Model Derringer

Although this model has the same odd shape as the First Model, it is readily identifiable by the checkered varnished walnut grips and the “No 2” on the barrel after the address. It is also.41 rimfire and has a 2.5" barrel that pivots in the same manner as the First Model. There were approximately 9,000 of these manufactured between 1870 and 1890.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3200	2000	900	400

THIRD MODEL DERRINGER

This model was designed by Alexander Thuer who was also responsible for Colt's first metallic cartridge conversion. It is often referred to as the “Thuer Model” for this reason. It is also chambered for the.41 rimfire cartridge and has a 2.5" barrel that pivots to the right (but not down) for loading. The Third Model has a more

balanced appearance than its predecessors, and its commercial success (45,000 produced between 1875 and 1910) reflects this. The barrel on this model is stamped “Colt” in small block letters on the first 2,000 guns. The remainder of the production features the “COLT” in large italicized print. The “.41 Cal.” is stamped on the left side of the frame. This model will be found with the barrel blued or plated in either silver or nickel and the bronze frame plated. The grips are varnished walnut.

First Variation, Early Production

This has a raised area (“pregnant frame”) on the underside of the frame through which the barrel screw passes, and the spur is not angled. Small block “Colt” lettering on barrel.

HOUSE MODEL REVOLVER

There are two basic versions of this model. They are both chambered for the.41 rimfire cartridge. The 4-shot version is known as the “Cloverleaf” due to the shape of the cylinder when viewed from the front. Approximately 7,500 of the nearly 10,000 House revolvers were of this 4-shot configuration. They are offered with a 1.5" or 3" barrel. The 1.5" length is quite rare, and some octagonal barrels in this length have been noted. The 5-shot round-cylinder version accounts for the rest of the production. It is found with serial numbers over 6100 and is offered with a 2-7/8" length barrel only. This model is stamped on the top strap “Pat. Sept. 19, 1871.” This model has brass frames that were sometimes nickel-plated. The barrels are found either blued or plated. The grips are varnished walnut or rosewood. There were slightly fewer than 10,000 of both variations manufactured from 1871-1876.

NOTE: Blued models will bring a premium over nickel in the same condition.

OPEN TOP POCKET REVOLVER

This is a.22-caliber rimfire, 7-shot revolver that was offered with either a 2-3/8" or a 2-7/8" barrel. The model was a commercial success, with over 114,000 manufactured between 1871 and 1877. There would undoubtedly have been a great deal more sold had not the cheap copies begun to flood the market at that time, forcing Colt to drop this model from the line. This revolver has a silver or nickel-plated brass frame and a nickel-plated or blued barrel and cylinder. The grips are varnished walnut. The cylinder bolt slots are found toward the front on this model. “Colt's Pt. F.A. Mfg. Co./Hartford, Ct. U.S.A.” is stamped on the barrel and “.22 Cal.” on the left side of the frame.

NEW LINE REVOLVER.22

This was the smallest framed version of the five distinct New Line Revolvers. It has a 7-shot cylinder and a 2.25" octagonal barrel. The frame is nickel-plated, and the balance of the revolver is either nickel-plated or blued. The grips are of rosewood. There were approximately 55,000 of these made from 1873-1877. Colt also stopped production of the New Lines rather than try to compete with the “Suicide Specials.” “Colt New.22” is found on the barrel; and “.22 Cal.,” on the frame. The barrel is also stamped “Colt's Pt. F.A. Mfg.Co./Hartford, Ct. U.S.A.”

NOTE: Blued models will bring a premium over nickel in the same condition.

New Line Revolver.38

There were approximately 5,500 of this model manufactured between 1874 and 1880. It is chambered for either the.38 rimfire or.38 centerfire caliber and is so marked. This model in a 4" barrel would also bring twice the value.

Courtesy Rock Island Auction Company

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	1500	800	400	200

NOTE: Prices above are for nickel finish. Blued models will bring a premium of 100 percent.

New Line Revolver.41

This is the “Big Colt,” as it was sometimes known in advertising of its era. It is chambered for the.41 rimfire and the.41 centerfire and is so marked. The large caliber of this variation makes this the most desirable of the New Lines to collectors. There were approximately 7,000 of this model manufactured from 1874-1879. A 4"-barreled version would again be worth a 100 percent premium.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	2000	1375	650	300

New House Model Revolver

This revolver is similar to the other New Lines except that it features a square-butt instead of the bird's-head configuration, a 2.25" round barrel without ejector rod, and a thin loading gate. It is chambered for the.32 (rare),.38, and the.41 centerfire cartridges. The finish was either full nickel-plated or blued, with a case colored frame. The grips are walnut, rosewood or (for the first time on a Colt revolver) checkered hard rubber, with an oval around the word “Colt.” The barrel address is the same as on the other New Lines. The frame is marked “New House,” with the caliber. There were approximately 4,000 manufactured between 1880-1886..32 caliber model would bring a 10 percent premium.

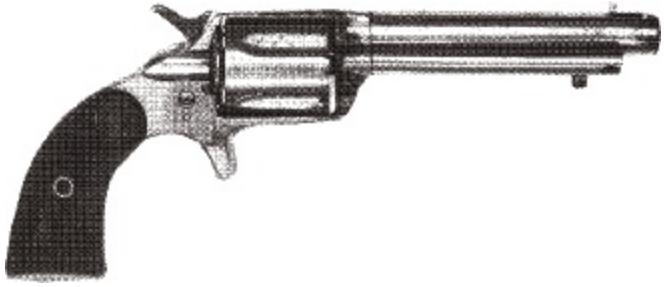
–	–	1495	1000	450	250

NEW POLICE REVOLVER

This was the final revolver in the New Line series. It is chambered for.32,.38, and.41 centerfire caliber. The.32 and.41 are quite rare. It is offered in barrel lengths of 2.25", 4.5", 5.5", and 6.5". An ejector rod is found on all but the 2.5" barrel. The finish is either nickel or blued and case colored. The grips are hard rubber with a scene of a policeman arresting a criminal embossed on them; thusly the model became known to collectors as the "Cop and Thug" model. The barrel stamping is as the other New Lines, and the frame is stamped "New Police.38." There were approximately 4,000 of these manufactured between 1882-1886.



Courtesy Milwaukee Public Museum, Milwaukee, Wisconsin

Long Barrel Model with Ejector

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	–	3250	1400	700

NOTE: The.32 and.41 caliber versions of this model will bring a 40-50 percent premium. Blued models and models with 5.5" or 6.5" barrels will bring a premium. Short barrel model will bring about 50 percent of the listed prices.

COLT'S SINGLE-ACTION ARMY REVOLVER

NOTE: As a rule of thumb nickel guns will bring a deduction of 20-30 percent. For revolvers with 4.75" barrels add 10-15 percent. For checkered grips add 20 percent.

The Colt Single-Action Army, or Peacemaker as it is sometimes referred to, is one of the most widely collected and recognized firearms in the world. With few interruptions or changes in design, it has been manufactured from 1873 until the present. It is still available on a limited production basis from the Colt Custom Shop. The variations in this model are myriad. It has been produced in 30 different calibers and barrel lengths from 2.5" to 16", with 4.75", 5.5", and 7.5" standard. The standard finish is blued, with a case colored frame. Many are nickel-plated. Examples have been found silver- and gold-plated, with combinations thereof. The finest engravers in the world have used the SAA as a canvas to display their artistry. The standard grips from 1873-1883 were walnut, either oil-stained or varnished. From 1883 to approximately 1897, the standard grips were hard rubber with eagle and shield. After this date, at serial number 165000, the hard rubber grips featured the Rampant Colt. Many special-order grips were available, notably pearl and ivory, which were often checkered or carved in ornate fashion. The variables involved in establishing values on this model are extreme. Added to this, one must also consider historical significance, since the SAA played a big part in the formative years of the American West. Fortunately for those among us interested in the SAA, there are a number of fine publications available dealing exclusively with this model. It is my strongest recommendation that they be acquired and studied thoroughly to prevent extremely expensive mistakes. The Colt factory records are nearly complete for this model, and research should be done before acquisition of rare or valuable specimens.For our purposes we will break down the Single-Action Army production as follows:Antique or Black Powder, 1873-1898, serial number 1-175000The cylinder axis pin is retained by a screw in the front of the frame.Pre-war, 1899-1940, serial number 175001-357859The cylinder axis pin is retained by a spring-loaded button through the side of the frame. This method is utilized on the following models, as well.Post-war 2nd Generation, 1956-1978, serial number 0001SA-99999SA3rd Generation, 1978-Present, serial #SA1001. A breakdown of production by caliber will follow the chapter. It is important to note that the rarer calibers and the larger calibers bring higher values in this variation.

COLT ANTIQUE SINGLE-ACTION ARMY REVOLVER

1st Year Production “Pinched Frame” 1873 Only

It is necessary to categorize this variation on its own. This is one of the rarest and most interesting of all the SAAs–not to mention that it is the first. On this model the top strap is pinched or constricted approximately one-half inch up from the

hammer to form the rear sight. The highest surviving serial number having this feature is #156, the lowest #1. From these numbers, it is safe to assume that the first run of SAAs were all pinched-frame models; but there is no way to tell how many there were, since Colt did not serial number the frames in the order that they were manufactured. An educated guess would be that there were between 50 and 150 pinched frame guns in all and that they were all made before mid-July 1873. The reason for the change came about on the recommendation of Capt. J.R. Edie, a government inspector who thought that the full fluted top strap would be a big improvement in the sighting capabilities of the weapon. The barrel length of the first model is 7.5"; the standard caliber,.45 Colt; and the proper grips were of walnut. The front sight blade is German silver. Needless to say, this model will rarely be encountered; and if it is, it should never be purchased without competent appraisal.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	275000	175000	30000	10000

NOTE: Certain 3-digit and 4-digit serial numbers will command a substantial premium. Seek an expert appraisal prior to sale.

Early Military Model 1873-1877

The serial number range on this first run of military contract revolvers extends to #24000. The barrel address is in the early script style with the # symbol preceding and following. The frame bears the martial marking “US,” and the walnut grips have the inspector's cartouche stamped on them. The front sight is steel as on all military models; the barrel length, 7.5". The caliber is.45 Colt, and the ejector rod head is the bull's-eye or donut style with a hole in the center of it. The finish features the military polish and case colored frame, with the remainder blued. Authenticate any potential purchase; many spurious examples have been noted.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	90000	75000	28000	18000	5000

NOTE: Certain 3-digit and 4-digit serial numbers will command a substantial premium. Seek an expert appraisal prior to sale.

Early Civilian Model 1873-1877

This model is identical to the Early Military Model but has no military acceptance markings or cartouches. Some could have the German silver front sight blade. The early bull's-eye ejector rod head is used on this model. The Civilian Model has a higher degree of polish than is found on the military models, and the finish on these early models could be plated or blued with a case colored frame. This model also has a script barrel address. The grips are standard one-piece walnut. Ivory-

grip models are worth a premium.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	45000	34000	20000	9000	6000

NOTE: Revolvers produced from 1878 to 1885 will command a premium. Seek an expert appraisal prior to sale.

Late Military Model 1878-1891

The later Military Models are serial numbered to approximately #136000. They bear the block-style barrel address without the # prefix and suffix. The frames are marked “US,” and the grips have the inspector's cartouche. The finish is the military-style polish, case colored frame; and the remainder, blued. Grips are oil-stained walnut. On the military marked Colts, it is imperative that potential purchases be authenticated as many fakes have been noted.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	68000	39500	14000	10000	6000

Artillery Model 1895-1903

A number of “US” marked SAAs were returned either to the Colt factory or to the Springfield Armory, where they were altered and refinished. These revolvers have 5.5" barrels and any combination of mixed serial numbers. They were remarked by the inspectors of the era and have a case colored frame and a blued cylinder and barrel. Some have been noted all blued within this variation. This model, as with the other military marked Colts, should definitely be authenticated before purchase. Some of these revolvers fall outside the 1898 antique cutoff date that has been established by the government and, in our experience, are not quite as desirable to investors. They are generally worth approximately 20 percent less.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	18000	12500	8000	4000	3000

London Model

These SAAs were manufactured to be sold through Colt's London Agency. The barrel is stamped “Colt's Pt. F.A. Mfg. Co. Hartford, Ct. U.S.A. Depot 14 Pall Mall London.” This model is available in various barrel lengths. They are generally chambered for.45 Colt,.450 Boxer,.450 Eley,.455 Eley, and rarely.476 Eley, the largest of the SAA chamberings. A good many of these London Models were cased and embellished, and they should be individually appraised. This model should be authenticated as many spurious examples have been noted.

Sheriff's or Storekeeper's Model 1882-1898

This model was manufactured with a short barrel (2.5"-4.75"). Most have 4" barrels. It features no ejector rod or housing, and the frame is made without the hole in the right forward section to accommodate the ejector assembly. The Sheriff's or Storekeeper's Model is numbered above serial #73000. It was manufactured with various finishes and chambered for numerous calibers. This model continued after 1898 into the smokeless or modern era. Examples manufactured in the pre-war years are worth approximately 20 percent less. Although faking this model is quite difficult, it has been successfully attempted.

NOTE: Nickel models will command a premium.

Flattop Target Model 1888-1896

This model is highly regarded and sought after by collectors. It is not only rare (only 925 manufactured) but is an extremely attractive and well-finished variation. It is chambered for 22 different calibers from.22 rimfire to.476 Eley. The.22 rimfire,.38 Colt,.41, and.45 Colt are the most predominant chamberings. The 7.5" barrel length is the most commonly encountered.The serial number range is between #127000-#162000. Some have been noted in higher ranges. The finish is all blued, with a case colored hammer. The checkered grips are either hard rubber or walnut. The most readily identifying feature of the flattop is the lack of a groove in the top strap and the sight blade dovetailed into the flattop. The front sight has a removable blade insert. The values given are for a standard production model chambered for the calibers previously mentioned as being the most common. It is important to have other calibers individually appraised as variance in values can be quite extreme.

–	35000	25000	15000	8000	4000

Bisley Model 1894-1915

This model was named for the target range in Great Britain, where their National Target Matches were held since the nineteenth century. The model was designed as a target revolver with an odd humped-back grip that was supposed to better fill the hand while target shooting. It is also easily identified by the wide low profile hammer spur, wide trigger, and the name “Bisley” stamped on the barrel. The Bisley production fell within the serial number range #165000-#331916. There were 44,350 made.It was offered in 16 different chamberings from.32 Colt to.455 Eley. The most common calibers were.32-20,.38-40,.41,.44-40, and.45 Colt. The barrel lengths are 4.75", 5.5", and 7.5". The frame and hammer are case-colored; the remainder, blued. Smokeless powder models produced after 1899 utilized the push-button cylinder pin retainer. The grips are checkered hard rubber. This model was actually designed with English sales in mind; and though it did sell well over there, American sales accounted for most of the Bisley production. The values we provide here cover the standard calibers and barrel lengths. Rare calibers and/or other notable variations can bring greatly fluctuating values.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2000	1500	1000	750	300

NOTE: Nickel models will command a premium.

Bisley Model Flattop Target 1894-1913

This model is quite similar to the Standard Bisley Model, with the flattop frame and dovetailed rear sight feature. It also has the removable front sight insert. It has an all-blued finish with case-colored hammer only and is available with a 7.5" barrel. Smokeless powder models produced after 1899 utilized the push-button cylinder pin retainer. The calibers are the same as the standard Bisley. Colt manufactured 976 of these revolvers. The advice regarding appraisal would also apply.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	25000	16000	9500	3500	1800

NOTE: Nickel models will command a premium.

Standard Civilian Production Models 1876-1898

This final designated category for the black powder or antique SAAs includes all the revolvers not previously categorized. They have barrel lengths from 4.75", 5.5", and 7.5" and are chambered for any one of 30 different calibers. The finishes could be blued, blued and case colored, or plated in nickel, silver, gold, or combinations thereof. Grips could be walnut, hard rubber, ivory, pearl, stag, or bone. The possibilities are endless. The values given here are for the basic model, and we again strongly advise securing qualified appraisal when not completely sure of any model variation.

NOTE: For Standard Civilian Production Models with screw-in frame, serial number to 163,000 add a 25-100 percent premium depending on year built. Seek an expert appraisal prior to sale.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	30000	18000	12000	8000	3000

COLT PRE-WAR SINGLE-ACTION ARMY REVOLVER 1899-1940

Standard Production Pre-war Models

The 1899 cutoff has been thoroughly discussed, but it is interesting to note that the actual beginning production date for smokeless models was 1900. The pre-war Colts are, all in all, quite similar to the antiques–the finishes, barrel lengths, grips, etc. Calibers are also similar, with the exception of the obsolete ones being dropped and new discoveries added. The most apparent physical difference

between the smokeless powder and black powder models is the previously discussed method of retaining the cylinder axis pin. The pre-war Colts utilized the spring-loaded button through the side of the frame. The black powder models utilized a screw in the front of the frame. The values we furnish for this model designation are for these standard models only. The serial number range on the pre-war SAAs is 175001-357859. Note that any variation can have marked effects on value fluctuations, and qualified appraisal should be secured. Note: Scarce chamberings command 30 percent to 100 percent premium.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	12500	8000	3500	2500	1500

Long Fluted Cylinder Model 1913-1915

Strange as it may seem, the Colt Company has an apparent credo they followed to never throw anything away. That credo was never more evident than with this model. These Long Flute Cylinders were actually left over from the model 1878 Double-Action Army Revolvers. Someone in the hierarchy at Colt had an inspiration that drove the gunsmiths on the payroll slightly mad: to make these cylinders fit the SAA frames. There were 1,478 of these Long Flutes manufactured. They are chambered for the.45 Colt,.38-40,.32-20,.41 Colt, and the.44 Smith & Wesson Special. They were offered in the three standard barrel lengths and were especially well-polished, having what has been described as Colt's “Fire Blue” on the barrel and cylinder. The frame and hammer are case colored. They are fitted with checkered hard rubber grips and are particularly fine examples of Colt's craft. Rare.

–	17500	1000	6000	3250	2000

COLT POST-WAR SINGLE-ACTION ARMY REVOLVER (AKA SECOND GENERATION)

STANDARD POST-WAR MODEL 1956-1975

In 1956 the shooting and gun-collecting fraternity succeeded in convincing Colt that there was a market for a re-introduced SAA. The revolver was brought back in the same external configuration. The only changes were internal. The basic specifications as to barrel length and finish availability were the same. The calibers available were.38 Special,.357 Magnum,.44 Special, and.45 Colt. The serial number range of the re-introduced 2nd Generation, as it is sometimes known, Colt is #000ISA-73000SA. Values for the standard post-war Colts are established by four basic factors: caliber (popularity and scarcity), barrel length, finish, and condition. Shorter barrel lengths are more desirable than the 7.5". The.38 Special is the rarest caliber, but the.45 Colt and.44 Special are more sought after than the.357 Magnum. Special feature revolvers, such as the 350 factory-

engraved guns produced during this period, must be individually appraised. The ivory situation in the world today has become quite a factor, as ivory grips are found on many SAAs. We will attempt to take these factors into consideration and evaluate this variation as accurately and clearly as possible. Remember as always, when in doubt secure a qualified appraisal.NOTE: 4.75" barrel add 25 percent. 5.5" barrel add 15 percent. Nickel finish add 75-100 percent. Ivory grips add $250.

Sheriff's Model 1960-1975

Between 1960 and 1975, there were approximately 500 Sheriff's Models manufactured. The first of these were marketed by Centennial Arms. They have 3" barrels and no ejector rod assemblies. The frames were made without the hole for the ejector rod to pass through. They were blued, with case colored frames; 25 revolvers were nickel-plated and would bring a sizable premium if authenticated. The barrels are marked “Colt Sheriff's Model.” The serial number has an “SM” suffix. They are chambered for the.45 Colt cartridge.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
3000	2200	1800	1200	850	600

NOTE: Nickel finish add 20 percent.

Buntline Special 1957-1975

The “Buntline Special” was named after a dime novelist named Ned Buntline, who supposedly gave this special long barrel revolver to Wyatt Earp. The story is

suspected to be purely legend as no Colt records exist to lend it credence. Be that as it may, the Colt factory decided to take advantage of the market and produced the 12" barreled SAA from 1957-1974. There were approximately 3,900 manufactured. They are chambered for the.45 Colt cartridge and are offered in the blued and case colored finish. Only 65 Buntlines are nickel-plated, making this an extremely rare variation that definitely should be authenticated before purchase. Walnut grips are the most commonly noted, but they are also offered with the checkered hard rubber grips. The barrels are marked on the left side “Colt Buntline Special.45.”

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
3100	2250	1250	850	600	500

NOTE: Nickel finish add 60 percent.

New Frontier 1961-1975

The New Frontier is readily identified by its flattop frame and adjustable sight. It also has a high front sight. Colt manufactured approximately 4,200 of them. They are chambered for the.357 Magnum,.45 Colt,.44 Special (255 produced), and rarely (only 49 produced) in.38 Special. A few were chambered for the.44-40 cartridge. The 7.5" barrel length is by far the most common, but the 4.75" and 5.5" barrels are also offered. The standard finish is case colored and blued. Nickel-plating and full blue are offered but are rarely encountered. Standard grips are walnut. The barrel is stamped on the left side “Colt New Frontier S.A.A.” The serial has the “NF” suffix.

New Frontier Buntline Special 1962-1967

This model is rare, as Colt only manufactured 70 during this five-year period. They are similar to the standard Buntline, with a 12" barrel. They are chambered for.45 Colt only.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
5500	3750	2000	1500	1000	700

COLT THIRD GENERATION SINGLE-ACTION ARMY 1976-1981

In 1976 Colt made some internal changes in the SAA. The external configuration was not altered. The serial number range began in 1976 with #80000SA, and in 1978 #99999SA was reached. At this time the suffix became a prefix, and the new serial range began with #SA01001. This model's value is determined in much the same manner as was described in the section on the 2nd Generation SAAs. Caliber, barrel length, finish, and condition are once again the four main determining factors. The prevalence of special-order guns was greater during this period, and many more factory-engraved SAAs were produced. Colt's Custom Shop was quite active during this period. Custom guns are valued according to the prevailing market.

175th Anniversary SAA Limited Edition

From the Colt Custom Shop to celebrate the 175th anniversary of the Colt Company, this model was introduced in 2011 with production limited to 175 units in each of the three standard barrel lengths of 4.75, 5.5 and 7.5-inches. In.45 Colt only, features include a black powder frame, Royal Blue finish, 24 karat Gold plated scroll on the frame, cylinder and barrel depicting the Rampant Colt icon, Colt Dome, Serpentine Colt, Sam Colt signature and a banner with the text "1836 – 175th Anniversary – 2011."

New Frontier Third Generation

Reintroduction of the adjustable-sighted, flattop-frame version of the Single Action Army that was last made in 1975. Chambered in.357 Magnum,.44 Special or.45 Colt and in all three standard barrel lengths. The rear sight is adjustable for windage and elevation, and there is a ramp style front sight. Finish is Colt's Royal Blue on both the barrel and cylinder with a color case hardened frame. Two-piece walnut grips are decorated with a gold medallion. Introduced in 2011.

COLT SCOUT MODEL

NOTE: A surprising number of Colt pistols are still found in their original boxes, even older models. This can add 100 percent to the value of the pistol. My thanks

to Bruce Buckner, Jr., for his suggestions for and corrections to this section. Anyone wishing to procure a factory letter authenticating a Single-Action Army should do so by writing to: COLT HISTORIAN, P.O. BOX 1868, HARTFORD, CT 06101. There is a charge of $50 per serial number for this service. If Colt cannot provide the desired information, $10 will be refunded. Enclose the Colt model name, serial number, and your name and address, along with the check.

Frontier Scout 1957-1971

This is a scaled-down version of the SAA that is chambered for the.22 LR with an interchangeable.22 Magnum cylinder. It is offered with a 4.75", or a 9.5" barrel. The frame is alloy. First year production frame were duotone with frame left in the white and the balance of the revolver blued. All blue models and wood grips became available in 1958. In 1961 the duotone model was dropped from production. All the Q series guns were offered in duotone finish; F series guns were made in duotone and full blue. A.22 Magnum model was first offered in 1959. In 1964 dual cylinders were introduced. These revolvers have “Q” or “F” serial number suffixes. In 1960 the “K” series Scout was introduced and featured a heavier frame, nickel plating, and wood grips. The majority of commemorative revolvers are of this type. This series was discontinued in 1970. Prices are about 15 percent higher than for the “Q” and “F” series guns.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*

NOTE: 9.5" Buntline add 50 percent. Extra cylinder add 10 percent.

Peacemaker & New Frontier.22

This model is similar to the Frontier Scout, with a steel case-colored or blued frame. Fitted with old style black plastic eagle grips.Peacemaker 22 and New Frontier 22 revolvers were initially offered with 4.75, 6 and 7.5 inch barrels (Buntline). After about one year of production the 4.75 inch barrel was discontinued and a 4.4 inch barrel was offered in each model. It also has an interchangeable.22 Magnum cylinder. The Peacemaker 22 was only available with a steel receiver with a color-casehardened finish. The grip frames were alloy. The same is true of the New Frontier 22 revolvers except that (as noted in the book), the New Frontier 22 GS series was available with color-casehardened or blue

receivers. Both Peacemaker 22 and New Frontier 22 revolvers were available in the single caliber (.22 LR only) and dual caliber (.22 LR and.22 Magnum) models. The factory had separate model numbers for these variations. Also, the factory offered “P” series or “\q62” model Frontier Scouts and Buntline Scouts. This was a significant model variation.Most of these revolvers had a “G” suffix although some built in 1974 had a “L” suffix. In 1982 through 1986 a New Frontier model with cross-bolt safety was offered. This model is often referred to as the “GS” series. This revolver was offered with adjustable sights only. No Peacemakers were offered in this series.

COLT DOUBLE-ACTION REVOLVERS

MODEL 1877 “LIGHTNING” AND “THUNDERER”

The Model 1877 was Colt's first attempt at manufacturing a double-action revolver. It shows a striking resemblance to the Single-Action Army. Sales on this model were brisk, with over 166,000 produced between 1877 and 1909. Chambered for two different cartridges, the.38 Colt, known as the “Lightning,” and.41 Colt, as the “Thunderer.” The standard finishes are blued, with case-colored frame and nickel plate. The bird's-head grips are of checkered rosewood on the early guns and hard rubber on the majority of the production run. The barrel lengths most often encountered are 2.5" and 3.5" without an ejector rod, and 4.5" and 6" with the rod. Other barrel lengths from 1.5" through 10" were offered. The Model 1877 holds 6 shots in either caliber. There were quite a few different variations found within this model designation. Values furnished are for the standard variations. Antiques made before 1898 would be more desirable from an investment standpoint. Note that these revolvers have a reputation as “watchmaker's nightmares” and non-functioning examples command substantially reduced prices.

Without Ejector, 2.5" and 3.5" Barrel

–	3000	1800	800	750	450

NOTE: Premium for blued guns add 25 percent. Premium for shorter than 2-1/2" add 50 percent..41 Caliber “Thunderer” add 10 percent. Over 6" barrel add 50 percent. London barrel address add 20 percent..32 caliber add 50 percent. Rosewood grips add 10 percent.

MODEL 1878 “FRONTIER”

This model is a large and somewhat ungainly looking revolver. It has a solid frame with a removable trigger guard. The cylinder does not swing out, and there is a thin loading gate. It has bird's-head grips made of checkered hard rubber; walnut would be found on the early models. The finish is either blued and case-colored or nickel-plated. The Model 1878 holds 6 shots, and the standard barrel lengths are 4.75", 5.5", and 7.5" with an ejector assembly and 3", 3.5", and 4" without. The standard chamberings for the Model 1878 are.32-20,.38-40,.41 Colt,.44-40, and.45 Colt. This model was fairly well received because it is chambered for the large calibers that were popular in that era. Colt manufactured 51,210 between 1878 and 1905. Antique models made before 1898 would be more desirable from an investment standpoint.

Model 1889 Navy–Civilian Model

The 1889 Navy is an important model from a historical standpoint as it was the

first double-action revolver Colt manufactured with a swing-out cylinder. They produced 31,000 of them between 1889 and 1894. The Model 1889 is chambered for the.38 Colt and the.41 Colt cartridges. The cylinder holds 6 shots. It is offered with a 3", 4.5", or 6" barrel; and the finish was either blued or nickel-plated. The grips are checkered hard rubber with the “Rampant Colt” in an oval molded into them. The patent dates 1884 and 1888 appear in the barrel marking, and the serial numbers are stamped on the butt.

–	3000	1500	1000	600	300

NOTE: Add premium for blued models. For 3" barrel add 20 percent.

Model 1889 U.S. Navy–Martial Model

This variation has a 6" barrel, is chambered for.38 Colt, and is offered in blued finish only. “U.S.N.” is stamped on the butt. Most of the Navy models were altered at the Colt factory to add the Model 1895 improvements. An original unaltered specimen would be worth as much as 50 percent premium over the altered values listed.

MODEL 1892 “NEW ARMY AND NAVY” –CIVILIAN MODEL

This model is similar in appearance to the 1889 Navy. The main differences are improvements to the lockwork function. It has double bolt stop notches, a double cylinder locking bolt, and shorter flutes on the cylinder. The.38 Smith & Wesson and the.32-20 were added to the.38 Colt and.41 Colt chamberings. The checkered hard rubber grips are standard, with plain walnut grips found on some contract

series guns. Barrel lengths and finishes are the same as described for the Model 1889. The patent dates 1895 and 1901 appear stamped on later models. Colt manufactured 291,000 of these revolvers between 1892 and 1907. Antiques before 1898 are more desirable from an investment standpoint.

Model 1905 Marine Corps

This model is a variation of the New Army and Navy Model. It was derived from the late production with its own serial range #10001-10926. With only 926 produced between 1905 and 1909, it is quite rare on today's market and is eagerly sought after by Colt Double-Action collectors. This model is chambered for the.38 Colt and the.38 Smith & Wesson Special cartridges. It holds 6 shots, has a 6" barrel, and is offered in a blued finish only. The grips are checkered walnut and are quite different than those found on previous models. “U.S.M.C.” is stamped on the butt; patent dates of 1884, 1888, and 1895 are stamped on the barrel. One hundred twenty-five of these revolvers were earmarked for civilian sales and do not have the Marine Corps markings; these will generally be found in better condition. Values are similar.

NEW SERVICE MODEL

This model was in continual production from 1898 through 1944. It is chambered for 11 different calibers:.38 Special,.357 Magnum,.38-40,.44 Russian,.44 Special,.44-40,.45 ACP,.45 Colt,.450 Eley,.455 Eley, and.476 Eley. It is offered in barrel lengths from 2" to 7.5", either blued or nickel-plated. Checkered hard rubber grips were standard until 1928, and then checkered walnut grips were used with an inletted Colt medallion. This was the largest swing-out cylinder double-action revolver that Colt ever produced, and approximately 356,000 were manufactured over the 46 years they were made. There are many different variations of this revolver, and one should consult a book dealing strictly with Colt for a thorough breakdown and description.

Camp Perry Single-Shot

This model was created by modifying an Officer's Model frame to accept a special flat single-shot “cylinder.” This flat chamber pivots to the left side and downward for loading. The pistol is chambered for.22 LR and is offered with an 8" (early production) or 10" (late production) barrel. The finish is blued, with checkered walnut grips. The name “Camp Perry Model” is stamped on the left side of the chamber; the caliber is on the barrel. Colt named this model after the site of the U.S. Target Competition held annually at Camp Perry, Ohio. They manufactured 2,525 of these between 1920 and 1941. **NOTE**: This gun serial numbered 101-2525 with 2488 produced from 1926-1941. In 1934 standard barrel length was reduced from 10" to 8" at approximately serial number 2150.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2500	1750	950	600	400

NOTE: Add 100 percent premium for 10" barrel. Add 50 percent premium for original box.

Officer's Model Match

Introduced in 1953 this model is similar to the Officer's Model Target and chambered for either the.22 caliber cartridge or the.38 Special with 6" barrel. The revolver is fitted with a heavy tapered barrel and wide hammer spur with adjustable rear sight and ramp front sight. It was sold with checkered walnut target grips. Blued finish is standard. Discontinued in 1970. The standard of long

action could be fired both double- or single-action. The.22 caliber version prices are listed. Officer's Model Match in.38 caliber will bring approximately 20 percent less. **NOTE:** This model was also produced in.22 Magnum. This is rather a rare gun in this caliber with approximately 800 produced.

650	450	300	200	150	100

Detective Special 1st Issue / 2nd Issue

This model is actually a Police Positive Special with a 2" barrel. It was originally chambered for.32 New Police,.38 New Police, (which were discontinued) and.38 Special, which continued until the end of the production run. The finish is blued or nickel and it is offered with wood or plastic grips. There were over 400,000 manufactured between 1926 and 1972. A few 2nd issue (post WWII) units came with 3" barrels.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	850	650	525	200	100

NOTE: For pre-war 1st issue (serial number 331000 - 490000) add 50 percent. For nickel finish add 25 percent. For 3" barrel add 30 percent.

Detective Special 3rd Issue

This is basically a modernized, streamlined version with a 2" or 3" barrel with a shrouded ejector rod, wraparound checkered walnut grips and is chambered for.38

Special. It was finished in blue or nickel plate. Made from 1973 to 1986 and 1993 to 1995.

NIB Exc. V.G. Good Fair Poor

750 600 500 350 200 100

NOTE: Add $50 for nickel finish.

Detective Special II (DS-II)

Introduced in 1997 this version of the Detective special features new internal lock work and a transfer bar safety mechanism. It is fitted with a 2" barrel, has a capacity of six rounds, and is chambered for the.38 Special. In 1998 this model was offered chambered for.357 Magnum cartridge as well. Rubber combat style grips are standard. Weight is approximately 21 oz. Stainless steel finish.

NIB Exc. V.G. Good Fair Poor

650 475 300 225 – –

Colt Magnum Carry

Introduced in 1999, this model is essentially a renamed Detective Special II. Stainless steel finish. Weight is 21 oz.

NIB Exc. V.G. Good Fair Poor

650 475 300 250 – –

Banker's Special

The Bankers Special is a 2" barreled, easily concealed revolver. It was designed with bank employees in mind. It is chambered for.38 Special and was offered in blued finish. The revolver was also offered in.22 caliber. The grips are rounded but full-sized, and Colt utilized this feature in advertising this model. The U.S. Postal Service equipped its railway mail clerks with this model. There were approximately 35,000 manufactured between 1926 and 1943.

NIB Exc. V.G. Good Fair Poor

– 1500 975 500 250 150

NOTE: Nickel models will command a premium. A Banker's Special in.22 caliber will command a premium.

Cobra 1st Issue

The Cobra is simply an alloy-framed lightweight version of the Detective Special. It weighs only 15 oz. The Cobra is chambered for.32,.38 Special, and.22 LR. This model is available in either a round-butt or square-butt version with a 4" barrel only. They were manufactured between 1950 and 1973.

NIB Exc. V.G. Good Fair Poor

– 850 650 525 200 100

Cobra 2nd Issue

The same as the 1st Issue in.38 Special only, this is streamlined with wraparound walnut grips and shrouded ejector rod.

–	525	375	250	150	100

NOTE: For nickel add 30 percent.

Agent 1st Issue

This revolver is basically the same as the 1st Issue Cobra with a shortened grip frame. This was done to make the Agent more concealable. Colt manufactured the Agent 1st Issue from 1955-1973.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	650	400	225	150	100

Border Patrol

This model is quite rare, as Colt manufactured only 400 of them in 1952. It is basically a Police Special with a heavy 4" barrel. It is chambered for the.38 Special and was built to be strong. The finish is blued and serial numbered in the 610000 range.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	5000	3000	2000	1000	500

Agent L.W. 2nd Issue

This is a streamlined version with the shrouded ejector rod. In the last four years of its production, it was matte finished. Colt manufactured this model between 1973 and 1986.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	550	400	275	175	150

Aircrewman Special

This model was especially fabricated for the Air Force to be carried by their pilots for protection. It is extremely lightweight at 11 oz. The frame and the cylinder are made of aluminum alloy. It has a 2" barrel and is chambered for the.38 Special. The finish was blued, with checkered walnut grips. There were approximately 1,200 manufactured in 1951, and they are marked “U.S.” or “A.F.”

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	4500	2500	1500	800	250

Courier

This is another version of the Cobra. It features a shorter grip frame and a 3" barrel. This model is chambered for.32 and.22 rimfire. There were approximately 3,000 manufactured in 1955 and 1956.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
1300	750	600	500	350	150

NOTE:.22 Rimfire add 20 percent.

Trooper

This model was designed specifically by Colt to fill the need for a large, heavy-duty, powerful revolver that was accurate. The Trooper filled that need. It was offered with a 4" or 6" barrel and blued or nickel finishes with checkered walnut grips. The Trooper is chambered for the.38 Special,.357 Magnum, and there is a.22 rimfire version for the target shooters. This model was manufactured between 1953 and 1969. Add 10 percent for.357 or.22.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	600	475	300	150	100

Colt.357 Magnum

This is a deluxe version of the Trooper. It is offered with a special target wide hammer and large target-type grips. The sights are the same as Accro target model. It features a 4" or 6" barrel and a blued finish and was manufactured between 1953 and 1961. There were fewer than 15,000 produced.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	675	495	300	200	150

Diamondback

This model is a medium-frame, duty-type weapon suitable for target work. It has the short frame of the Detective Special with the ventilated rib 2.5", 4", or 6" barrel. It is chambered for.38 Special and.22 rimfire for the target shooters. The finish is blued or nickel-plated, with checkered walnut grips. The Diamondback features adjustable target sights, wide target hammer, and a steel frame. It was manufactured between 1966 and 1986.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
1300	800	500	300	250	150

NOTE: Premium for 2.5” barrel or nickel finish.

Viper

This is an alloy-framed revolver chambered for the.38 Special. It has a 4" barrel and was manufactured between 1977 and 1984. The Viper is essentially a lightweight version of the Police Positive.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
800	595	425	200	125	100

PYTHON

The Python was often described as the Cadillac of the Colt double-action revolve line. It was originally designed to be a large-frame.38 Special target revolver but shortly before the Python was introduced in 1955, Colt management decided to chamber it for the.357 Magnum. (A.38 Special 8-inch barrel variation was made in the early 1980s. See separate listing.) The Python was offered in barrel lengths of 2.5, 3 (very rare), 4, 6 and 8-inches. Features included a ventilated rib, full lug barrel and an adjustable rear sight. Finish choices were Royal Blue, nickel plated, matte stainless and high polished "Ultimate" stainless. The Python remained in the catalog as a regular production item until 1996. The following year the Colt Custom Shop started making the Python on a special-order-only basis. Known as the Python Elite, it was produced by the Custom Shop until 2006. The early (pre-1970) production guns in very good to excellent condition can command premiums from 10 to 25 percent and those with 3-inch barrels up to 50 percent. Nickel-plated, 3-inch barreled Pythons should be confirmed with a Colt factory letter and can command premiums of 400 to 500 percent.

NOTE: Add $30 for steel backstrap and trigger guard. Add $200 for stainless steel.

J.H., G.P., and D.E. Dance began production of percussion revolvers for the Confederate States of America in Columbia, Texas, in mid-1862, moving to Anderson, Texas, in early 1864. Based on surviving serial numbers, the combined output at both places did not exceed 350 pistols. Most of these were in the “Army” (.44 caliber) size but a limited number of “Navy” (.36 caliber) were also manufactured. Nearly all are distinguished by the absence of a “recoil shield” on the frame behind the cylinders. As Colt M1851 “Navy” revolvers closely resemble the Dance Navy revolvers, great care must be exercised in examining revolvers purported to be Dance Navies.

DARDICK CORP.

Hamden, Connecticut

Perhaps one of the most unusual firearms to have been designed and marketed in the United States during the 20th century. It utilizes a “tround,” which is a triangular plastic case enclosing a cartridge. The action of these arms consists of a revolving carrier that brings the trounds from the magazine into line with the barrel. Discontinued in 1962. Values below are for boxed examples with supply of

tround ammunition. Deduct 50 to 75 percent for unboxed, loose examples without ammunition.

Series 110

3" barrel. Chambered in.38 Dardick only.

DAVIS-WARNER ARMS CORPORATION

Norwich, Connecticut

Established in 1917, when N.R. Davis & Sons purchased the Warner Arms Company. Manufactured shotguns, as well as revolvers and semi-automatic pistols. Ceased operations in 1930. The Crescent Arms Company purchased the proprietary rights to the name and briefly assembled shotguns under the name (probably from parts acquired in the purchase) until Crescent was in turn purchased by J.C. Stevens.Initially, the Davis-Warner shotguns were identical to those made by Davis (page 360), but they subsequently made a Davis Grade B.S. Hammerless, Davis-Warner Expert and Davis Grade D.S. The pistols made by the company included.32 caliber revolvers and two Browning Patent semi-automatics made in Belgium for the company.

DERINGER RIFLES AND PISTOLS, HENRY

Philadelphia, Pennsylvania

Henry Deringer Sr. and his son, Henry Jr., were well established in Philadelphia by the close of the War of 1812, having made both sporting and military rifles at that place since the turn of the century. Henry Jr. continued in the gun trade until the outbreak of the American Civil War, primarily producing flintlock and percussion military rifles, at least 2,500 “Northwest guns” and 1,200 rifles for the Indian trade, a few percussion martial pistols, but most importantly the percussion pocket pistols that became so popular that they took on his misspelled name as a generic term, the “derringers.”

Deringer U.S. Navy Contract “Boxlock” Pistols

Overall length 11-5/8"; barrel length 6"; caliber.54. Markings: on lockplate, “US/DERINGER/ PHILADELIA” or merely “DERINGER/PHILADEL\qA” in center, the tail either plain or marked “U.S.N./(date)” ; barrels sometimes marked with U.S. Navy inspection marks.Deringer was granted a contract with the U.S. Navy in 1845 for 1,200 of the new “boxlock” percussion pistols also made by Ames. All of these appear to have been delivered. From the extra parts, Deringer is thought to have assembled several hundred extra pistols, some of which he rifled. The latter bring a premium, even though quantities remain enigmatic.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	4050	1550	1225	750

Deringer Percussion Pocket Pistols

The most famous of Henry Deringer's products, an estimated 15,000 were produced between the Mexican War through the Civil War, usually in pairs. The popularity of the pistol is attested in the large number of imitations and the nickname “Derringer” applied to them, even when clearly not Deringer's products. Prices can fluctuate widely based on agent marks occasionally found on barrel. Care is advised in purchasing purported “true” derringers. Beware of fakes!

DESERT EAGLE/ISRAELI MILITARY INDUSTRIES

The Desert Eagle is a semi-automatic gas-operated pistol chambered for the.357 Magnum,.41 Magnum,.44 Magnum, and.50 Action Express. It is produced by Israel Military Industries. The pistols are furnished with a standard 6" barrel but 10" and 14" interchangeable barrels are offered as options. Also available are these interchangeable barrels that are Mag-Na-Ported. The standard material used for frame is steel, but stainless and aluminum are also available. The standard finish for these pistols is black oxide but custom finishes are available on special order. These special finishes are: gold, stainless steel, satin nickel, bright nickel, polished blue, camo, matte chrome, polished chrome, brushed chrome, and matte chrome with gold. All of these special order finishes as well as the optional barrels will affect the prices of the pistols. Prices listed here will reflect standard pistols only.

Desert Eagle.357 Magnum

Standard with 6" barrel and black oxide finish. Magazine capacity is 9 rounds. Standard weight is 58 oz.

DESERT EAGLE MARK XIX

Introduced in 1996 this new design is manufactured in the U.S. and allows the interchangeability of barrels to switch calibers between the same receiver. A single receiver can be turned into six different pistols in three Magnum calibers. Available are the.50 A.E.,.44 Mag., and.357 Mag. in barrel lengths of 6" or 10". Separate magazines are also required. Eight different finishes are offered as well. A separate bolt assembly is necessary to convert the.44/.50 calibers to the.357. There are so many different possibilities with this design that only the basic pistol prices are given. Extra barrel assemblies are an additional cost. Prices range from $280 to $160 depending on caliber and length.

DETONICS FIREARMS INDUSTRIES / NEW DETONICS

This series of compact 1911-type pistols was first manufactured by Detonics Firearms Industries in Bellvue, WA from 1976 to 1988. That firm was sold to New Detonics Mfg. Corp. of Phoenix, AZ, which operated from 1989 to 1992. In 2004 the brand was resurrected and returned to production by Detonics USA in Pendergrass, GA. Then in 2007 Detonics USA and all if its predecessors was sold to a group of investors who established the current company, known only as Detonics, in Middlestadt, IL.

DEUTSCHE WERKE

Erfurt, Germany

Ortgies

A semi-automatic pistol in 6.35mm and 7.65mm. The 6.35mm pistol was manufactured in 1921 and the 7.65mm model in 1922 by the Ortgies Company. The pistols had the "HO" logo for Heinrich Ortgies on each grip. Later the Ortgies Company was bought by Deutsche Werke. The grip logo was "D." Over the period the Ortgies were manufactured with four different slide legends.

DEVISME, F. P.

Paris, France

One of the more popular French gunsmiths of the mid-19th century, F.P. Devisme manufactured a wide variety of firearms including single-shot percussion pistols, double-barrel percussion rifles and shotguns, percussion revolvers and cane guns. After 1858 this maker manufactured cartridge weapons of the same style as his percussion arms. The quality of all of his products is uniformly high and it is impossible to provide generalized price guide.

E

ECHAVE & ARIZMENDI

Eibar, Spain

Founded in 1911, this company produced the usual poor quality, early Spanish semi-automatic pistols. They did improve their quality later on and were permitted to return to gun manufacturing after the Spanish civil war. They were one of the few pistol makers to survive this period. They imported many models, and their products are not particularly of interest to collectors.

Basque, Echasa, Dickson, or Dickson Special Agent

These four pistols are the same semi-automatic pistols but chambered in.22 LR, 6.35mm, 7.65mm, and 9mmK respectively. Their magazine capacities are 10, 9, 7, and 6 rounds. They are manufactured with alloy frames and various finish combinations. The specific model names are stamped on the slides and grip plates.

It weighs about 26 oz. It has a double-action operating system, a windage adjustable rear sight, and an ambidextrous two-position safety.

NIB Exc. V.G. Good Fair Poor

400 365 305 275 200 100

ECHEVERRIA, STAR-BONIFACIO SA (STAR)

Eibar, Spain

An old-line Spanish company that survived the Spanish civil war. It was founded in

1908 by Jean Echeverria, but the early records of the company were lost during the civil war. The early pistols the company produced were patterned after the Mannlicher designs, and the trade name Star was the closest thing to Steyr that could be used. After the close of WWI, the company began production of the open-topped slide Star for which they have become known. They also produced a large 1911-type pistol that was successful. During the civil war, the plant was damaged and the company records destroyed; but after the cessation of hostilities, they were one of only three gun companies that were allowed to remain in business. The company is now defunct.

Star Model 1908

The first pistol produced under the Star banner. It is a Mannlicher copy that is chambered for 6.35mm. It has a 3" fixed barrel and an open-topped slide. The detachable magazine holds 8 shots. The finish is blued, and the grips are checkered plastic. The slide is marked “Automatic Pistol Star Patent.”

Courtesy James Rankin

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	350	275	200	150	100

Star Model 1914

Similar to the Model 1908, with a 5" barrel and larger grips that have the Star name molded into them. This model was the first to have the six-pointed star surrounded by rays of light (that became the Star trademark) stamped on its slide.

Courtesy James Rankin

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	350	275	200	150	100

Star Model 1919

Also a copy of a Mannlicher design and differs from its predecessors chiefly in the way the pistol is disassembled. This model has a spring catch at the top of the trigger guard. This model also has a small spur on the hammer, and the magazine release was relocated to a button behind the trigger guard instead of a catch at the bottom of the butt. This model was chambered for 6.35mm, 7.65mm and 9mm short, with various barrel lengths offered. The maker's name, as well as the Star trademark, is stamped into the slide. This model was produced until 1929.

Modelo Militar

Represents the first pistol Star produced that was not a Mannlicher design copy. This model was copied from the Colt 1911. It was chambered initially for the 9mm Largo in hopes of securing a military contract. When this contract was awarded to Astra, Star chambered the Model 1919 for the.38 Super and the.45 ACP and put it on the commercial market. This model is like the Colt 1911–it has a Browning-type swinging link and the same type of lock up. However there is no grip safety, and the thumb safety functions differently. Add 30 percent for marked.38 Super.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	425	325	245	175	125

Star Model A

A modification of the Model 1919, chambered for the 7.65mm, 7.63mm Mauser, 9mm Largo, and the.45 ACP cartridge. The slide is similar in appearance to the 1911 Colt, and the spur hammer has a small hole in it. Early models had no grip safety, but later production added this feature. Some models are slotted for addition of a shoulder stock.

ECLIPSE

Enterprise Gun Works
Pittsburgh, Pennsylvania

Single-Shot Derringer

This pocket pistol was made by the firm of James Bown & Son, doing business as the Enterprise Gun Works. It is chambered for.22 or.32-caliber rimfire cartridges. A few in.25 rimfire have been noted and would add approximately 25 percent to the values listed. The barrel is 2.5" in length and is part-round/part-octagonal. It pivots sideways for loading. It has a spur trigger and a bird's-head grip. The barrel is stamped “Eclipse.” It is made of nickel-plated iron, with walnut grips. There were approximately 10,000 manufactured between 1870 and 1890.

– – 650 250 100 75

ELGIN CUTLASS

Springfield, Massachusetts

Manufactured by two companies–C.B. Allen of Springfield, Massachusetts, and Morill, Mosman and Blair of Amherst, Massachusetts. It is a unique pistol that has an integral knife attachment affixed to the gun barrel. It was designed and patented by George Elgin and simultaneously produced by the two companies. The inspiration for this weapon was supposedly Jim Bowie, who at that time had made a name as a knife fighter with his large “Bowie” knife. The blades for these pistols were supplied by N.P. Ames of the famed Ames Sword Co. These pistols are much sought after, and one must exercise caution as fraudulent examples have been noted.

C. B. ALLEN-MADE PISTOLS

U.S. Navy Elgin Cutlass Pistol

Chambered for.54 caliber percussion and has a 5" octagonal smooth-bore barrel. The Bowie-style blade is 11" long by 2" wide and is forged together with the trigger guard and the knuckle guard that protects the grip. The handle is walnut. This pistol was issued to the U.S. Navy's Wilkes-South Sea Exploration Expedition, and the markings are “C.B. Allen / Springfield / Mass.” “Elgin's Patent” and the letters “CB”, “CBA” along with the date 1837. If the sheath that was issued with this knife pistol is included and in sound condition, it would add approximately $700 to the value. There were 150 manufactured for the U.S. Navy in 1838.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	35500	14000	7500	4750

Civilian Model

Chambered for.35 or.41 caliber percussion and has a 4" octagonal barrel with a 7.5"-10" knife blade. It has a round trigger guard but does not have the knuckle bow across the grip, as found on the military model. They are marked “C.B. Allen Springfield, Mass.” Blades marked “N.P. Ames” have been noted. There were approximately 100 manufactured in 1837.

–	–	33500	13000	6250	3250

MORILL, MOSMAN AND BLAIR-MADE PISTOLS

Small Model

The main difference in the pistols of the two makers is that this model has a round barrel and a square-back trigger guard that comes to a point at the rear. This version is chambered for.32 caliber percussion and has a 2.75" barrel. The knife blade is 7.5" in length and is screwed to the frame. This model is unmarked except for a serial number. The number produced is unknown, and they were manufactured in 1837.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	33500	13000	6250	3250

Large Model

Chambered for.36 caliber percussion and has a 4" round barrel and a 9" knife blade. The pistol is usually marked “Cast Steel” and serial numbered. The blade is etched with an American eagle, stars, and an urn with flowers. “Elgin Patent” is etched in the center. This model was also manufactured in 1837.

ERMA WERKE WAFFENFABRIK

Erfurt, Germany
Post-war
Dachau, Germany

Known primarily as a manufacturer of submachine guns, but they are also in the handgun and rifle business. In 1933 they answered the German army's need for an inexpensive practice weapon by producing a.22 rimfire conversion unit for the Luger pistol. This was marketed commercially and was available for many years. The success of this unit led the company to produce other inexpensive target and plinking pistols. After the war they were reorganized in the western sector and resumed submachine gun production. In 1964 they returned to the sporting firearms business with the introduction of their.22 rimfire Luger-lookalike pistol. Since then, they have produced many like-quality firearms. They were imported by Excam of Hialeah, Florida. This association is now terminated, and they are currently imported by Beeman Precision in Santa Rosa, California, and Mandell Shooting Supplies in Scottsdale, Arizona.

Erma.22 Luger Conversion Unit

Produced for the German army in 1933 and then became a successful commercial item. It would turn a standard 9mm or 7.65mm Luger into an inexpensive-to-shoot.22 rimfire. The unit consists of a barrel insert, a breech block, and toggle unit with its own lightened recoil spring, and a.22 magazine. This unit was furnished with a wooden box. There were many different sized units to fit various caliber and barrel-length Lugers, but all used the same parts and concept. These units have become desirable to Luger collectors.

–	800	725	500	350	100

.22 Target Pistol (New Model) Master Model

An improved version of the old model that features a new grip angle and a magazine and takedown device like that of the Luger. There were interchangeable barrels and three basic models – the “Sport,” “Hunter,” and the “Master.” The difference was the length of the barrels – 4", 8", and 12", respectively. Magazine capacity is 10 rounds. Weight is about 39 oz. These pistols were manufactured between 1937 and 1940, when they were discontinued due to Erma's involvement in the war effort.

KGP-SERIES

Made to resemble the Luger quite closely. They utilized the mechanical features of the.22 conversion unit and developed a pistol around it. There are many different versions of this pistol chambered for.22 rimfire,.32 ACP, and.380 ACP. The original designation was the KGP-68; but the Gun Control Act of 1968 required that a magazine safety be added, and the model was redesignated the KGP-68A. The last designations for the three calibers are KGP-22, KGP-32, and KGP-38. These pistols were manufactured between 1964 and 1986, and their values are listed.

KGP-68

A 4" barrel and is chambered for the.32 ACP and the.380 ACP cartridges. It has a 6-shot magazine and an anodized alloy receiver. Weight is about 23 oz. This model is also known as the Beeman MP-08.

–	250	195	125	95	50

Dreadnaught, Goliath, and Smith Americano

These three trade names were found on a group of poor quality nickel-plated revolvers. They were made from 1905 through 1920 and were obvious copies of the Iver Johnson design. They had break-open actions, ribbed barrel, and were chambered for.32,.38, and.44 calibers. They are scarce today, as most have long since fallen apart. Add 30 percent for.44.

–	175	125	100	75	50

ESPIRIN, HERMANOS

Eibar, Spain

Euskaro

This poor-quality, often unsafe revolver was manufactured from 1906 until WWI. They are copies of the Iver Johnson design break-open actions, chambered for.32..38, and.44. This product epitomizes the worst Eibar had to offer during the pre-Civil War era. Add 30 percent for.44.

F

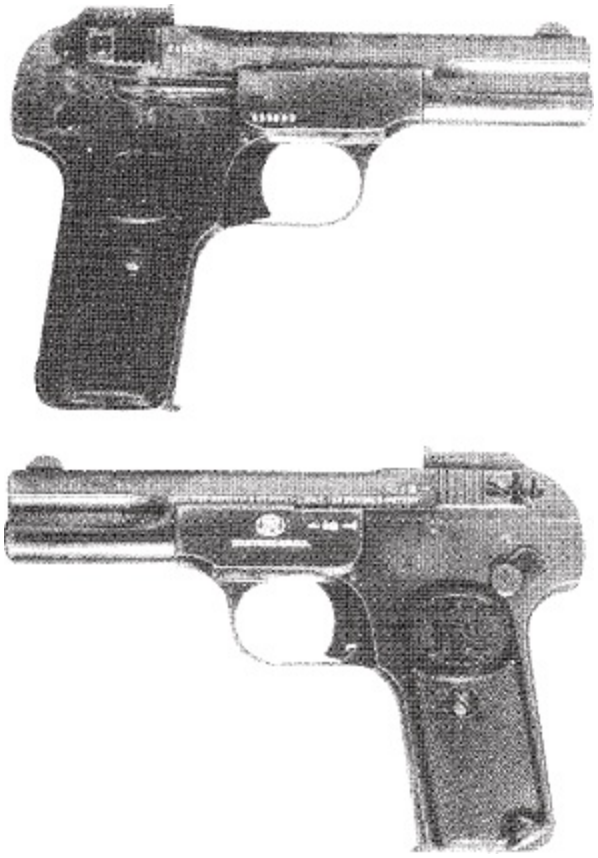
FABRIQUE NATIONALE

Herstal, Belgium

In 1889 Fabrique Nationale (or FN) was founded by a group of Belgian investors for the purpose of manufacturing Mauser rifles for the Belgian army. This was to be accomplished under license from Mauser, with the technical assistance of Ludwig Loewe of Berlin. A few years later, in the late 1890s, John Browning arrived in Europe seeking a manufacturer for his semi-automatic shotgun. He had severed his ties with Winchester after a disagreement. This led to a long association that worked out extremely well for both parties. Later Browning became associated with Colt, and the world market was divided–with the Eastern Hemisphere going to FN and the Western Hemisphere to Colt.In this section, we list arms that bear the FN banner. The FN-manufactured firearms produced under the Browning banner are listed in the Browning section of this book.

Model 1900

A blowback-operated semi-automatic pistol chambered for the 7.65mm cartridge. It has a 4" barrel and fixed sights and is blued with molded plastic grips. It was manufactured between 1899 and 1910. This model is referred to as the “Old Model.”



NIB Exc. V.G. Good Fair Poor

– 550 375 310 200 150

Model 1903

A considerable improvement over the Model 1900. It is also a blowback-operated semi-automatic; but the recoil spring is located under the barrel, and the firing pin travels through the slide after being struck by a hidden hammer. The barrel is held in place by five locking lugs that fit into five grooves in the frame. This pistol is chambered for the 9mm Browning long cartridge and has a 5" barrel. The finish is blued with molded plastic grips, and the detachable magazine holds 7 rounds. There is a detachable shoulder stock/holster along with a 10-round magazine that was available for this model. These accessories are extremely rare and if present would make the package worth approximately five times that of the pistol alone. There were approximately 58,000 manufactured between 1903 and 1939.

NIB Exc. V.G. Good Fair Poor

– 575 450 395 275 175

MODEL 1906

A smaller version of the Model 1903, designed to be a pocket pistol and chambered for the 6.35mm cartridge. It became known as the “Vest Pocket” model and was also the basis for many Eibar copies. It has a 2.5" barrel and was produced in two distinct variations. The first variation had no safety lever or slide lock and relied on the grip safety. The second variation, that occurred at approximately serial number 100000, added this safety lever and slide lock, which helped simplify dismantling of the pistol. This model was available either blued or nickel-plated. The plated models would bring a 10 percent premium. There were approximately 1,086,100 manufactured between 1906 and 1959.

–	475	350	250	175	100

Model 1910 "New Model"

Chambered for 7.65mm and 9mm short. It has a 3.5" barrel, is blued, and has molded plastic grips. The principal difference between this model and its predecessors is that the recoil spring on the Model 1910 is wrapped around the barrel. This gives the slide a more graceful tubular appearance instead of the old slab-sided look. This model has the triple safety features of the 1906 Model 2nd variation. This model was adopted by police forces around the world. It was manufactured between 1912 and 1954.

–	350	225	175	125	100

"Baby" Model

A smaller and lighter version of the Model 1906. It is chambered for the 6.35mm cartridge and has a 2" barrel. There is no grip safety or slide lock on this model, and it appears to be more square in shape than the Model 1906. This model was offered in blue, with molded plastic grips. Early models have the word "Baby" molded into the grips; post-1945 versions do not. There is also a nickel-plated version with pearl grips. There were over 500,000 of these manufactured between 1931 and 1983. Late-production specimens command a slight premium.

MODEL 1935/HI-POWER/GP

The last design from John Browning and was developed between 1925 and 1935. This pistol is known as the Model 1935, the P-35, Hi-Power or HP, and also as the GP (which stood for "Grand Puissance") and was referred to by all those names at one time or another. The HP is essentially an improved version of the Colt 1911 design. The swinging link was replaced with a fixed cam, which was less prone to wear. It is chambered for the 9mm Parabellum and has a 13-round detachable magazine. The only drawback to the design is that the trigger pull is not as fine as that of the 1911, as there is a transfer bar instead of a stirrup arrangement. This is necessary due to the increased magazine capacity resulting in a thicker grip. The barrel is 4.75" in length. It has an external hammer with a manual and a magazine safety and was available with various finishes and sight options and was furnished with a shoulder stock. The Model 1935 was used by many countries as their service pistol as such there are many variations. We list these versions and their approximate values.

PRE-WAR COMMERCIAL MODEL

Found with either a fixed sight or a sliding tangent rear sight and is slotted for a detachable shoulder stock. It was manufactured from 1935 until 1940.

PRE-WAR MILITARY CONTRACT GERMAN MILITARY PISTOLE MODELL 640(B)

In 1940 Germany occupied Belgium and took over the FN plant. The production of the Model 1935 continued, with Germany taking the output. The FN plant was assigned the production code “ch,” and many thousands were produced. The finish on these Nazi guns runs from as fine as the Pre-war Commercial series to downright crude, and it is possible to see how the war was progressing for Germany by the finish on their weapons. One must be cautious with some of these guns as there have been fakes noted with their backstraps cut for shoulder stocks, producing what would appear to be a more expensive variation. Individual appraisal should be secured if any doubt exists.

Captured Pre-war Commercial Model

These pistols were taken over when the plant was occupied. They are slotted for stocks and have tangent sights. There were few produced between serial number 48,000 and 52,000. All noted have the WA613 Nazi proof mark. Beware of fakes!

NIB Exc. V.G. Good Fair Poor

– 1700 1400 1150 750 500

POST-WAR MILITARY CONTRACT

Manufactured from 1946, and they embody some design changes–such as improved heat treating and barrel locking. Pistols produced after 1950 do not have barrels that can interchange with the earlier model pistols. The earliest models have an “A” prefix on the serial number and do not have the magazine safety.

These pistols were produced for many countries, and there were many thousands manufactured.

FAYETTEVILLE ARMORY PISTOLS AND RIFLES

Fayetteville, North Carolina

In 1861, the U.S. Arsenal at Fayetteville, North Carolina, was seized by the officials of that state and later turned over to the government of the Confederate States of America. While still controlled by the state of North Carolina, a number of inferior flintlock arms were altered at the arsenal from flint to percussion, including a number of U.S. M1836 pistols and U.S. M1819 Hall rifles (the latter also shortened and remodeled into cavalry carbines). In accordance with an agreement between the governors of Virginia and North Carolina, the rifle machinery seized at the former U.S. Armory at Harpers Ferry, Virginia, was also sent to Fayetteville, where in 1862 the Confederacy began the construction of rifles modeled after the U.S. M1855 rifle. Production continued until 1865 when the advance of Sherman's armies necessitated the evacuation of the armory.

Fayetteville Armory Percussion Pistols (U.S. M1836 Pistols, Altered)

Overall length 13-1/4"; barrel length 8-1/2"; caliber.54. Markings: same as U.S. M1836 contact pistols, i.e. the locks either marked with eagle head over “A. WATERS/MILBURY MS./(date)” or “US/R. JOHNSON/MIDDN CONN./(date)” and various barrel proofmarks; also occasionally marked “N. CAROLINA.” The Fayetteville Armory altered approximately 900 U.S. M1836 pistols from flintlock to percussion. These arms were altered by enlarging the flint touchhole and screwing in a cylindrical drum in place of the pan and frizzen. The distinguishing feature of the Fayetteville alteration is the clean-out screw at the face of the cylinder and the “S” shaped hammer, not unlike that used on post-1862 dated rifles.

FEG (FEGYVER ES GAZKESZULEKGYAR)

Budapest, Hungary

Rudolf Frommer was a first-class engineer who became associated with Fegyvergyar in 1896. In 1900 he became the manager and held that position until his retirement in 1935. He died one year later in 1936. His designs were successful and prolific. They were used militarily and sold on the commercial market as well.

Model 1901

An odd pistol that was not successful at all. It was chambered for an 8mm cartridge that was the forerunner of the 8mm Roth Steyr. It has a long, slender barrel, which was actually a collar with the barrel within. It has a rotary bolt and external hammer and is recoil-operated. There is a 10-round integral magazine, and it is loaded from the top via a stripper clip. This pistol was manufactured from 1903 to 1905.

Courtesy James Rankin

FEMARU

Budapest, Hungary

Hungary became a communist satellite in the mid-1950s. At this time the Femaru company was designated to replace the firm of Fegyvergyar as the official Hungarian arms manufacturer. The products are of good quality.

Model 37

This semi-automatic pistol was built in both 7.65mm and 9mm Short calibers. It is well designed pistol of quality construction. It is fitted with a grip safety and exposed hammer. The Hungarian military adopted the pistol in 1937. It was produced until the late 1940s. Early guns were marked "Femaru Fegyver es Gepgyar RT Budapest" but during the war the Nazi code for these guns was "jhv." The 9mm models have a 7-round magazine while the 7.65 models have an 8-round magazine. During World War II the Germans designed this pistol the "Pistol Mod 37 Kal 7.65 (Ung)." Add 75 percent for Nazi proofed examples.

FIALA ARMS COMPANY

New Haven, Connecticut

FIALA REPEATING TARGET PISTOL

A different type of pistol than what is commonly encountered. Outwardly it resembles a semi-automatic Colt Woodsman; in actuality it is a manually operated firearm that must be cycled by hand after every shot. It was chambered for the.22 rimfire and was offered with interchangeable barrels in lengths of 3", 7.5", and 20". Also offered was a detachable buttstock. The finish is blued, and the grips are

found in both smooth and ribbed walnut. The rear sight is a square-notched blade that tips up into an elevation-adjustable peep sight. They are marked “Fiala Arms and Equipment Co. Inc. / New Haven Conn. / Patents Pending” on the right side of the frame behind the grip and Model 1920/Made in U.S.A. on the right side of the frame above the trigger guard. The left side of the frame was marked “FIALA ARMS” above the image of the polar bear with the “TRADE MARK” below the polar bear in the area above the trigger guard. This pistol was also furnished in one of three variations of cases that were optionally available: a canvas case, a black leatherette case, velvet-lined and fitted with a lock and key, and a tan leather version of the leatherette case. A fixed 7.5" barrel variation was also produced. A 7.5" smoothbore barrel was catalogued as a silencer. Some 20" smoothbore barrels were produced. Some pistols bear the names “Columbia Arms Company,” and “Botwinik Brothers.” The government has classified this pistol with its stock as a “Curio or Relic” and in its complete state is a very desirable collectible.NOTE: See also Schall & Co.

F.I.E.

Hialeah, Florida

Firearms Import and Export was engaged in the business of importing the Franchi shotgun (which is listed under its own heading) and the Arminius revolver (which is made in Germany). They were also distributors for the Titan semi-automatic pistols, which are manufactured in the U.S.A. They were also importing a series of 9mm pistols from Italy that are produced by Tanfoglio and known as the TZ series. F.I.E. was no longer in business as of 1990.

TZ 75

A copy of the CZ 75 Czechoslovakian combat pistol produced by Tanfoglio in Italy. It is a 9mm, double-action semi-automatic with a 4.75" barrel, all-steel construction, fixed sights, and a 15-shot magazine. It is offered either blued or matte chrome plated, with wood or rubber grips.

NIB Exc. V.G. Good Fair Poor

TZ 75 Series 88

An improved version that is also chambered for the.41 Action Express cartridge. It has a firing pin safety and can be carried cocked and locked. There are a few other minor changes. It was introduced in 1988.

NIB Exc. V.G. Good Fair Poor

500 375 325 250 200 150

KG-99

A blowback-operated, semi-automatic assault pistol chambered for the 9mm Parabellum cartridge. It has a 36-round magazine. It was discontinued in 1984.

NIB Exc. V.G. Good Fair Poor

550 450 350 250 200 150

Spectre Assault Pistol

An assault-type semi-automatic pistol chambered for the 9mm Parabellum. It has a 30- or 50-round magazine available. It was introduced in 1989.

NIB Exc. V.G. Good Fair Poor

800 675 575 400 300 200

Titan II.22

A semi-automatic pistol chambered for the.22 LR. It has a 10-shot magazine and a blued finish with walnut grips. It is made in the U.S.A.

NIB Exc. V.G. Good Fair Poor

275 150 100 75 50 25

Titan E32

A single-action, blowback-operated, semi-automatic pistol that was chambered for the.32 ACP and is now chambered for the.380 ACP cartridge. The finish is blue or chrome-plated, and the grips are walnut.

NIB Exc. V.G. Good Fair Poor

300 175 150 125 100 75

Super Titan 11

Similar to the Titan except that it has a 12-round, high-capacity magazine.

SINGLE-ACTION ARMY REPLICA REVOLVERS

There is a series of single-action,.22 caliber revolvers that were patterned after the Colt Single-Action Army. They were manufactured in the U.S.A. or Brescia, Italy. They are inexpensive and of fair quality. The differences between these models are basically barrel lengths, type of sights, and finish. They all are chambered for the.22 LR and have interchangeable.22 Magnum cylinders. We list them for reference purposes.

G

GABBET-FAIRFAX, H.

Birmingham, England

Mars

Designed by Hugh Gabbet-Fairfax, this semi-automatic pistol was first produced on an experimental basis by Webley & Scott Revolvers in the 1890s. After Webley gave up on the idea an extremely limited number were built by the Mars Automatic Pistol Syndicate, Ltd., 1897 to 1905. The pistol was produced in four calibers; the 8.5mm Mars, 9mm Mars,.45 Mars Short Case, and.45 Mars Long Case. This was the most powerful handgun cartridge of its time and remained so until well after World War II. It is estimated that only about 80 of these pistols were ever produced.

NOTE: Webley examples are worth a premium.

GABILONDO Y URRESTI

Guernica, Spain
Elgoibar, Spain
SEE–Llama

This Spanish firm was founded in 1904 to produce inexpensive revolvers of the Velo-Dog type. Sometime around 1909 the firm began to manufacture the Radium revolver. In 1914 the company produced a semi-automatic pistol distributed as the Ruby. This pistol soon became the mainstay of the company with orders of 30,000 pistols a month for the French army. With the end of WWI Gabilondo Y Urresti moved to Elgoeibar, Spain. The company produced a Browning 1910 replica pistol until the early 1930s. It was at this point that Gabilondo began to manufacture a

Colt Model 1911 copy that became known as the Llama. For information of specific Llama models see the Llama section. The pistols listed reflect the pre-Llama period and are so marked with the trade name of that particular model. The monogram “GC” frequently appears on the grips but not on the slide.

Velo-Dog Revolver

A 6.35mm double-action revolver with a 1.5" barrel, folding trigger and concealed hammer. Blued with walnut grips. Manufactured from 1904 to 1914.

GENEZ, A. G.

New York, New York

Located at 9 Chambers Street, Genez made a wide variety of firearms during his working life (ca. 1850 to 1875). The most commonly encountered of his arms today are single-shot percussion pistols and percussion double-barrel shotguns. More rarely seen are single-shot percussion target rifles. A number of the arms he

made were decorated by Louis D. Nimschke. Genez products signed by Nimschke command considerable premiums over the values for the standard firearms listed.

Pocket Pistol

A.41 caliber single-shot percussion pistol with a 3" barrel, German silver mountings and a walnut stock. Manufactured in the 1850s and 1860s.

GLOCK

Deutsch-Wagram, Austria
Smyrna, Georgia

First imported into the U.S.A. in 1985. Completely manufactured in Austria until 2004 when Glock opened its plant in Georgia to produce the polymer frames. Offered in many models but main differences are caliber, sighting systems, barrel and slide length and grip length/magazine capacity. In 2010 the Gen4 (fourth generation) of Glock pistols was introduced. Gen4 features include three interchangeable back-straps, reversible magazine release button, improved recoil spring assembly and rough-textured frame (RTF) to enchance grip traction. As of 2011, all new-production units of the following models had the Gen4 features: M17, M19, M22, M23, M26, M27, M31, M35.

Glock 17

This model is chambered for the 9mm Parabellum cartridge. It is a double-action-only semi-automatic that has a 4.49" barrel and a 17-shot detachable magazine. The empty weight of this pistol is 21.91 oz.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*

GREAT WESTERN ARMS COMPANY

During the 10 years that Great Western was in business the quality of its firearms was inconsistent due to uncertain management and finances. This left the company's reputation damaged and allowed Colt and Ruger to dominate the single-action market. By 1961 Great Western Arms Company was no longer able to compete. Despite, or perhaps because of, the company's unstable history there is considerable collector interest in these firearms. Approximately 22,000 single-action revolvers were built and fewer than 3,500 derringers were manufactured from 1953 to 1961.Standard barrel lengths were: 4-3/4, 5-1/2, and 7-1/2 inches.Standard calibers were:.38 Special,.357 Magnum,.357 Atomic,.44 Special,.44-40,.44 Magnum,.45 Long Colt, and.22 Long Rifle.Standard finishes were: Case hardened frame and blued barrel and cylinder, or all blue finish. **NOTE:** For guns to be in NIB condition they must have original boxes and paper work. Factory engraved guns must be supported by some type of invoice, letter, or other provenance to realize full value. Great Westerns were also available in kit form. Assembled kit guns are not as valuable as factory-built guns. Deduct 25-40 percent for kit guns unless in disassembled form. **NOTE:** The market for Great Western factory-built guns is extremely volatile because of their increasing scarcity and historical significance.

HARRINGTON & RICHARDSON, INC.

Madison, North Carolina

Established in 1877 by G.H. Harrington and W.A. Richardson. The arms originally produced by this company were marketed under the trade name Aetna. In November 2000 the Marlin Firearms Company purchased the assets of Harrington & Richardson. In 2008 it was announced that H&R/NEF/Marlin had been acquired by Remington Arms, and that H&R's Gardner, Mass., plant would be closed and absorbed into Remington's existing production facilities.

Model No. 1

A.32 or.38 caliber spur-trigger single-action revolver with a 3" octagonal barrel, solid frame, a 7-shot or a 5-shot cylinder, depending on the caliber. Nickel-plated with checkered rubber bird's-head grips. Barrel marked “Harrington & Richardson Worcester, Mass.” Approximately 3,000 were manufactured in 1877 and 1878.

.22 U.S.R.A./MODEL 195 SINGLE-SHOT MATCH TARGET PISTOL

Also called the Model 195, this pistol underwent nearly constant modifications from its inception in 1928 until production ceased in 1941. Its development was greatly influenced by the United States Revolver Association (USRA), which established certain rules for target pistol shooting. The lack of any H&R-published model chronology for the estimated 3,500 guns manufactured makes model determination by examination complicated; a further difficulty is that H&R supplied newly designed parts to owners of older variations, who would then retrofit their pistols with newer triggers, hammers, sights, and trigger guards. Extracted from the available literature, the parts represent approximately: 14 different stocks and virtually endless custom variations by Walter F. Roper; 5 different trigger guards; 3 different triggers; 2 different hammers; 2 different extractors; 3 barrel lengths (7", 8", 10"); and 3 barrel rib styles. From this array of potential characteristics, at least four distinct variations can be identified.

Variations 1 to 3

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	600	450	325	275	200

.22 U.S.R.A./Model 195 Pistol, Variation 4

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	650	500	350	325	250

Variation 1, pre-U.S.R.A., 1928-30: Not marked U.S.R.A., and known as the “H&R Single-Shot Pistol.” There is no finger rest between the trigger guard and front grip strap; it was advertised with “sawhandle” shape grip copied from the Model 1 or 2 smooth bore H&R Handy-Gun, manufactured with a 10" “hourglass" barrel with a deeply undercut rib. These are the first 500 pistols.Variation 2, U.S.R.A. Keyhole Barrel, 1930-31: This is the standard “early” model marked U.S.R.A., has a finger rest, and non-sawhandle grips; however, several grip shapes were offered as options. The grip screw goes from rear of grip into threaded hold in back grip strap.Variation 3, Modified Keyhole Barrel, 1931: Modification of Variation 2 to improve rear sight, barrel catch changed, reduced spent cartridge force by replacing cylindrical extractor with less powerful hinged type, and the hammer cocking spur and finger rest were made wider. The 8" barrel was offered as an option to standard 10" length, and the number of different grip shapes was increased. This is a transition model between “early” Variation 2 and “final”

Variation 4 designs.Variation 4, Tapered Slabside Barrel, 1931-41: New “truncated teardrop” barrel cross section shape; new standard barrel length of 7", with 10" optional; adjustable trigger; new sear; grip screw location was changed to front of grip; and front sight was adjustable for elevation. The trigger design was changed from curved to straight beveled type with relocated cocking surfaces, and the number of grip shapes increased further to 13 types. A front sight protector was supplied as standard equipment, and luggage style case offered as an option. It appears that Variation 4 was introduced around 1931; the 1932 advertisements describe the fully redesigned gun, but picture Variation 2, indicating H&R probably did not re-photograph the new design. The final variation has a special, tight bore.217" in diameter, with bullet seating.03125" (1/32") into rifling, and is among the most accurate of single-shot.22 caliber pistols. The Model 195/U.S.R.A. was relatively expensive, costing approximately $30 in 1932, and increased to slightly more than $36 by the time production ended in 1941, yet was the least expensive of all single-shot.22 target pistols of quality.

Model 504

A.32 H&R Magnum caliber double-action, swing-out cylinder revolver with a 4" or 6" heavy barrel, adjustable sights, and 5-shot cylinder. Blued, with either black plastic or walnut grips. Smaller version manufactured with a 3" or 4" barrel and a round butt.

HECKLER & KOCH

Oberndorf/Neckar, Germany

At the end of WWII, the French dismantled the Mauser factory as part of their reparations; and the buildings remained idle until 1949, when firearms production was again allowed in Germany. Heckler & Koch was formed as a machine tool enterprise and occupied the vacant Mauser plant. In the early 1950s Edmund Heckler and Theodor Koch began to produce the G3 automatic rifle based on the Spanish CETME design and progressed to machine guns and sub-machine guns and eventually to the production of commercial civilian rifles and pistols. In 1990 the company got into financial difficulties because of a failed contract bid. In December 1990 the French state consortium GIAT announced the purchase of Heckler and Koch, but a little more than a year later the contract was canceled. Later in 1991 the company was purchased by Royal Ordnance of Britain. In 2002 the company was sold to a combined group of European investors and long-time company managers.

HK4

This is a blowback-operated semi-automatic pistol based on the Mauser HSc design. It is chambered for.22 LR,.25 ACP,.32 ACP, and.380. These calibers were easily converted by switching the barrels, recoil springs and magazines. The rimfire

model could be changed by rotating the breechface. The conversion kits were available for all calibers. The barrel is 3" long; and the finish is blued, with molded plastic thumb rest grips. This pistol was sold from 1968-1973 as the Harrington & Richardson HK4 and is so marked. It was discontinued in 1984.

P9

This is a single-action, delayed-blowback semi-automatic pistol chambered for 9mm or 7.65mm Parabellum. The action is based on the G-3 rifle mechanism. The barrel is 4" in length, and the pistol has an internal hammer and a thumb-operated hammer drop and decocking lever. There is also a manual safety and a loaded-chamber indicator. The finish is Parkerized, and the grips are molded plastic and well contoured. It has fixed sights. This model was manufactured between 1977 and 1984. This model is rarer than the P9S model.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
800	650	500	400	300	200

P9S

This model is similar to the Model P9 except that the action features a double-action capability and it is chambered for the.45 ACP and the 9mm Parabellum with a 5.5" barrel. This model was also manufactured between 1977 and 1984.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
800	650	500	400	300	200

P9S Target Model

This version is similar to the Model P9S chambered for the 9mm or.45 ACP cartridges, with adjustable sights, and an adjustable trigger. It was discontinued in 1984.

VP 70Z

This is a blowback-operated semi-automatic chambered for the 9mm Parabellum cartridge. It is striker-fired and double-action-only. The barrel is 4.5" long, and the

double-column magazine holds 18 rounds. The finish is blued, and the receiver and grip are molded from plastic. This model was discontinued in 1984.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
550	450	350	300	250	200

P7 PSP

This was the first of the squeeze-cocked H&K pistols. It is a single-action semi-automatic that is placed in the firing position by pressure on the front of the grip strap. This moves the striker into battery; and firing is then accomplished by a single action pressure on the trigger, releasing the grip strap cocking device and decocking the mechanism. This particular model does not have the extended finger guard on the trigger and also does not have an ambidextrous safety. It was discontinued in 1984.

USP SERIES

NOTE: Late in 1999 H&K began shipping its USPs and Mark 23s with an internal locking system. This lock-out is installed in the grip and blocks the movement of the hammer, trigger, and slide. It is operated with a two pronged key, supplied with the pistol. This system is in addition to the traditional trigger lock that is sold with each H&K firearm. In 2001 the stainless steel version of these pistols was discontinued.In 2005 H&K offered a limited edition run of color frame variations for the USP line. These colors are Desert tan, green and gray. Gray: USP 45 and USP 40 CompactGreen: USP 45, USP 40, USP 40 Compact, and USP 45 TacticalDesert Tan: USP 45, USP 40, USP 40 Compact, and USP 45 Tactical and Mark 23Retail prices are the same for these color variations as the standard black frame pistols

USP 40

Introduced in 1993 this new semi-automatic H&K pistol features a new design that incorporates a short recoil modified Browning action. Chambered for the.40 S&W cartridge this model has a 4.13" barrel and a magazine capacity of 13 rounds. Stainless steel model introduced in 1996. It weighs 1.74 lbs. Available in seven different variations from traditional double-action to double-action-only and various safety locations and styles. These variants numbered by H&K are listed. 1.DA/SA with safe position and control lever on left side of frame.2.DA/SA with safe position and control lever on right side of frame.3.DA/SA without safe position and decocking lever on left side of frame.4.DA/SA without safe position and decocking lever on left side of frame.5.DA only with safe position and safety lever on left side of frame.6.DA only with safe position and safety lever on right side of frame.7.DA only without control lever.9.DA/SA with safe position and

safety lever on left side of frame.10.DA/SA with safety lever on the right side of frame.

HIGH STANDARD

New Haven, Connecticut 1932-1945
Hamden, Connecticut 1946-1977
East Hartford, Connecticut 1977-1984

NOTE: See High Standard Manufacturing Co., Houston, TX at the end of this semi-auto pistol section.

LETTER MODELS

Model B

A.22 LR caliber semi-automatic pistol with either a 4.5" or a 6.75" round barrel and a 10-shot magazine. Blued; came with checkered hard rubber grips (later production versions have checkered grips impressed with the High Standard monogram). Introduced 1932, with serial numbers beginning at 5000. Early production utilized Hartford parts. Approximately 65,000 made. Add $75 premium for Type-I-B takedown. Add a $75 premium for early models with Hartford Arms front sight, safety, and takedown levers. Box with papers add premium of 15

percent.C&R eligible. Most guns are found in serial number ranges from 5,000 to about 95,894 and 148198 to about 151021.

NIB Exc. V.G. Good Fair Poor

– 600 475 215 125 90

Model B-US

A version of the Model B with slight contour modifications to the back of the frame. Approximately 14,000 were made for the U.S. government in 1942-1943. Most are marked “PROPERTY OF U.S.” on the top of the barrel and on the right side of the frame. Monogrammed hard rubber grips. Most guns are found in serial number range 92344 to about 111631.

NIB Exc. V.G. Good Fair Poor

– 800 520 375 175 125

NOTE: Box with papers add premium of 20 percent.

Model C

Like the Model B except in.22 Short. Introduced 1936; approximately 4,700 made. Both plain and monogrammed hard rubber grips. Available with either a 4.5" or a 6.75" round barrel.

NIB Exc. V.G. Good Fair Poor

– 725 450 300 225 150

NOTE: Add $75 premium for I-A takedown. Add $175 premuim for I-B takedown. Box with papers add premium of 15 percent.

Model A

Similar to the Model B but with checkered walnut grips over an extended grip and an adjustable sight. Introduced 1938; approximately 7,300 made. Available with either a 4.5" or a 6.75" round barrel. The same light barrel as the Model B.

NIB Exc. V.G. Good Fair Poor

– 975 750 400 175 125

NOTE: Add $175 premium for I-B takedown. Box with papers add premium of 15 percent.

Model D

Similar to a Model A but with a heavier weight barrel. (The middle weight barrel.) Available with either a 4.5" or a 6.75" barrel and optional checkered walnut grips. Introduced 1938; approximately 2,500 made.

NIB Exc. V.G. Good Fair Poor

– 835 490 310 200 130

NOTE: Add $175 premium for I-B takedown. Box with papers add premium of 15 percent.

Model E

Like the Model D but with a still heavier weight barrel (the heavy weight barrel). Available with either a 4.5" or a 6.75" barrel. Checkered walnut grips with thumb rest. Introduced 1938; approximately 2,600 made.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1500	925	650	250	140

NOTE: Add $175 for I-B takedown. Box with papers add premium of 18 percent.

Model S

Not a production model. Like the model B but with a smooth bore. Nine registered as Model S. Additional five with Model C slides are registered, Model C/S. Note ivory bead front sight. Others may exist but only 14 are registered with BATF. Manufactured in 1939 and 1940. Values for both variations are equal. 6.75" barrels. **NOTE:** Serial numbers for registered samples.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	5250	3950	3000	–	–

Hammer Letter Models

Second models made. Like the letter models with external hammers.

MODEL H-B, TYPE 1 PRE-WAR

Like the Model B but with exposed hammer. Introduced 1940; approximately 2,100 made.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	725	425	275	175	125

NOTE: Box with papers add premium of 15 percent.

Model H-B, Type 2 Post-War

Post-war variation has an external safety. Approximately 25,000 made.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	550	375	225	150	100

NOTE: Box with papers add premium of 15 percent.

Model H-A

Like the Model A but with exposed hammer. Introduced 1940; approximately 1,040 made.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1600	1100	750	500	300

NOTE: Box with papers add premium of 15 percent.

Model H-D

Like the Model D but with exposed hammer. Introduced 1940; approximately 6,900 made.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1500	1000	650	400	250

NOTE: Box with papers add premium of 15 percent.

Model H-E

Like the Model E but with exposed hammer. Introduced 1940; approximately 2,100 made.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1800	950	700	275	150

NOTE: Box with papers add premium of 15 percent.

Model USA–Model HD

Similar to the Model HD but 4.5" barrel only. Had fixed sights, checkered black hard rubber grips and an external safety. Early models blued; later model Parkerized. Introduced 1943; approximately 44,000 produced for the U.S. government.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	800	625	450	225	125

NOTE: Box with papers add premium of 20 percent.

Model USA–Model HD-MS

A silenced variation of the USA Model HD. Approximately 2,000 produced for the OSS during 1944 and 1945. 6.75" shrouded barrel. Early models blued; later model Parkerized. Only a few registered with BATF for civilian ownership.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	6600	5500	–	–	–

Model H-D Military

Similar to the HD but with external safety. Early production had checkered plastic grips; later production changed to checkered walnut. Introduced 1945; approximately 150,000 produced.

NIB Exc. V.G. Good Fair Poor
600 450 275 200 125

NOTE: Box with papers add premium of 15 percent.

LEVER LETTER MODELS

Third design models which incorporate interchangeable barrels with a lever takedown.

G-.380

A.380 caliber semi-automatic pistol with a 5" barrel and 6-shot magazine. Blues with checkered plastic grips. Fixed sights. Introduced 1947, discontinued 1950; approximately 7,400 made. High Standard's only production centerfire pistol.

NIB Exc. V.G. Good Fair Poor

– 750 550 375 150 115

NOTE: Box with papers add premium of 10 percent.

G-B

Similar characteristics with the Model B but with interchangeable 4.5" or 6.75" barrels. Sold with either barrel or as a combination with both barrels. Fixed sights. Blued with monogrammed plastic grips. Last short frame model produced. Introduced 1949, discontinued 1950; approximately 4,900 produced.

NIB Exc. V.G. Good Fair Poor

– 575 350 250 135 100

NOTE: Box with papers add premium of 15 percent. Add $225 premium for factory

combination.

G-D

Similar characteristics with the Model D but with interchangeable 4.5" or 6.75" barrels. Sold with either barrel or as a combination with both barrels. Adjustable sights. Blued with checkered walnut grips. Optional checkered thumb rest walnut grips. Introduced 1949, discontinued 1950; approximately 3,300 produced.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	975	750	450	195	125

NOTE: Add $325 premium for factory combination, $50 premium for factory target grips. Box with papers add premium of 15 percent.

G-E

Similar characteristics with the Model E but with interchangeable 4.5" or 6.75" barrels. Sold with either barrel or as a combination with both barrels. Adjustable sights. Blued with checkered thumb rest walnut grips. Introduced 1949, discontinued 1950; approximately 2,900 produced.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1275	800	450	225	135

NOTE: Add $375 premium for factory combination. Box with papers add premium of 15 percent.

Olympic (commonly called "G-O")

New gun design for competitive shooting in.22 Short caliber. 4.5" or 6.75" barrels. Sold with either barrel or as a combination with both barrels. Grooved front and back straps on frame. Adjustable sights. Blued with checkered thumb rest walnut

grips. Introduced 1949, discontinued 1950; approximately 1,200 produced. This model uses a special curved magazine. A few guns will utilize a straight-back magazine. The majority of these Olympics use the curved magazine with a humped back.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1500	875	550	225	125

NOTE: Add $375 premium for factory combination. Box with papers add premium of 15 percent. Add $300 for the straight magazine variation.

LEVER NAME MODELS

Fourth design models evolving from the lever letter series designs with slight changes.

Supermatic

.22 LR caliber pistol with 10-shot magazine. Heavy round barrel, blued finish; adjustable sights and brown plastic thumb rest grips. Grooved front and back straps on frame. Available with 4.5" or 6.75" barrels or combination with both barrels. Ribbed barrels and provisions for weights. A 2 oz. and a 3 oz. weight were provided with this model, as was a filler strip for when the weights were not used.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	750	550	400	275	135

NOTE: Add $250 for factory combination. Box with papers add premium of 15 percent.

Olympic

.22 Short caliber pistol with 10-shot magazine. Heavy round barrel, blued finish, adjustable sights and brown plastic thumb rest grips. Grooved front and back straps on frame. Available with 4.5" or 6.75" barrels or combination with both barrels. Ribbed barrels and provisions for weights. Weights of 2 oz. and 3 oz. were provided with this model, as was a filler strip for when the weights were not used.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1000	750	575	275	150

NOTE: Add $250 for factory combination. Box with papers add premium of 15 percent.

Field King

.22 LR caliber pistol with 10-shot magazine. Heavy round barrel, blued finish, adjustable sights and brown plastic thumb rest grips. Available with 4.5" or 6.75" barrels or combination with both barrels. No rib on barrels or provisions for weights.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	575	380	250	150	125

NOTE: Add $225 premium for factory combination. Box with papers add premium of 15 percent.

Sport King

.22 caliber pistol with 10-shot magazine. Lightweight round barrel, blued finish, fixed sights and brown plastic thumb rest grips. Available with 4.5" or 6.75" barrels or combination with both barrels. Early models did not have a slide holdback when the magazine was empty. Early variation without holdback was produced in about

twice the quantity as the later models incorporating this feature.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	425	300	225	155	110

NOTE: Add $200 premium for factory combination. Box with papers add premium of 15 percent. Add a $25 premium for guns with holdback feature.

100 SERIES MODELS

Fifth design models evolving from the lever name series designs. This series introduced the small pushbutton barrel release takedown and deletes the shrouded breach.

Supermatic S-100

Like the lever takedown Supermatic but with new takedown. Available with 4.5", 6.75", or a combination with both barrel lengths. Grooved front and back straps on frame. This model produced briefly in 1954. Weights of 2 oz. and 3 oz. were provided with this model, as was a filler strip for when the weights were not used.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	825	600	400	175	125

NOTE: Add $250 for factory combination. Box with papers add premium of 15 percent.

Olympic O-100

Like the lever takedown Olympic but with new takedown. Available with 4.5", 6.75", or a combination with both barrel lengths. Grooved front and back straps on frame. This model produced briefly in 1954. Weights of 2 oz. and 3 oz. were provided with this model, as was a filler strip for when the weights were not used.

NIB Exc. V.G. Good Fair Poor

– 1250 700 475 250 135

NOTE: Add $250 for factory combination. Box with papers add premium of 15 percent.

Field King FK-100

Like the lever takedown Field King but with new takedown. Available with 4.5", 6.75", or a combination with both barrel lengths. This model produced briefly in 1954.

NIB Exc. V.G. Good Fair Poor

– 750 495 385 175 125

NOTE: Add $225 premium for factory combination. Box with papers add premium of 15 percent.

Sport King SK-100

Like the lever takedown Sport King but with new takedown. Available with 4.5", 6.75", or a combination with both barrel lengths. This model produced 1954 to 1957. In late 1958 Col. Rex Applegate imported about 300 of these pistols into Mexico. These guns are marked with his compay's name “ARMAMEX.” Marked “ARMAMEX, MEXICO” on the right side of the barrel and “SPORT KING/CAL.22 L.R.” on the left side of the barrel. Serial numbers around 870,084-870,383. Note that the Applegate guns were made after the 102 series was in production. Armamex catalog number 1910.

NIB Exc. V.G. Good Fair Poor

– 425 250 200 135 100

NOTE: Add $200 premium for factory combination. Add $250 premium for Armamex version. Box with papers add premium of 10 percent.

Sport King Lightweight SK-100

Aluminum frame like Flite King LW-100 but in.22 LR caliber. Produced 1956 to 1964. Also available nickel plated 1957 to 1960.

NIB Exc. V.G. Good Fair Poor

– 525 325 200 140 100

NOTE: Add $150 premium for nickel finish, $200 premium for factory combination. Box with papers add premium of 12 percent.

Flite King LW-100

.22 Short caliber semi-automatic pistol with 10-shot magazine. Blued finish with black anodized aluminum frame and slide. Brown plastic checkered thumb rest grips. Fixed sights. Available with 4.5", 6.75", or a combination with both barrel lengths. This model produced 1954 to 1957.

NIB Exc. V.G. Good Fair Poor

– 550 400 285 145 100

NOTE: Add $200 for factory combination. Box with papers add premium of 12 percent.

Dura-Matic M-100

.22 LR caliber semi-automatic pistol with 10-shot magazine. Striker-fired, fixed sights, blued finish, brown checkered plastic one-piece grip. Takedown by thumb nut. Available with 4.5", 6.5", or a combination with both barrel lengths. This model produced briefly in 1954.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	350	225	165	150	95

NOTE: Add $150 premium for factory combination. Box with papers add premium of 12 percent.

101 SERIES MODELS

Sixth design models evolving from the 100 series. This series continued the small pushbutton barrel release takedown.

Olympic O-101

A.22 Short caliber semi-automatic pistol with a 10-shot magazine. Heavy round barrel, blued finish, adjustable sights and brown plastic thumb rest grips. Grooved front and back straps on frame. Available with 4.5", 6.75", or a combination with both barrel lengths. The 6.75" barrel incorporates a muzzlebrake with one slot on either side of the front sight.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	950	600	450	200	175

NOTE: Add $250 premium for factory combination. Box with papers add premium of 13 percent.

Supermatic S-101

A.22 LR caliber semi-automatic pistol with a 10-shot magazine. Heavy round barrel, blued finish, adjustable sights and brown plastic thumb rest grips. Grooved front and back straps on frame. Available with 4.5", 6.75", or a combination with both barrel lengths. The 6.75" barrel incorporates a muzzlebrake with one slot on either side of the front sight. Also produced with U.S. marking for the military.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	775	475	360	190	130

NOTE: Add $250 premium for factory combination. Box with papers add premium

of 13 percent.

Field King FK-101

A.22 LR caliber semi-automatic pistol with a 10-shot magazine. Heavy round barrel, blued finish, adjustable sights and brown plastic thumb rest grips. Available with 4.5", 6.75", or a combination with both barrel lengths.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	625	475	360	175	125

NOTE: Add $225 premium for factory combination. Box with papers add premium of 15 percent.

Dura-Matic M-101

Like the Dura-matic M-100 with slightly different locking method for thumb nut takedown. Produced 1954 to 1970. Later appeared renamed "Plinker" M-101 in 1971 to 1973. Plinker not available with both barrel combinations. A slightly modified version was sold by Sears Roebuck & Co. as the J. C. Higgins M-80.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	350	225	140	110	80

NOTE: Add $150 premium for factory combination. Box with papers add premium of 10 percent.

Conversion Kits

These kits convert.22 LR to.22 Short and include a barrel, an aluminum slide, and magazine for.22 Short to.22 LR in which case the slide is steel. Prices are for the kit

in original factory boxes. **NOTE:** First advertised for 101 Series guns. Later, versions were produced for lever takedown guns. Catalog numbers unknown for conversion kits for lever takedown guns.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	600	475	–	–	–

102 & 103 SERIES MODELS

The 102 Series was a major design change incorporating a new frame with a large pushbutton takedown release. Also new was a superb adjustable sight. There is little difference between the two series.

Supermatic Trophy

A.22 LR caliber semi-automatic pistol with a 10-shot magazine. A tapered barrel with an enlarged register at the muzzle end to hold a removable muzzlebrake. Super polished blue finish; adjustable sights; 2 and 3 oz. adjustable weights and checkered walnut thumb rest grips. Grooved front and back straps on frame. Available with 6.75", 8" or 10" barrels. Occasionally sold as a combination including two barrels. Premiums for 10" barrels and combinations in original boxes. 5.5" bull barrel available in 103s after April 1962, 7.25" fluted barrels available in 103s after April 1963.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1100	775	525	200	120

NOTE: Add $125 premium for 8" barrel and $225 premium for 10" barrel. Box with papers add premium of 12 percent. Occasionally found with the optional light oak ca

Supermatic Citation

Like the Supermatic Trophy with checkered plastic grips. Blued finish without the trophy's super polished finish. Grooved front and back straps on frame. 5.5" bull barrel available in 103s after April 1962. Also produced with U.S. marking for the military.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	725	495	375	165	120

NOTE: Add $100 premium for 8" barrel and $200 premium for 10" barrel. Box with papers add premium of 12 percent. Occasionally found with optional light oak case, which will command a premium of about 18 percent.

Supermatic Tournament

A.22 LR caliber semi-automatic pistol with a 10-shot magazine. Barrels are round and tapered. Blued finish, adjustable sights and checkered plastic grips. Available with 4.5", 6.75", or a combination with both barrels. Combinations available in 102 Series only. 5.5" bull barrel replaced the 4.5" barrel in early 1962. Also produced with U.S. marking for the military.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	640	475	275	155	110

NOTE: Add $200 premium for factory combination. Box with papers add premium of 12 percent.

Olympic

A.22 Short caliber version of the Supermatic Citation. Early models marked "Olympic Citation," changed to "Olympic" only in 1960. Grooved front and back straps on frame. 6.75", 8" and 10" barrels produced. 5.5" bull barrel available on later 103 production.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1150	600	375	175	120

NOTE: Add $125 premium for 8" barrel and $225 premium for 10" barrel and $150 premium for "Olympic Citation" marked guns. Box with papers add premium of 12 percent.

Olympic ISU

Like an Olympic but only available with a 6.75" barrel with integral muzzlebrake. Grooved front and back straps on frame.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1150	675	360	165	120

NOTE: Box with papers add premium of 12 percent.

Olympic Trophy ISU

An Olympic ISU with a Supermatic Trophy finish. Grooved front and back straps on frame. Produced in the 103 Series only. Fewer than 500 produced.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2400	775	375	165	135

NOTE: Box with papers add premium of 10 percent.

Sport King

A.22 LR caliber semi-automatic pistol with a 10-shot magazine. Barrels are lightweight, round, and tapered. Blued finish; fixed sights and checkered plastic grips. Available with 4.5", 6.75", or a combination with both barrel lengths. Produced 1957 to 1970 and 1974 to 1977. Also available 1974 to 1977 with nickel finish. $100 premium for nickel finish and $200 premium for factory combination. **NOTE:** Box with papers add premium of 10 percent.

Flite King

A.22 Short caliber version of the Sport King Models 102 and 103. Note these models have steel frames.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	475	360	265	150	100

NOTE: Add $200 premium for factory combination. Box with papers add premium of 12 percent.

Sharpshooter

A.22 LR caliber semi-automatic pistol with a 10-shot magazine. 5.5" bull barrel, blued finish, adjustable sights, checkered plastic grips. Some produced with Model 103-marked slides. Although the 103-marked guns have 1969 and later serial numbers they were shipped after the introduction of the Sharpshooter in 1971 and were probably converted from unsold Sport Kings. No premium for 103-marked. Variation without series marked on slide is the most plentiful. Produced 1971 to 1977.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	500	325	265	154	110

NOTE: Box with papers add premium of 15 percent.

Conversion Kits

These kits convert.22 LR to.22 Short and include a barrel, an aluminum slide, and magazine. Prices are for kits in original boxes.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	900-700	575	–	–	–

104 SERIES MODELS

The last of the slant grip gun designs. The early production marked “Model 104.” Later production is unmarked.

Olympic

Like the 103 Series 8" barrel models.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1200	650	375	175	110

NOTE: Box with papers add premium of 12 percent.

Olympic ISU

Like the 103 model. 6.75" barrel with integral brake. 5.5" version introduced in 1964. Catalogs and price list refer to the 9295 as both Olympic and Olympic ISU. It met the ISU regulations and included a removable muzzlebrake and weights.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1100	625	360	175	110

NOTE: Box with papers add premium of 12 percent.

Victor

A.22 LR caliber semi-automatic pistol with a 10-shot magazine. 4.5" and 5.5" slab-sided barrels with either ventilated or solid ribs. The adjustable sights are integral with the rib. Blue finish, barrel tapped for weight, checkered walnut thumb rest grips. Grooved front and back straps on frame. Probably fewer than 600 of these slant grip Victors in all configurations. Probably fewer than 40 each of the 4.5" guns. Trigger is adjustable for both pull and over-travel. Most guns in serial number range above 2401xxx with a few in the ML serial number series. Note the early vent rib barrels were steel and later ones aluminum without a change in catalog numbers. BEWARE–fakes exist.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2750	1500	600	425	250

NOTE: Add $75 premium for steel rib, $200 premium for solid rib, and $200 premium for 4.5" barrel. Box with papers add premium of 15 percent.

106 SERIES MODELS

Referred to as military models, this series was designed to provide the same grip angles and feel of the Colt military model 1911. This design was introduced in 1965 and continued through most of 1968.

Supermatic Trophy

Like the 104 Series Supermatic Trophy with the new military frame. Stippled front and back straps on frame.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1000	600	425	190	120

NOTE: Add $100 premium for high polish blue finish, $200 premium for guns with boxes and accessories if factory records verify model numbers. Box with papers add premium of 12 percent.

Supermatic Citation

Like the 104 Series Supermatic Citation with the new military frame. Stippled front and back straps on frame.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	675	475	300	200	120

NOTE: Add $150 premium for guns with boxes and accessories if factory records verify model numbers. Box with papers add premium of 12 percent.

Supermatic Tournament

Like the 104 Series Supermatic Tournament with the new military frame. Stippled front and back straps on frame.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	600	375	250	165	120

NOTE: Add $125 premium for guns with boxes and accessories if factory records verify model numbers. Box with papers add premium of 12 percent.

Olympic

Listed in catalog but not in shipping records. Catalog number 9235 for 5.5" barrel.WARNING: There is no evidence that this model was actually produced.

Olympic ISU

Like the 104 Series Olympic ISU with the new military frame. Stippled front and back straps on frame.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1050	650	385	200	120

NOTE: Add $200 premium for guns with boxes and accessories if factory records verify model numbers. Box with papers add premium of 12 percent.

107 SERIES MODELS

The evolutionary successor to the 106 Series. This series had the frame redesigned to eliminate the plugging of the spring hole produced with the old tooling. During the time of this series production, the MILITARY marking on the frame was removed and then later reappeared near the end of the end of the traditional serial

number series. The MILITARY marking is absent from the guns with the ML prefixed serial numbers. There is no premium associated with these variations.

Olympic ISU

Like the 106 Series Olympic ISU.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1100	675	525	225	110

NOTE: Box with papers add premium of 12 percent.

Olympic ISU 1980 Commemorative

A limited edition of the 107 Olympic ISU with 1,000 produced. "USA" prefix on serial numbers from 0001 to 1000. Engraved, right side of slide has the five gold ring Olympic logo. Offered with lined presentation case.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1500	850	525	300	175

NOTE: Prices are for guns with box, papers, and presentation case; otherwise deduct $250 for guns in excellent condition.

Supermatic Trophy

Like the 106 Series Supermatic Trophy.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	925	550	360	200	120

NOTE: Box with papers add premium of 12 percent.

Supermatic Trophy 1972 Commemorative

A limited edition of the 107 Supermatic Trophy with 1000 planned. "T" prefix on serial numbers from 0000 to 999. Engraved, right side of slide has the five gold ring Olympic logo. Offered with lined presentation case. Only 107 guns listed in the shipping records, plus one frame. A couple of prototypes believed to exist in the regular serial number series. Prices are for guns in original presentation cases. **NOTE:** One fully engraved gun is known.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
6250	4500	–	–	–	–

Supermatic Citation

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	450	300	225	175	110

NOTE: Box with papers add premium of 12 percent.

Survival Kit

An electroless nickel Sharpshooter with 5.5" barrel in a canvas carrying case with an extra electroless nickel magazine.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	750	500	300	175	110

NOTE: Deduct $100 for guns without the case and $65 for guns without the extra magazine for guns in excellent condition.

Victor

A.22 LR caliber semi-automatic pistol with a 10-shot magazine. 4.5" and 5.5" slab-sided barrels with either ventilated or solid ribs. The adjustable sights are integral with the rib. Blue finish, barrel tapped for weight, checkered walnut thumb rest grips. Stippled front and back straps on frame. Early ventilated ribs were steel; aluminum replaced the steel on later ventilated ribs. Still later a clearance groove was added for spent shell ejection behind the barrel. Early models marked THE VICTOR on the left side of the barrel; later guns marked simply VICTOR on the left side of the frame. A few transition guns marked in both locations.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	775	500	350	200	120

NOTE: Add $125 premium for steel ribs, $125 premium for solid rib guns, premium for 4.5" barreled guns, $140 premium for Hamden guns (7-digit serial numbers and ML prefix serial numbers below ML 25,000). Box with papers add premium of 12 percent.

10-X

A.22 LR caliber semi-automatic pistol with a 10-shot magazine. Matte blue finish, adjustable sights, checkered walnut thumb rest grips painted black. Stippled front and back straps on frame. Available with 5.5" bull barrel. Assembled by a master gunsmith. Gunsmith's initials stamped in frame under left grip panel. Produced in 1981.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2750	1550	900	350	125

NOTE: Prices are for guns with box and papers including test target. Otherwise deduct $175.

SH SERIES MODELS

The final design produced by High Standard. A change in takedown from the large pushbutton introduced with the 102 Series and continuing through the 107 Series, to a hex socket head cap screw takedown.

Supermatic Trophy

Like the 107 Supermatic Trophy with a new takedown.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	600	375	275	165	120

NOTE: Box with papers add premium of 10 percent.

REVOLVERS

Police-Style Revolvers

The revolvers begin with the R-100 design series and continue through the R-109 design series. Later steel-framed Sentinels carry no design series markings. The changes of design series designations indicate design changes to the guns. The only R-105 known to date is a private label gun made for Sears. The design series designations and the associated catalog numbers listed are the best estimates at the time of publication.Earliest Sentinels in 1955 were in a seperate serial number series from 1 through approximately 45000. Then they were included in serial number series common to all handguns. In 1974 they were again put in a separate serial number series with an S prefix: S101 through S79946. Many of the later guns had a V suffix which indicated the gun was visually imperfect but guaranteed to work properly.

SENTINEL ALUMINUM FRAMES

A 9-shot single-action or double-action revolver with swing-out cylinder for.22 Short, Long, or LR cartridges. Fixed sights. The Sentinel snub 2.375" barrel model had a bobbed hammer from its introduction until 1960. Beginning in 1961 this changed to a standard spur hammer with no change in the catalog number. Beginning with R-102 series the ejector had a spring return. Available in configurations listed.High Standard private-labeled the aluminum-framed Sentinels for both Sears and Western Auto.From 1957 through 1962 High Standard offered the 2.375" snub-barreled Sentinel in three different color anodized frames. These guns had nickel-plated cylinders, triggers, and hammers. The grips were round-butt ivory-colored plastic.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	300	200	125	95	

NOTE: Add $20 premium for nickel. Deduct $15 for early models without spring return ejector.

Hombre

A nine shot single-action or double-action revolver for.22 Short, Long, or LR cartridges. Blue or nickel finish. Aluminum frame, 4" barrel, fixed sights and square-butt walnut grips.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	375	300	250	200	100

NOTE: Add $20 premium for nickel.

Durango

A nine-shot single- or double-action revolver for.22 Short, Long, or LR cartridges. Blue or nickel finish. Aluminum or steel frame, 4.5" or 5.5" barrel, fixed or adjustable sights and square-butt walnut grips. Two models have their grip straps and trigger guard with contrasting plating to the blue frame.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	375	300	250	200	100

NOTE: Add $20 premium for nickel. Add $25 premium for steel frame and $25 premium for adjustable sights.

BLACKPOWDER REVOLVERS

These guns were a series of.36 caliber cap-and-ball revolvers that began production in 1974 and ran through 1976. These are reproductions of the Confederate copies of the Colt Model 1851 Navy. Note most Confederate copies of the Colt had round barrels, not octagonal as found on Colts. The frames were made by High Standard and the balance of the parts by Uberti. The guns were assembled and finished by High Standard.

Griswold & Gunnison

Blued finish with a brass frame. Six-shot single-action. Commemorative gun came wtih a pine presentation case and a brass belt plate depicting the Georgia state seal.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	325	–	175	–	–

NOTE: Price is for gun in case with accessories. Deduct $100 for gun only in Exc. condition.

Leech & Rigdon

Blued finish with a steel frame. Six-shot single-action. Commemorative gun came with a presentation case and a reproduction of a Civil War belt buckle.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	325	235	175	–	–

NOTE: Price is for gun in case with accessories. Deduct $100 for gun only in Exc. condition.

Schneider & Glassick

Blued finish with a steel frame. Six-shot single-action. Commemorative gun came with a presentation case and a modern version of a Confederate “D” guard Bowie knife.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	450	235	175	–	–

Bicentennial 1776-1976

Blued finish with a steel frame. Six-shot single-action. Guns came with two versions of presentation case. One case is pine, marked High Standard and the trigger logo is on the lid with a powder flask and silver dollar-sized medallion inside. The other is a brown leatherette covered case with American Bicentennial 1776-1976 and

contains a pewter Bicentennial belt buckle.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	450	235	175	–	–

Special Presentation Bicentennial

100 guns were available in presentation cases with "US" serial number prefixes. Serial numbers US 11 through US 50 are in walnut presentation cases with purple fitted lining and a pewter Bicentennial belt buckle. The top of the case is marked "Limited Edition / American Bicentennial / 1776 – 1976." The guns are engraved on the frame, cylinder barrel, loading lever, and hammer. Catalog number 9339 has a steel frame with a round barrel and catalog number 9340 has a brass frame with an octagonal barrel.

HILLIARD, D. H.

Cornish, New Hampshire

Under Hammer Pistol

A.34 caliber under hammer percussion pistol with varying barrel lengths. Blued with walnut grips. Active 1842 to 1877.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	950	475	200	100

HINO-KOMURA

Tokyo, Japan

A 7.65mm or 8mm Nambu semi-automatic pistol manufactured in limited quantities between 1905 and 1912. The operation of this pistol involves pulling the muzzle forward until the slide engages a catch on the trigger assembly. Pulling the trigger at this point allows the barrel to move back and engage the cartridge nose into the chamber. Squeezing the grip safety then allows the barrel to slam back into the fixed firing pin on the breechblock. Prospective purchasers are advised to secure a qualified appraisal prior to acquisition.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3850	3600	3000	2250	1000

HOFFMAN, LOUIS

Vicksburg, Mississippi

Pocket Pistol

A.41 caliber percussion pocket pistol with a 3" barrel, German silver mounts and walnut stock. Active 1857 to 1886.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	900	525	200	100

HOLMES FIREARMS

Wheeler, Arkansas

MP-22

A.22 caliber semi-automatic pistol with a 6" barrel and alloy receiver. Anodized black finish with a walnut grip. Manufactured in 1985.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
425	325	250	200	150	100

MP-83

Similar to the above, but in 9mm or.45 caliber. Manufactured in 1985.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
550	425	325	250	200	125

NOTE: Several of the Holmes pistols have been declared machine guns by the BATF because of their easy conversion to full automatic. Make sure before purchase that a Class III license is not required.

HOOD F. A. CO.

Norwich, Connecticut

A manufacturer of spur trigger.22 or.32 caliber revolvers with varying length barrels and finishes. Many of these revolvers are found stamped only with trade names. This type of handgun is often referred to as a suicide special to denote its poor quality and lack of reliability.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*

L

LAGRESE

Paris, France

Lagrese Revolver

A large ornate revolver chambered for the.43 rimfire cartridge. It has a 6.25" barrel and a 6-shot fluted cylinder. This revolver has no top strap; and the frame, as well as the grip straps, are cast in one piece with the barrel screwed into the frame. It is loaded through a gate and has double-action lockwork. The outstanding feature about this well-made revolver is its extremely ornate appearance. There are more sweeps and curves than could be imagined and in general outline somewhat resmbles the leMat, though with a sisngle barrel. It is engraved and blued, with well-figured curved walnut grips. It is marked “Lagrese Bte a Paris” and was manufactured in the late 1860s.

LANCASTER, CHARLES

London, England

4 Barreled Pistol

A unique pistol for several reasons. It is chambered for the.476 rimfire cartridge and has four 6.25" barrels. The bore has a slightly twisted oval pattern that imparts a spin to the bullet. The barrels are hinged at the bottom and break downward for loading. It is a double-action type lockwork with a long, difficult trigger pull. The pistol is well made; and the caliber, suitably heavy to insure stopping power. The primary goal was military; and it was successful, seeing action in the Sudan campaigns of 1882 and 1885. This powerful weapon was also popular with big game hunters as a backup sidearm. The finish is blued, with checkered walnut grips. It is marked "Charles Lancaster (Patent) 151 New Bond St. London." This model was introduced in 1881. There are smaller-caliber versions of this pistol with shorter barrels. They are not as well known as the large-caliber version, and the values would be similar as their rarity would be balanced by the

desirability of the large bore models.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	8000	5750	2500	1500

2 Barreled Pistol

Similar to the 4 barreled version, with only two superposed barrels chambered for a variety of calibers from.320 to.577. It was also chambered for the 20 gauge and.410 bore shotshell. The advantage to the 2 barreled pistol is that it is lighter and better balanced. The 2 barrel is less common than the 4 barrel version.

LANG, J.

London, England

Percussion Pistol

Chambered for.60 caliber percussion. It is a single-barreled, muzzle-loading pistol with a 3.25" barrel. This is essentially a defensive weapon that was well made, with Damascus barrels and an ornate engraved hammer and frame.

NIB Exc. V.G. Good Fair Poor

Gas Seal Revolver

Chambered for the.42 caliber percussion and has a 4.75" barrel. The unfluted cylinder holds 6 shots and is spring-loaded to be forced into the barrel when cocked, in order to obtain the “Gas Seal” feature desired. This revolver was well made and finished. It is lightly engraved, with a case-colored cylinder and a blued barrel and frame. The grips are finely checkered walnut, and the markings are “J.Lang 22 Cockspur St. London.” This type of firearm was the forerunner of later designs such as the Russian Nagant. This revolver was manufactured in the 1850s.

LANGENHAN, FRIEDRICH

Zella Mehlis, Germany

Langenhan Army Model

A blowback-operated semi-automatic pistol chambered for the 7.65mm Auto Pistol cartridge. It has a 4" barrel and a detachable magazine that holds 8 rounds. Weight is about 24 oz. The pistol was made with a separate breechblock that is held into the slide by a screw. This feature doomed this pistol to eventual failure as when this screw became worn, it could loosen when firing and allow the breechblock to pivot upwards–and the slide would then be propelled rearward and into the face of the shooter. This pistol was produced with wood grips.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	375	300	250	175	100

Langenhan Open Model

A semi-automatic pistol that is similar to the Army Model with some minor variations, and an open window in the frame. Checkered hard rubber grips with “FL” logo on each side.

Model 2

A blowback-operated semi-automatic pistol chambered for the 6.35mm cartridge. It has a 3" barrel and an 8-round detachable magazine. Weight is about 18 oz. The pistol fires by means of a concealed hammer, and the breechblock is separate from the rest of the slide and is held in place by a heavy crossbolt. The finish is blued, and the grips are molded checkered black plastic with the monogram “F.L.” at the top. The slide is marked “Langenhan 6.35.” This model was manufactured between 1921 and 1936.

Courtesy James Rankin

LE MAT

Paris, France

LeMat

Has a somewhat unique background that makes it a bit controversial among collectors. It is a foreign-made firearm manufactured in Paris, France, as well as in Birmingham, England. It was designed and patented by an American, Jean Alexander Le Mat of New Orleans, Louisiana; and it was purchased for use by the Confederate States of America and used in the Civil War. This is a curious firearm as it is a huge weapon that has two barrels. The top 6.5" barrel is chambered for.42 caliber percussion and is supplied by a 9-shot unfluted cylinder that revolves on a 5",.63 caliber, smoothbore barrel that doubles as the cylinder axis pin. These two barrels are held together by a front and a rear ring. The rear sight is a notch in the nose of the hammer, and there is an attached ramrod on the side of the top barrel. The weapon is marked “Lemat and Girards Patent, London.” The finish is blued, with checkered walnut grips. There were fewer than 3,000 manufactured, of which approximately one-half were purchased by the Confederate States of America. They were made between 1856 and 1865.

Courtesy Milwaukee Public Museum, Milwaukee, Wisconsin

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	30000	25000	7500	1750

Baby LeMat

Similar in appearance (though a good deal smaller in size) to the standard model pistol. It is chambered for.32 caliber percussion and has a 4.25" top barrel and a.41 caliber smoothbore lower barrel. The cylinder is unfluted and holds 9 shots. The barrel is marked “Systeme Le Mat Bte s.g.d.g. Paris.” It has British proofmarks and is blued, with checkered walnut grips. This is the scarcest model Le Mat, as there were only an estimated 100 manufactured and used by the Confederate States of America in the Civil War.

– – 28500 22000 1100 3300

LE PAGE SA.

Liege, Belgium

Pinfire Revolver

This company was in the business of revolver manufacture in the 1850s, producing a.40 caliber pinfire revolver that was similar to the Lefauchaux and other pinfires of the day. The barrel lengths vary, and the unfluted cylinder holds 6 shots. These pistols are double-action and are sometimes found with ornate, but somewhat crude engraving. The finish is blued, with wood grips. The quality of these weapons is fair. They were serviceable; but the ammunition created somewhat of a problem, as it is rather fragile and difficult to handle with the protruding primer pin to contend with.

LEECH & RIGDON

Greensboro, Georgia

Leech & Rigdon Revolver

This Confederate revolver was patterned after the 1851 Colt Navy. It is chambered for.36 caliber percussion and has a 6-shot unfluted cylinder. The 7.5" barrel is part-octagonal and has a loading lever beneath it. The frame is open-topped; and the finish is blued, with brass grip straps and walnut one-piece grips. The barrel is marked “Leech & Rigdon CSA.” There were approximately 1,500 revolvers manufactured in 1863 and 1864. These were all contracted for by the Confederacy and are considered to be a prime acquisition for collectors. Beware of fakes!

LEFAUCHAUX, CASIMER & EUGENE

Paris, France

Pinfire Revolver

The pinfire ignition system was invented by Casimir Lefauchaux in 1828 but was not widely used until the 1850s. It consists of a smooth rimless case that contains the powder charge and a percussion cap. A pin protrudes from the side of this case at the rear and when struck by the hammer is driven into the cap, thereby igniting the charge and firing the weapon. The pistols for this cartridge are slotted at the

end of the cylinder to allow the pins to protrude and be struck by the downward blow of the hammer. This particular revolver is chambered for.43 caliber and has a 5.25" barrel. The cylinder holds 6 shots; and the finish is blued, with checkered walnut grips. This revolver was manufactured after 1865 and was selected for service by the French military.

Einhand Model 2A

This unique design resembled the Swiss Chylewski. It allows the shooter to cock

and fire this blowback-operated semi-automatic pistol with one hand (Einhand). It is chambered for the 6.35mm cartridge and has a 2" barrel. The magazine holds 6 shots, and the finish is blued, with molded horn grips marked “Lignose.” The trigger guard on this pistol has a reverse curve that fits the finger, and it moves backward to cock the slide. The short-grip model without the Einhard feature was the Model 2; the long grip model without the Einhand was the Model 3. The first 9,000 to 10,000 examples (all four variations serial numbered in the same series) were marketed under the Bergmann name; only later Lignose. It was manufactured in the early 1920s by the Bergman Company, but the firm was merged with Lignose under whose name it was produced.

LINDE A.

Memphis, Tennessee

Pocket Pistol

This company manufactured a small, concealable firearm patterned after the Henry Deringer Philadelphia-type pistol. It is chambered for.41 caliber percussion and has a 2.5" barrel, German silver mountings, and a walnut stock. It was manufactured in the 1850s.

LINDSAY, JOHN P.

Naugatuck, Connecticut
Union Knife Company

The Union Knife Company manufactured the Lindsay 2-shot pistols for the inventor, John P. Lindsay. There are three separate and distinct models listed.

2 Shot Belt Pistol

An oddity. It is a single-barreled,.41 caliber percussion pistol with a double chamber that contains two powder charges and projectiles that are simultaneously fired by two separate hammers. The hammers are released by a single trigger that allows them to fall in the proper sequence. The 5.5" octagonal barrel is contoured into a radical stepped-down shape, and there is a spur trigger. The frame is brass and has scroll engraving. The barrel is blued and is marked “Lindsay's Young America.” There were estimated to be fewer than 100 manufactured between 1860 and 1862.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	4400	1500	700	300

2 Shot Pocket Pistol

A smaller version of the Belt Pistol. It is chambered for the same caliber but has a 4" barrel. There were approximately 200 manufactured between 1860 and 1862.

Courtesy W. P. Hallstein III and son Chip

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3500	3000	1100	400

2 Shot Martial Pistol

A large version of the Lindsay design. It is chambered for.45 caliber smoothbore and has an 8.5" part-round, part-octagonal barrel. In other respects it is similar to the smaller models. The inventor tried to sell this pistol to the government but was unsuccessful. It was estimated that there were 100 manufactured between 1860 and 1862.

LLAMA

Manufactured by
Gabilondo y Cia
Vitoria, Spain

This is the same firm that was founded in 1904 and produced several inexpensive revolvers and pistols prior to 1931. In 1931 the company began to produce a semi-automatic pistol based on the Colt Model 1911. They were of high quality and have been sold around the world. After the Spanish civil war the company moved its facilities to Vitoria, Spain, where it continued to build handguns under the Llama trade name. In the 1980s the firm introduced a new line of pistols that were more modern in design and function. The Llama pistol is still produced today. For Llama pistols built prior to 1936 the slide marking reads: "GABILONDO Y CIA ELOEIBAR (ESPANA) CAL 9MM/.380IN LLAMA." For pistols built after 1936 the slide marking reads: "LLAMA GABILONDO Y CIA ELOEIBAR (ESPANA) CAL 9MM.380." Current production Llama pistols will show a slide marking with either "LLAMA CAL..." or "GABILONDO Y CIA VITORIA (ESPANA)" and the Llama logo. "Llama" is now a trade name for handguns manufactured by Bersa of Argentina.

LLAMA SEMI-AUTOMATICS

Model I-A

This is a 7.65mm blowback design introduced in 1933. Magazine capacity is 7 rounds. The barrel was 3.62", overall length 6.3", and weight about 19 oz.

NIB Exc. V.G. Good Fair Poor

– 275 225 125 100 75

Model II

Chambered for the 9mm Short introduced in the same year. Identical to the Model I. Discontinued in 1936.

NIB Exc. V.G. Good Fair Poor

– 265 200 150 125 100

Model III

An improved version of the Model II. Introduced in 1936 and discontinued in 1954.

NIB Exc. V.G. Good Fair Poor

– 275 225 175 125 100

Model III-A

Similar to the Model III, chambered for the.380 ACP, but with the addition of the Colt-type grip safety. Introduced in 1955. Weight is about 23 oz.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	300	250	195	125	100

Model IV

Chambered for the 9mm Largo or.380 ACP. Is not fitted with a grip safety. Introduced in 1931, it is the first of the Llama designs.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	275	225	175	125	100

Model V

The same as the Model IV but was intended for export to the United States and is stamped “made in Spain” on the slide.

–	275	225	175	125	100

Model VI

Chambered for the 9mm Short and without a grip safety.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	275	225	175	125	100

Model VII

Introduced in 1932 and manufactured until 1954. Chambered for the.38 Auto cartridge. It does not have a grip safety.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	400	300	225	150	100

Model VIII

This model was introduced in 1955 and is chambered for the.45 ACP,.38 Auto, or 9mm Largo. It is fitted with a grip safety. Barrel length is 5", overall length is 8.5", and weight is about 38 oz. Magazine capacity is 7 rounds.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	400	300	225	150	100

NOTE: Many of these pistols are marked ".38." It is unclear whether these pistols were intended for use with the.38 Super cartridge or with the milder.38 Auto. We do not recommend full-house Super loadings in these pistols.

Model IX

Chambered for the 7.65mm Para, 9mm Largo, or.45 ACP, this model has a locked breech with no grip safety. Built from 1936 to 1954.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	400	300	200	150	100

Model IX-A

This version of the Model IX is fitted with a grip safety. Current production models are chambered for the.45 ACP only. Weighs about 30 oz. with 5" barrel.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	400	300	200	150	100

Model IX-B

This version of the Model IX series is chambered in.45 ACP. It is fitted with an extended slide release, black plastic grips, and target-type hammer. Offered in blue or satin chrome finish.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
400	300	250	175	125	100

Model IX-C

This is the last large-frame version of the Model IX. It is chambered for the.45 ACP and is fitted with a 5.125" barrel. Blade front sight with adjustable rear sight. Magazine capacity is 10 rounds. Weight is approximately 41 oz.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
400	300	250	200	150	100

Model IX-D

This model is a compact frame version with a 4.25" barrel and chambered for the.45 ACP cartridge. Stocks are black rubber. Fixed front sight with adjustable rear. Introduced in 1995. Magazine capacity is 10 rounds. Weight is about 39 oz.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
450	350	250	200	150	100

Model X

First produced in 1935, this model is chambered for the 7.65mm cartridge. It has no grip safety.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	295	225	150	100	75

Model X-A

This version is similar to the Model X but with a grip safety. Produced from 1954 to the present.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	300	225	150	100	75

Model XI

Chambered for the 9mm Parabellum cartridge this model is different from previous models with a longer curved butt, ring hammer, and vertically grooved walnut grips. Magazine capacity is 9 rounds. Barrel length is 5". Discontinued in 1954.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	350	300	250	175	125

Model XI-B

Similar to the Model XI but with a spur hammer and shorter barrel.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
400	375	275	150	100	75

Model XII-B

This model is chambered for the.40 S&W cartridge. It has a compact frame.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
400	375	275	150	100	75

Model XV

Chambered for the.22 Long Rifle this model is marked “Especial.” It is fitted with a grip safety and comes in several finishes and with different grip styles. The barrel length is 3.6", the overall length is 6.5", and the weight is about 17 oz.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	325	275	195	125	100

Model XVI

This is a deluxe version of the Model XV with engraving, ventilated rib, and adjustable sights.

Mugica

Eibar gun dealer Jose Mugica sold Llama pistols under his private trade name. They are marked "mugica-ebir-spain" on the slide. These pistols do not seem to have any additional value over and above their respective Llama models. For the sake of clarification the Mugica models are listed with their Llama counterparts:

Mugica Model 101	Llama Model X
Mugica Model 101-G	Llama Model X-A
Mugica Model 105	Llama Model III
Mugica Model 105-G	Llama Model III-A
Mugica Model 110	Llama Model VII
Mugica Model 110-G	Llama Model VIII
Mugica Model 120	Llama Model XI

Tauler

In an arrangement similar to Mugica a gun dealer in Madrid sold Llama pistols under his own brand name. Most of these pistols were sold in the early 1930s to police and other government officials. The most common Llama models were Models I to VIII. Slide inscriptions were in English and had the name Tauler in them. No additional value is attached to this private trademark.

REVOLVERS

Ruby Extra Models

These revolvers were produced in the 1950s and were copies of Smith & Wessons.

They were marked “RUBY EXTRA” on the left side of the frame. At the top of the grips was a Ruby medallion. The barrel address is stamped: gabilondo y cia elgoeibar espana. The Ruby Extra Models represent the company's attempts to produce and sell a low-cost revolver.

Model XII

This model is chambered for the.38 Long cartridge and is fitted with a 5" barrel and a squared butt.

LUGERS

Various Manufacturers

Just before the turn of the 20th century, Georg Luger redesigned the Borchardt semi-automatic pistol so that its mainspring was housed in the rear of the grip. The resulting pistol was to prove extremely successful and his name has become synonymous with the pistol despite the fact his name never appeared on it.These companies manufactured Luger pattern pistols at various times.

1. DWM - Deutsch Waffen und Munitions - Karlsruhe, Germany
2. The Royal Arsenal of Erfurt Germany
3. Simson & Company - Suhl, Germany
4. Mauser - Oberndorf, Germany
5. Vickers Ltd. - England
6. Waffenfabrik Bern - Bern, Switzerland
7. Heinrich Krieghoff - Suhl, Germany

Those interested in these pistols are advised to read the various books written about the marque which are listed in the bibliography at the close of this book.

DEUTSCH WAFFEN UND MUNITIONS

1899/1900 Swiss Test Model

4.75" barrel, 7.65mm caliber. The Swiss Cross in Sunburst is stamped over the chamber. The serial range runs to three digits. With fewer than 100 manufactured and only one known to exist, it is one of the rarest of the Lugers and the first true Luger that was produced. This model is far too rare to estimate an accurate value.

1900 Swiss Contract

4.75" barrel, 7.65mm caliber. The Swiss Cross in Sunburst is stamped over the chamber. The military serial number range is 2001-5000; the commercial range, 01-21250. There were approximately 2,000 commercial and 3,000 military models manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	8000	6750	4000	1500	1000

NOTE: Wide trigger add 20 percent.

1900 Commercial

4.75" barrel, 7.65mm caliber. The area above the chamber is blank. The serial range is 01-19000, and there were approximately 5,500 manufactured for commercial sale in Germany or other countries. Some have “Germany” stamped on the frame. These pistols were imported into the U.S., and some were even stamped after blueing.

Courtesy Gale Morgan

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	8500	7250	3000	1000	650

1900 American Eagle

4.75" barrel, 7.65mm caliber. The American Eagle crest is stamped over the chamber. The serial range is between 2000-200000, and there were approximately 11,000-12,000 commercial models marked “Germany” and 1,000 military test models without the commercial import stamp. The serial numbers of this military lot have been estimated at between 6100-7100.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	6000	4200	1500	850	600

1900 Bulgarian Contract

An old model, 1900 Type, with no stock lug. It has a 4.75" barrel and is chambered for the 7.65mm cartridge. The Bulgarian crest is stamped over the chamber, and the safety is marked in Bulgarian letters. The serial range is 20000-21000, with 1,000 manufactured. This is a military test model and is quite rare as most were rebarreled to 9mm during the time they were used. Even with the 9mm versions,

approximately 10 are known to exist. It was the only variation to feature a marked safety before 1904.

Courtesy Gale Morgan

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	12500	8500	4000	2500	1800

1902 Prototype

6" barrel, 7.65mm caliber. The serial numbers are in the 10000 range with a capital B, and the chamber is blank. The 6" barrel is of a heavy contour, and there were less than 10 manufactured. The rarity of this variation precludes estimating value.

1902 Commercial–"Fat Barrel"

Thick 4" barrel, 9mm caliber. The area above the chamber is blank. It is chambered for the 9mm cartridge, and the serial numbers fall within the 22300-22400 and the 22900-23500 range. There were approximately 600 manufactured, and the greater part of those noted were marked "Germany" for export purposes.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	12500	9500	6000	4000	1500

1902 American Eagle

As above, with an American Eagle stamped over the chamber. It is chambered for the 9mm cartridge, and the serial numbers fall within the 22100-22300 and the 22450-22900 range. This model was solely intended for export sales in the U.S.A., and all are marked "Germany" on the frame. There were approximately 700 manufactured.

–	7000	4250	1500	800	600

1906 Royal Portuguese Navy

4" barrel, 9mm caliber, and has no stock lug. The Royal Portuguese Naval crest, an anchor under a crown, is stamped above the chamber. The extractor is marked “CARREGADA” on the left side. The frame under the safety is polished. There were approximately 1,000 manufactured with one- to four-digit serial numbers.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	12500	9500	6500	4000	2500

1906 Royal Portuguese Army (M2)

4.75" barrel, 7.65mm caliber. It has no stock lug. The chamber area has the Royal Portuguese crest of Mannuel II stamped upon it. The extractor is marked “CARREGADA.” There were approximately 5,000 manufactured, with one- to four-digit serial numbers.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	4000	3200	1200	600	500

1906 Republic of Portugal Navy

4" barrel, 9mm caliber. It has no stock lug, and the extractor was marked "CARREGADA." This model was made after 1910, when Portugal had become a republic. The anchor on the chamber is under the letters "R.P." There were approximately 1,000 manufactured, with one- to four-digit serial numbers.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	11500	9500	5500	2500	1500

1906 Brazilian Contract

4.75" barrel, 7.65mm caliber. It has no stock lug, and chamber area is blank. The extractor is marked "CARREGADA," and the frame under the safety is polished. There were approximately 5,000 manufactured for military sales to Brazil.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3750	2900	1100	750	450

1906 Bulgarian Contract

4.75" barrel, 7.65mm caliber. It has no stock lug, and the extractor and safety are marked in cyrillic letters. The Bulgarian crest is stamped above the chamber. Nearly all of the examples located have the barrels replaced with 4" 9mm units. This was done after the later 1908 model was adopted. Some were refurbished during the Nazi era, and these pistols bear Waffenamts and usually mismatched parts. There were approximately 1,500 manufactured, with serial numbers of one- to four-digits.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	10000	7500	5000	3500	1500

1906 Russian Contract

4" barrel, 9mm caliber. It has no stock lug, and the extractor and safety are marked with cyrillic letters. Crossed Nagant rifles are stamped over the chamber. There were approximately 1,000 manufactured, with one- to four-digit serial numbers; but few survive. This is an extremely rare variation, and caution should be exercised if purchase is contemplated.

– 7000 4500 2500 1200 700

1908 Commercial

4" barrel, 9mm caliber. It has no stock lug, and the chamber area is blank. The extractor and the safety are both marked in German, and many examples are marked with the “Germany” export stamp. There were approximately 9,000 manufactured in the 39000-71500 serial number range.

NIB Exc. V.G. Good Fair Poor

– 5000 3500 750 600 450

1908 Navy Commercial

6" barrel, 9mm caliber. It has a stock lug, no grip safety, and the characteristic two-position sliding sight mounted on the rear toggle link. The chamber area is blank, and the safety and extractor are both marked. The “Germany” export stamp appears on some examples. There were approximately 1,500 manufactured, in the 44000-50000 serial number range.

NIB Exc. V.G. Good Fair Poor

– 6100 5200 2500 1750 1250

1908 Navy

As above, with the “Crown M” military proof. They may or may not have the concentric rings on the magazine bottom. There were approximately 40,000 manufactured, with one- to five-digit serial numbers with an “a” or “b” suffix. These Lugers are quite scarce as many were destroyed during and after WWI.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	5150	3700	2000	1100	800

1914 Navy

Similar to the above, but stamped with the dates from 1914-1918 above the chamber. Most noted are dated 1916-1918. There were approximately 30,000 manufactured, with one- to five-digit serial numbers with an “a” or “b” suffix. They are scarce as many were destroyed as a result of WWI.Buyer Caution: Many counterfeit pistols reported.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	5500	3500	1580	950	700

1908 Military 1st Issue

4" barrel, 9mm caliber. It has no stock lug, and the extractor and safety are both marked in German. The chamber is blank. There were approximately 20,000 manufactured, with one- to five-digit serial numbers–some with an “a” suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2500	1500	600	500	350

1908 Military Dated Chamber (1910-1913)

As above, with the date of manufacture stamped on the chamber.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1700	1100	600	500	350

1913 Commercial

As above, with a grip safety. Approximately 1,000 manufactured, with serial numbers 71000-72000; but few have been noted, and it is considered to be quite rare.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3200	2200	1300	850	600

1914 Military

As above, with a stock lug.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2500	1700	600	500	350

NOTE: Add 50 percent to a 1914 dated chamber without a stock lug.

1914 Artillery

8" barrel, 9mm caliber. It features a nine-position adjustable sight that has a base that is an integral part of the barrel. This model has a stock lug and was furnished with a military-style flat board stock and holster rig (see Accessories). The chamber is dated from 1914-1918, and the safety and extractor are both marked. This model was developed for artillery and machine gun crews; and many thousands were manufactured, with one- to five-digit serial numbers–some have letter suffixes. This model is quite desirable from a collector's standpoint and is rarer than its production figures would indicate. After the war many were destroyed as the allies deemed them more insidious than other models, for some reason.

Courtesy Gale Morgan

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	13500	8000	4300	1900	900

NOTE: For models stamped with 1914 date add 75 percent.

DWM Double Dated

4" barrel, 9mm cartridge. The date 1920 or 1921 is stamped over the original chamber date of 1910-1918, creating the double-date nomenclature. These are arsenal-reworked WWI military pistols and were then issued to the German military and/or police units within the provisions of the Treaty of Versailles. Many thousands of these Lugers were produced.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1800	1000	550	400	300

1920 Police Rework

As above, except that the original manufacture date was removed before the rework date was stamped. There were many thousands of these produced.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	900	750	500	350	300

1920 Commercial

Similar to the above, with 3.5" to 6" barrels in 7.65mm or 9mm and marked “Germany” or “Made in Germany” for export. Others are unmarked and were produced for commercial sale inside Germany. Some of these pistols are military reworks with the markings and the proofmarks removed; others were newly manufactured. The extractors and safety are both marked, and the chamber is blank. The serial number range is one to five digits, and letter suffixes often appear.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2200	1400	950	450	350

NOTE: Add 15 percent for 9mm.

1920 Commercial Navy

6" barrel, 9mm caliber. Some have a stock lug; others have been noted without. The chamber area is generally blank, but some have been found with 1914-1918 dates stamped upon them. These were reworked by DWM from Military Navy Lugers after WWI for commercial sales. They are marked “Germany” or “Made in Germany” and were sold by Stoeger Arms, among others. The extractor and safety are both marked, and the unique Navy sight is on the rear toggle link. No one knows exactly how many were produced, but they are quite scarce.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	7000	3500	2100	1100	850

1920 Commercial Artillery

8" barrel, 9mm caliber. Erfurt-manufactured pistols, as well as DWM-manufactured pistols, were reworked in this manner. The export markings “Germany” or “Made in Germany” are found on most examples. The number produced is not known, but examples are quite scarce.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	5000	3000	1100	700	450

1920 Long Barrel Commercial

10" to 24" barrels, 7.65mm or 9mm caliber. The extractor and safety are both marked, and an artillery model rear sight is used. This model was often built to a customer's specifications. They are rare, and the number manufactured is not known.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*

– 5000 3450 1500 1000 800

1920 Carbine

11.75" barrel, 7.65mm caliber. The chamber is blank, and the extractor is marked either “Geleden” or “Loaded.” The safety is not-marked. The carbine has a checkered walnut forearm and stock, and most have the “Germany” or “Made in Germany” export stamp. There were few of these carbines manufactured for commercial sales in and outside of Germany.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	18500	10500	5000	2500	1500

NOTE: With stock add 25 percent.

1920 Navy Carbine

Assembled from surplus Navy parts with the distinctive two position, sliding navy sight on the rear toggle link. Most are marked with the export stamp and have the naval military proofmarks still in evidence. The safety and extractor are marked, and rarely one is found chambered for the 9mm cartridge. Few were manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	19500	11000	5250	3000	1700

1920 Swiss Commercial

3.5"-6" barrels, 7.65mm or 9mm caliber. The Swiss Cross in Sunburst is stamped over the chamber, and the extractor is marked “Geladen.” The frame under the safety is polished. There were a few thousand produced, with serial numbers in the one- to five-digit range, sometimes with a letter suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	5000	3500	1600	1000	800

1923 Stoeger Commercial

3.5" to 24" barrels, 7.65mm or 9mm caliber. There is a stock lug. The chamber area is either blank or has the American Eagle stamped on it. The export stamp and “A.F.Stoeger Inc. New York” is found on the right side of the receiver. The extractor and safety are marked in German or English. This was the model that Stoeger registered with the U.S. Patent office to secure the Luger name, and some examples will be so marked. There were less than 1,000 manufactured, with one- to five-digit serial numbers without a letter suffix. Individual appraisal must be secured on barrel lengths above 6". Be wary as fakes have been noted. The values given here are for the shorter barreled models.

– 3200 2200 1000 800 500

1923 Dutch Commercial & Military

4" barrel, 9mm caliber. It has a stock lug, and the chamber area is blank. The extractor is marked in German, and the safety is marked “RUST” with a downward pointing arrow. This model was sold commercially and to the military in the Netherlands. There were approximately 1,000 manufactured in the one- to three-digit serial range, with no letter suffix.

VICKERS LTD.

NOTE: Vickers was not a manufacturer but an intermediary marketer.

1906 Vickers Dutch

4" barrel, 9mm caliber. There is no stock lug, and it uses a grip safety. The chamber is blank, and the extractor is marked “Geleden.” “Vickers Ltd.” is stamped on the front toggle link. The safety is marked “RUST” with an upward pointing arrow. Examples have been found with an additional date as late as 1933 stamped on the barrel. These dates indicate arsenal refinishing and in no way detract from the value of this variation. Arsenal reworks are matte-finished, and the originals are a higher-polished rust blue. There were approximately 10,000 manufactured in the 1-10100 serial-number range.

–	3800	3000	1800	1200	750

ERFURT ROYAL ARSENAL

1908 Erfurt

4" barrel, 9mm caliber. It has no stock lug; and the year of manufacture, from 1910-1913, is stamped above the chamber. The extractor and safety are both marked in German, and “ERFURT” under a crown is stamped on the front toggle link. There were many thousands produced as Germany was involved in WWI. They are found in the one- to five-digit serial range, sometimes with a letter suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2100	1350	600	400	350

1914 Erfurt Military

4" barrel, 9mm caliber. It has a stock lug and the date of manufacture over the chamber, 1914-1918. The extractor and safety are both marked in German, and the front link is marked “ERFURT” under a crown. The finish on this model is rough; and as the war progressed in 1917 and 1918, the finish got worse. There were many thousands produced with one- to five-digit serial numbers, some with letter suffixes.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1300	950	600	400	350

1914 Erfurt Artillery

8" barrel, 9mm caliber. It has a stock lug and was issued with a flat board-type stock and other accessories which will be covered in the section of this book dealing with same. The sight is a nine-position adjustable model. The chamber is dated 1914-1918, and the extractor and safety are both marked in German. “ERFURT” under a crown is stamped on the front toggle link. There were a great many manufactured with one- to five-digit serial numbers, some with a letter suffix. This model is similar to the DWM Artillery except that the finish is not as fine.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3400	2200	1100	800	600

NOTE: Add 50 percent for 1914 dated chamber.

Double Date Erfurt

4" barrel, 9mm caliber. The area above the chamber has two dates: the original 1910-1918, and the date of rework, 1920 or 1921. The extractor and safety are both marked in German, and this model can be found with or without a stock lug. “ERFURT” under a crown is stamped on the front toggle link. Police or military unit markings are found on the front of the grip straps more often than not. There were thousands of these produced by DWM as well as Erfurt.

SIMSON & CO. SUHL, GERMANY

Note: Simson was the official rework firm for the German army. Thanks to Edward Tinker for his contributions to this section.

Simson & Co. Rework

4" barrels, 9mm caliber. The chamber is blank, but some examples are dated 1917 or 1918. The forward toggle link is stamped “SIMSON & CO. Suhl.” The extractor and safety are marked in German. Most examples have stock lugs; some have been noted without them. The only difference between military models and commercial models is the proofmarks.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2500	1650	900	600	500

Simson Grip Safety Rework

4" barrel, 9mm caliber and a grip safety was added. There is a stock lug. The chamber area is blank; the extractor is marked but the safety is not. There were only a few of these commercial reworks manufactured, and caution should be taken to avoid fakes.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3700	2600	1500	850	550

Simson Dated Military

4" barrel, 9mm caliber. There is a stock lug, and the year of manufacture from 1925-1926 is stamped above the chamber (below serial number 700). The extractor and the safety are both marked in German. The checkered walnut grips of Simson-made Lugers are noticeably thicker than others. This is an extremely rare variation. Approximately 2,000 were manufactured with one- to three-digit serial numbers, and few seem to have survived.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3600	2600	1800	900	650

Simson S Code

4" barrel, 9mm caliber. The forward toggle link is stamped with a Gothic S, possibly for “Simson.” It has a stock lug, and the area above the chamber is blank. The extractor and the safety are both marked. The grips are also thicker. There were fewer than 12,000 manufactured with one- to five-digit serial numbers–some with the letter “a” suffix. This pistol is quite rare on today's market.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	4200	3000	1500	1000	750

EARLY NAZI ERA MAUSER REWORKS

Produced between 1930 and 1933, and normally marked with Waffenamt

markings.

Deaths Head Rework

4" barrel, 9mm caliber. It has a stock lug; and a skull and crossbones are stamped, in addition to the date of manufacture, on the chamber area. This date was from 1914-1918. The extractor and safety are both marked. The Waffenamt proof is present. It is thought that this variation was produced for the 1930-1933 era “SS” division of the Nazi Party. Mixed serial numbers are encountered on this model and do not lower the value. This is a rare Luger on today's market.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2900	1900	950	600	450

Kadetten Institute Rework

4" barrel, 9mm caliber. It has a stock lug, and the chamber area is stamped “K.I.” above the date 1933. This stood for Cadets Institute, an early “SA” and “SS” officers' training school. The extractor and safety are both marked, and the Waffenamt is present. There were only a few hundred reworked, and the variation is quite scarce. Be wary of fakes.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3700	2900	1100	800	600

Mauser Unmarked Rework

4" barrel, 9mm caliber. The entire weapon is void of identifying markings. There is extensive refurbishing, removal of all markings, rebarreling, etc. The stock lug is present, and the extractor and safety are marked. The Waffenamt proofmark is on the right side of the receiver. The number manufactured is not known.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2100	1350	850	600	450

MAUSER MANUFACTURED LUGERS
1930-1942 DWM

Mauser Oberndorf

4" barrel, 9mm caliber. It has a stock lug, blank chamber area and a marked extractor and safety. This is an early example of Mauser Luger, and the front toggle link is still marked DWM as leftover parts were intermixed with new Mauser parts in the production of this pistol. This is one of the first Lugers to be finished with the “Salt” blue process. There were approximately 500 manufactured with one- to four-digit serial numbers with the letter “v” suffix. This is a rare variation.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	7000	6100	2000	1500	900

1934/06 Swiss Commercial Mauser

4.75" barrel, 7.65mm caliber. There is no stock lug, but it has a grip safety. The Swiss Cross in Sunburst is stamped above the chamber. The extractor and safety are marked in German. The front toggle link is marked with the Mauser banner. There were approximately 200 manufactured for commercial sale in Switzerland. This variation is very well finished, and the serial numbers are all four digits with a "v" suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	8000	6000	4000	1800	1000

1935/06 Portuguese "GNR"

4.75" barrel, 7.65mm caliber. It has no stock lug but has a grip safety. The chamber is marked "GNR," representing the Republic National Guard. The extractor is marked "Carregada" ; and the safety, "Seguranca." The Mauser banner is stamped on the front toggle link. There were exactly 564 manufactured according to the original contract records that the Portuguese government made public. They all have four-digit serial numbers with a "v" suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	4500	3300	1800	900	750

1934 Mauser Commercial

4" barrel, 7.65mm or 9mm caliber. It has a stock lug, and the chamber area is blank. The extractor and the safety are marked. The Mauser banner is stamped on the front toggle link. The finish on this pistol was very good, and the grips are either checkered walnut or black plastic on the later models. There were a few thousand manufactured for commercial sales in and outside of Germany.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	4000	3500	1650	1100	700

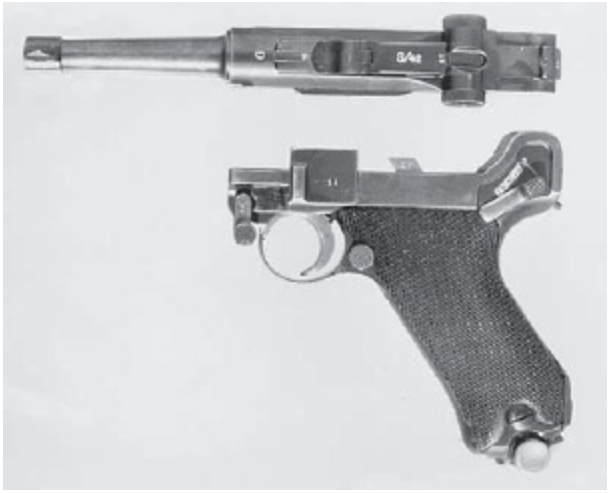
S/42 K Date

4" barrel, 9mm caliber. It has a stock lug, and the extractor and safety are marked. This was the first Luger that utilized codes to represent maker and date of manufacture. The front toggle link is marked S/42 in either Gothic or script; this was the code for Mauser. The chamber area is stamped with the letter "K," the code for 1934, the year of manufacture. Approximately 10,500 were manufactured with one- to five-digit serial numbers–some with letter suffixes.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	8000	5500	2200	1200	1000

S/42 G Date

As above, with the chamber stamped "G," the code for the year 1935. The Gothic lettering was eliminated, and there were many thousands of this model produced.



Courtesy Orvel Reichert

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3100	2300	1000	650	450

Dated Chamber S/42

4" barrel, 9mm caliber. The chamber area is dated 1936-1940, and there is a stock lug. The extractor and safety are marked. In 1937 the rust blue process was eliminated entirely, and all subsequent pistols were salt blued. There were many thousands manufactured with one- to five-digit serial numbers–some with the letter suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2100	1400	750	500	400

NOTE: Rarest variation is early 1937 with rust blued and strawed parts, add 20 percent.

S/42 Commercial Contract

4" barrel, 9mm caliber. It has a stock lug, and the chamber area is dated. It has a marked extractor and safety. The unusual feature is that, although this was a commercial pistol, the front toggle link is stamped S/42, which was the military code for Mauser. There were only a few hundred manufactured, so perhaps the toggles were left over from previous military production runs. The serial number range is four digits with the letter "v."

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3100	2300	1000	750	450

Code 42 Dated Chamber

4" barrel, 9mm caliber. The new German code for Mauser, the number 42, is stamped on the front toggle link. There is a stock lug. The chamber area is dated 1939 or 1940. There were at least 50,000 manufactured with one- to five-digit serial numbers; some have letter suffixes.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1800	1050	650	400	350

41/42 Code

As above, except that the date of manufacture is represented by the final two digits (e.g. 41 for 1941). There were approximately 20,000 manufactured with the one- to five-digit serial number range.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1900	1550	900	700	500

byf Code

As above, with the “byf” code stamp on the toggle link. The year of manufacture, either 41 or 42, is stamped on the chamber. This model was also made with black plastic, as well as walnut grips. There were many thousands produced with the one- to five-digit serial numbers–some with a letter suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3250	1800	950	450	350

Persian Contract 4"

4" barrel, 9mm caliber. It has a stock lug, and the Persian crest is stamped over the chamber. All identifying markings on this variation–including extractor, safety and toggle–are marked in Farsi, the Persian alphabet. There were 1,000 manufactured. The serial numbers are also in Farsi.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	7000	5500	3500	2500	2000

Persian Contract Artillery

As above, with an 8" barrel and nine-position adjustable sight on the barrel. This model is supplied with a flat board stock. There were 1,000 manufactured and sold to Persia.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1000	7500	3500	1750	1000

1934/06 Dated Commercial

4.75" barrel, 7.65mm caliber. It has a grip safety but no stock lug. The year of manufacture, from 1937-1942, is stamped above the chamber, and the Mauser banner is stamped on the front link. The extractor is marked, but the safety is not. There were approximately 1,000 manufactured with one- to three-digit serial numbers–some with the letter suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3500	2600	1400	900	500

1934 Mauser Dutch Contract

4" barrel, 9mm caliber. The year of manufacture, 1936-1940, is stamped above the chamber. The extractor is marked "Geladen," and the safety is marked "RUST" with a downward pointing arrow. The Mauser banner is stamped on the front toggle link. This was a military contract sale, and approximately 1,000 were manufactured with four-digit serial numbers with a letter "v" suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	4500	3650	2000	1100	850

1934 Mauser Swedish Contract

4.75" barrel, 9mm or 7.65mm caliber. The chamber is dated 1938 or 1939. The extractor and safety are both marked in German, and there is a stock lug. The front toggle link is stamped with the Mauser banner. There were only 275 dated 1938 and 25 dated 1939 in 9mm. There were only 30 chambered for 7.65mm dated 1939. The serial number range is four digits with the letter "v" suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	5200	3800	2000	1500	700

1934 Mauser Swedish Commercial

4" barrel, 7.65mm caliber. 1940 is stamped over the chamber; "Kal. 7.65" is stamped on the left side of the barrel. The extractor and safety are both marked, and the Mauser banner is stamped on the front toggle link. There is a stock lug. This model is rare as there were only a few hundred manufactured with four digit serial numbers with the letter "w" suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	4500	2950	1200	850	600

1934 Mauser German Contract

4" barrel, 9mm caliber. The chamber is dated 1939-1942, and the front toggle link is stamped with the Mauser banner. There is a stock lug, and the extractor and safety are both marked. The grips are either walnut or black plastic. There were several thousand manufactured with one- to five-digit serial numbers–some with letter suffixes. They were purchased for issue to police or paramilitary units.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3500	3200	1500	800	550

Austrian Bundes Heer (Federal Army)

4" barrel, 9mm caliber. The chamber is blank, and there is a stock lug. The extractor and safety are marked in German, and the Austrian Federal Army Proof is stamped on the left side of the frame above the trigger guard. There were approximately 200 manufactured with four-digit serial numbers and no letter suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3400	2350	1200	700	500

Mauser 2 Digit Date

4" barrel, 9mm caliber. The last two digits of the year of manufacture–41 or 42–are stamped over the chamber. There is a stock lug, and the Mauser banner is on the front toggle link. The extractor and safety are both marked, and the proofmarks were commercial. Grips are either walnut or black plastic. There were approximately 2,000 manufactured for sale to Nazi political groups. They have one- to five-digit serial numbers; some have the letter suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3500	2600	1500	900	650

Ku Luger (Prefix or suffix)

A 4" barrel, 9mm Luger probably manufactured by Mauser for the German Luftwaffe in the early 1940s. The serial number (on the left side receiver area) has a “Ku” prefix or suffix. Total production is estimated at 5000 pieces.

KRIEGHOFF MANUFACTURED LUGERS

1923 DWM/Krieghoff Commercial

4" barrel, 7.65mm or 9mm caliber. The chamber is dated 1921 or left blank. There is a stock lug. The front toggle is marked DWM, as they manufactured this Luger to be sold by Krieghoff. "Krieghoff Suhl" is stamped on the back above the lanyard loop. The second "F" in Krieghoff was defective, and all specimens have this distinctive die strike. The safety and extractor are marked in German. There were only a few hundred manufactured with four-digit serial numbers with the letter "i" suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	4000	2200	950	650	500

DWM/Krieghoff Commercial

As above, but marked "Heinrich Krieghoff Waffenfabrik Suhl" on the right side of the frame. Some examples have the "Germany" export stamp. There were several hundred manufactured with four-digit serial numbers with a letter suffix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3800	3650	2000	950	800

Krieghoff Commercial Inscribed Side Frame

4" or 6" barrel, 7.65mm or 9mm caliber. 1,000 were marked "Heinrich Krieghoff Waffenfabrik Suhl" on the right side of the frame, and 500 were devoid of this marking. All have the dagger and anchor trademark over "H.K. Krieghoff Suhl" on the front toggle link. The extractor and the safety are both marked. There is a stock lug, and the grips are of brown checkered plastic. There were approximately

1,500 manufactured with one- to four-digit serial numbers with a “P” prefix.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	8500	6400	3000	2000	1000

S Code Krieghoff

4" barrel, 9mm caliber. The Krieghoff trademark is stamped on the front toggle link, and the letter “S” is stamped over the chamber. There is a stock lug, and the extractor and safety are both marked. The grips are wood on early manufactured pistols and brown checkered plastic on later examples. There were approximately 4,500 manufactured for the Luftwaffe with one- to four-digit serial numbers.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	7750	5500	2000	950	750

Grip Safety Krieghoff

4" barrel, 9mm caliber. The chamber area is blank, and the front toggle link is stamped with the Krieghoff trademark. There is a stock lug and a grip safety. The extractor is marked “Geleden,” and the safety is marked “FEUER” (fire) in the lower position. The grips are checkered brown plastic. This is a rare Luger, and the number produced is not known.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	8500	5900	3400	1700	900

36 Date Krieghoff

4" barrel, 9mm caliber. It has a stock lug and the Krieghoff trademark on the front toggle link. The safety and extractor are marked, and the grips are brown plastic. The two-digit year of manufacture, 36, is stamped over the chamber. There were approximately 700 produced in the 3800-4500 serial number range.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	8200	5250	2600	1200	950

4 Digit Dated Krieghoff

As above, with the date of production, 1936-1945, stamped above the chamber. There were approximately 9,000 manufactured within the 4500-14000 serial number range.

NAVY ARMS COMPANY

Not a manufacturer but an importer. Founded in 1957 by Val Forgett to enhance the shooting of blackpowder firearms without destroying the originals. The first replica was the Colt 1851 Navy. Thus, the name of the new company, “Navy Arms.” In the early 1980s Navy Arms began importing surplus firearms from European countries. Navy Arms continues to offer both blackpowder replicas and foreign imports. For a short period of time the company imported double-barrel shotguns. This was discontinued in 1990. Most if not all of the guns listed below are also to be found under the manufacturers' names as well as those of other importers.

Le Page Pistol

This.44 caliber percussion pistol has a 10.25" tapered octagon barrel, adjustable single set trigger. The lock, trigger guard, and buttcap are engraved. The walnut stocks are hand checkered. Weighs 36 oz.

NOTE: Add $140 for hard chrome finish.

P

P.38

WALTHER COMMERCIAL

The Commercial version of the P.38 is identified by commercial proofmarks of a crown over N or an eagle over N. Production started at around serial number 1000 and went through serial number 26659. This was the first of the commercial pistols and was a high-quality, well made gun with a complete inscription on the left slide. A few of these early pistols were equipped with checkered wooden grips. The quality decreased as the war progressed. There are many variations of these commercial models and values can range up to more than $30,000. It is suggested that these pistols be appraised and evaluated by an expert. For post-war Walther P.38 pistols see the Walther section.A few of the Walther Commercial Model variations are listed.

PEDERSOLI, DAVIDE

Brescia, Italy

Davide Pedersoli & C. was founded in 1957 by the late Davide Pedersoli. In the nearly half-century since, Pedersoli has established itself as a manufacturer of extremely high-quality replica and modern firearms. Pedersoli products are frequently marked with the importer's or retailer's name (e.g., Dixie Gun Works or Cabela's) rather than the Pedersoli brand, usually at widely varying discounts. Many muzzleloading rifles and pistols are available in kit form at reduced prices.NOTE: Rapidly-fluctuating currency markets can result in values for newly-imported Pedersoli guns being 10-15 percent higher than the values listed below.

PIEPER, HENRI & NICOLAS

Liege, Belgium

Originally founded by Henri Pieper in 1859, the company was reorganized in 1898 when his son, Nicolas, assumed control. The firm is perhaps best known for a series of semi-automatic pistols that are listed below, but Pieper also manufactured a bewildering variety of drillings, combination guns, cape guns, rook rifles, salon rifles and even volley guns. These guns must be evaluated on their own merits, and their value is strictly a function of what the market will bear.

Pieper Model 1907

A 6.35 or 7.65mm semi-automatic pistol featuring a hinged barrel assembly 2.5" in length. Receiver and barrel are blued, the grips are of hard rubber with the firm's trademark cast in them. The Model 1907 variation does not have a hinged barrel assembly. The Model 1908 is also known as the “Basculant,” and the Model 1918 as the “Demontant.”

Pieper Bayard Revolver

In competition with the Nagant gas seal revolver, Henri Pieper developed a superior design. Revolvers of this type have 5" barrels and are chambered for 8mm cartridges. The first model of this revolver had an automatic ejection system, while the second version utilized a swing-out cylinder. Standard finish is blued, with checkered hard rubber grips.

PLANT'S MANUFACTURING CO.

New Haven, Connecticut

ARMY MODEL REVOLVER

A large single-action revolver chambered for a.42 caliber cup-primed cartridge that loads from the front of the cylinder. Barrel length 6" and of octagonal form with a rib. The frame is made of either brass or iron. Finish is blued, with walnut or rosewood grips. Interchangeable percussion cylinders also were made for these revolvers. If present, the values would be increased approximately 30 percent. This revolver was marketed by Merwin & Bray, and there were approximately 1,500 of the 1st and 2nd Models manufactured and 10,000 of the 3rd Model in the 1860s.

1st Model Brass Frame

Marked “Plant's Mfg. Co. New Haven, Ct.” on the barrel, “M & B" on the side of the frame, and “Patented July 12, 1859" on the cylinder. Approximately 100 manufactured.

Worchester, Massachusetts

POCKET REVOLVER

A single-action, spur trigger.32 caliber revolver with octagonal barrels of 4", 5", or 6" length. The barrel top strap and cylinder pivot upwards for loading. Made with either brass or iron frames. A screwdriver is fitted in the butt. As these revolvers were an infringement of Rollin White's patent, they were discontinued. Some revolvers are to be found with the inscription “Manuf'd. for Smith & Wesson Pat'd. April 5, 1855.” These examples are worth approximately 20 percent more than the values listed.

SEPARATE CHAMBER REVOLVER

To avoid the Rollin White patent, this revolver is chambered for.22 or.32 caliber rimfire cartridges that fit into separate steel chamber inserts that can be removed from the front of the cylinder for loading. The.22 caliber version has a 3.5" octagonal barrel with a 7-round unfluted cylinder; the.32 caliber version has a 4", 5", or 6" octagonal barrel and 6-shot unfluted cylinder. Frames are of silver-plated brass; and the barrels and cylinders are blued. Grips of walnut. Standard markings include “L.W. Pond, Worcester, Mass.” and patent dates. Approximately 2,000 manufactured in.22 caliber and 5,000 in.32 caliber between 1863 and 1870.

As above with a flat brass frame.

PRAHA ZBROJOVKA

Prague, Czechoslovakia

Established in 1918 by A. Novotny, this company ceased operations in 1926.

VZ2L

A 7.65mm semi-automatic pistol patterned after the Model 1910 Browning, but without a grip safety. Barrel length 3.5", magazine capacity 6 rounds, grips of wood. The slide is marked “Zbrojowka Praga Praha.”

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	400	250	200	150	100

Praga 1921

A 6.35mm semi-automatic pistol with a slide of stamped steel cut with a finger groove at the front. Folding trigger. The barrel 2" in length. The slide is marked “Zbrojowka Praga Praha Patent Cal 6.35." The grips of molded plastic, with the name “Praga” cast in them. A dangerous feature of this pistol is that it is striker-fired with no hammer and is intended to be carried fully loaded and cocked in the pocket with absolutely no safety of any kind. I do not recommend this. The folding trigger does not spring out until the slide is drawn back slightly by using the finger groove in the front of it.

PRESCOTT, E. A.

Worcester, Massachusetts

Percussion Pocket Revolver

A.31 caliber percussion spur trigger revolver with either 4" or 4.25" octagonal barrel and a 6-shot cylinder. The frame of brass, and the grips of walnut. It is believed that approximately 100 were manufactured during 1860 and 1861.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3700	2500	1125	200

Pocket Revolver

A.22 or.32 spur trigger revolver with a barrel of either 3" or 4" length. The.22 caliber version has a 7-shot cylinder and the.32 caliber version a 6-shot cylinder. The standard markings are “E.A. Prescott Worchester Mass. Pat. Oct. 2, 1860.” Approximately 1,000 were manufactured between 1862 and 1867.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	1050	825	350	100

Navy Revolver

A single-action revolver fitted with a conventional trigger, chambered for.38 rimfire cartridges with a 7.25" octagonal barrel. The unfluted cylinder holds 6 shots. The frame is of either silver-plated brass or blued iron; and the barrel and the cylinder are blued, with walnut grips. The barrel marked “E.A. Prescott, Worcester, Mass. Pat. Oct. 2, 1860.” It is believed that several hundred were manufactured between 1861 and 1863. The iron frame model will bring a small premium.

REEDER, GARY CUSTOM GUNS

Flagstaff, Arizona

This company offers complete guns as listed below. It also offers custom options built on customer guns as well. An extensive number of custom options is available on any of these models. Prices listed below reflect the standard for that particular model. Retail prices only are listed below due to lack of active secondary market for these limited edition guns. Reeder is a custom manufacturer, or restylist, working primarily with Ruger frames. Only a representative sampling of his works is presented here, and the values are estimates ony. Since many of Reeder's guns are made to custom specs, their value is largely a matter of finding the right buyer.

Arizona Ranger Classic

Built on a Ruger Vaquero this model is chambered for the.45 Long Colt cartridge and fitted with a choice of a 4.5", 5.5", or 7.5" barrel. Blue or stainless steel finish. Special engraving with Stag grips.

REMINGTON ARMS COMPANY, INC.

Madison, North Carolina

Founded in 1816 by Eliphalet Remington, this company has the distinction of being the oldest firearms manufacturing firm in the United States. Since 1856 it has been known by four different names: between 1856 and 1888, E. Remington & Sons; 1888-1910, Remington Arms Company; 1910-1925, Remington Arms U.M.C. Company (Union Metallic Cartridge Company); and 1925 to the present, Remington Arms Company.

1st Model Remington-Beals Revolver

A.31 caliber 5-shot percussion revolver with a 3" octagonal barrel. The cylinder turning mechanism is mounted on the left outside frame. Blued, case hardened, silver-plated, brass trigger guard and gutta-percha grips. The barrel marked, “F. Beal's Patent, June 24, '56 & May 26, '57” and the frame, “Remington's Ilion, N.Y.” Approximately 5,000 were manufactured in 1857 and 1858.

–	–	5000	3350	1150	500

Remington-Rider Revolver

A double-action.31 caliber percussion revolver with a 3" barrel and 5-shot cylinder. Most of these revolvers were blued but a few were nickel-plated, case hardened with gutta-percha grips. This model is also encountered altered to.32 rimfire. The barrel marked, “Manufactured by Remingtons, Ilion, N.Y., Riders Pt. Aug. 17, 1858, May 3, 1859.” Approximately 20,000 were manufactured between 1860 and 1873.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	1400	1100	675	300

NOTE: The cartridge variation is worth approximately 20 percent less than the original percussion version.

Remington-Beals Army Revolver

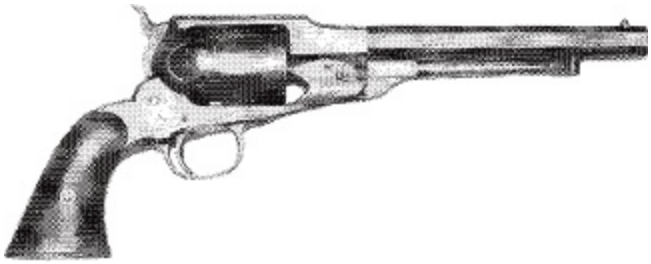
A.44 caliber percussion revolver with an 8" barrel and 6-shot cylinder. Blued, case hardened with walnut grips. The barrel marked “Beals Patent Sept. 14, 1858 Manufactured by Remington's Ilion, New York.” Approximately 2,500 were manufactured between 1860 and 1862.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	4750	2500	1500	500

NOTE: A martially marked example is extremely rare and would be worth approximately 35 percent additional.

Remington-Beals Navy Revolver

Similar in appearance to Remington-Beals Army Revolver, but in.36 caliber with a 7.5" octagonal barrel. The first examples of this model were fitted with a loading lever that would not allow the cylinder pin to be completely removed. These examples are worth approximately 80 percent more than the standard model. Approximately 1,000 of these revolvers were purchased by the United States government and martially marked examples are worth approximately 40 percent more than the values listed below. Manufactured from 1860 to 1862 with a total production of approximately 15,000.



Courtesy Wallis & Wallis, Lewes, Sussex, England

–	–	3750	2500	1500	500

1861 Army Revolver

A.44 caliber percussion revolver with an 8" octagonal barrel and 6-shot cylinder. The loading lever is cut with a slot so that the cylinder pin can be drawn forward without the lever being lowered. Blued, case hardened with walnut grips. The barrel marked “Patented Dec. 17, 1861 Manufactured by Remington's, Ilion, N.Y.” Some examples were converted to.46 caliber rimfire cartridge, and would be worth approximately 25 percent more than the original, martially marked, standard percussion model. Approximately 12,000 were manufactured in 1862. This model is also known as the “Old Army Model.”

–	–	1500	750	400	200

NOTE: Add a 35 percent premium for blued models.

Large-Bore Vest Pocket Pistol

As above, but in.30,.32, or.41 caliber with barrel lengths of either 3.5" or 4". Blued or nickel-plated with walnut or rosewood grips. The barrel markings as above except for the addition of the patent date, November 15, 1864. The smaller caliber versions are worth approximately 20 percent more than the.41 caliber. Approximately 10,000 were made from 1865 to 1888.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1750	1500	675	350	150

NOTE: Add a 35 percent premium for blued models.

Remington-Elliot Single-Shot Derringer

A.41 caliber single-shot pistol with a 2.5" round barrel. Blued or nickel-plated with walnut, ivory, or pearl grips. The barrel marked “Remingtons, Ilion, N.Y. Elliot Pat. Aug. 27, 1867.” Approximately 10,000 were manufactured between 1867 and 1888.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	1850	850	400	125

NOTE: Add a 35 percent premium for blued models.

Remington Over-and-Under Derringer

A double-barrel.41 caliber pocket pistol with 3" round barrels that pivot upward for loading. There is a lock bar to release the barrels on the right side of the frame. The firing pin raises and lowers automatically to fire each respective barrel. It has a spur trigger and bird's-head grip. The finish is either blued or nickel-plated; and it is featured with walnut, rosewood, or checkered hard rubber grips. Examples with factory pearl or ivory grips would be worth a small premium. Approximately 150,000 were manufactured between 1866 and 1935.

NOTE: For all variations of the Remington Over-Under Derringer below, examine closely for broken or cracked barrel hinge and subtract from value accordingly.

Early Type I

Manufactured without an extractor, this type is marked “E.” Remington & Sons, Ilion, N.Y.” on one side and “Elliot's Patent Dec. 12, 1865” on the other side of the barrel rib. Only a few hundred were manufactured in 1866.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	5000	4500	3000	2000	1000

NOTE: Add a 25 percent premium for blued models.

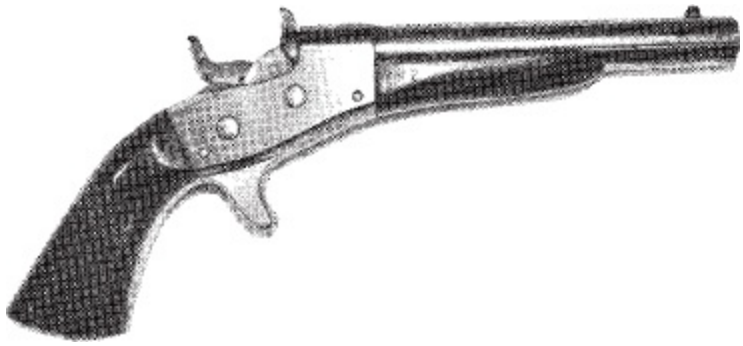
–	–	1950	825	350	150

NOTE: For blued finish add a 50 percent premium.

Model 1865 Navy Rolling Block Pistol

A spur trigger single-shot rolling block.50 caliber rimfire cartridge pistol with an 8.5" round barrel. Blued, case hardened with walnut grips and forend. The barrel marked “Remingtons, Ilion N.Y. U.S.A. Pat. May 3d Nov. 15th, 1864 April 17th, 1866.” Examples bearing military inspection marks are worth approximately 25 percent more than the values listed below. Examples are also to be found altered to centerfire cartridge and these are worth approximately 10 percent less than the values listed below. Approximately 6,500 were manufactured between 1866 and 1870.



NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3500	2500	1000	400

Model 1867 Navy Rolling Block Pistol

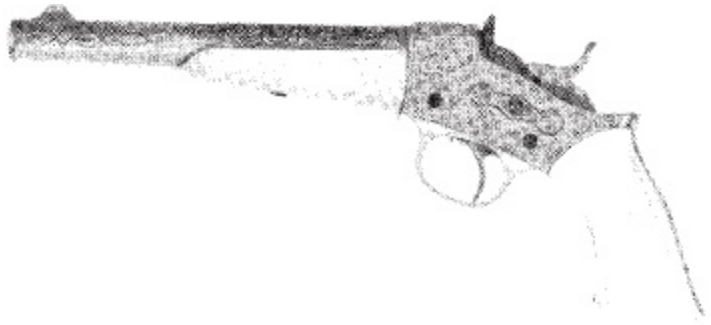
A.50 caliber single-shot rolling block pistol with a 7" round barrel. Blued, case hardened with walnut grips and forend. The majority of these pistols were purchased by the United States government and civilian examples without inspection marks are worth approximately 30 percent more than the values listed.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	2100	1650	875	200

Model 1871 Army Rolling Block Pistol

A.50 caliber rolling block single-shot pistol with an 8" round barrel. Blued, case hardened with walnut grips and forend. The distinguishing feature of this model is that it has a rearward extension at the top of the grip and a squared butt. Approximately 6,000 were made between 1872 and 1888. Engraved ivory-stocked

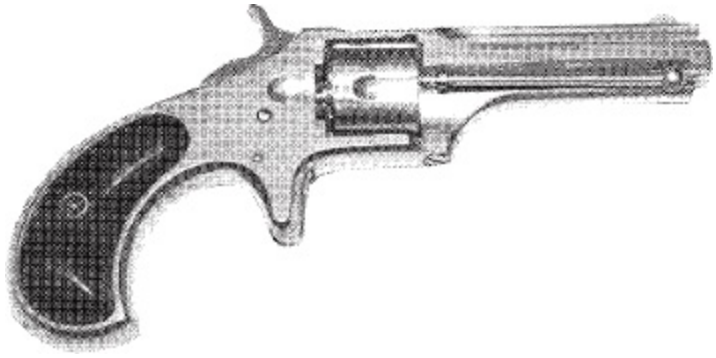
versions, as pictured below, will bring considerable premiums.



NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	2350	1800	875	400

Remington-Smoot No. 1 Revolver

A.30 caliber spur trigger revolver with a 2.75" octagonal barrel and 5-shot fluted cylinder. Blued or nickel-plated with walnut or hard rubber grips. The barrel rib is marked, “E. Remington & Sons, Ilion, N.Y. Pat. W. S. Smoot Oct. 21, 1873.” Examples dating from the beginning of production are found with a revolving recoil shield. Such examples would command approximately a 300 percent premium over the values listed.



NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	1650	1100	675	250

NOTE: For blued finish add a 50 percent premium.

Remington-Smoot No. 2 Revolver

RUPERTUS, JACOB

Philadelphia, Pennsylvania

Navy Revolver

This model is equally as rare as the Army model. It is chambered for.36 caliber percussion. Otherwise it is quite similar in appearance to the Army model. There were approximately 12 manufactured in 1859. Both of these revolvers were manufactured for test purposes and were not well-received by the military, so further production was not accomplished.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	15000	11750	5500	1250

Pocket Model Revolver

This is a smaller version of the Army and Navy model, chambered for.25 caliber percussion. It has no loading lever and has a 3-1/8" octagonal barrel. There were approximately 12 manufactured in 1859.

Double-Barrel Pocket Pistol

A.22 caliber double-barrel pistol with 3" round barrels and a spur trigger. The hammer fitted with a sliding firing pin. Blued with walnut grips.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	2400	1900	850	200

Army Revolver

This is an extremely rare revolver chambered for.44 caliber percussion. It has a 7.25" octagon barrel with an integral loading lever that pivots to the side instead of downward. The hammer is mounted on the side, and there is a pellet priming device located on the backstrap. There is only one nipple on the breech that lines up with the top of the cylinder. The cylinder is unfluted and holds 6-shots. The finish is blued, with walnut grips; and the frame is marked “Patented April 19, 1859.” There were less than 12 manufactured in 1859. It would behoove one to secure a qualified independent appraisal if a transaction were contemplated.

SAUER & SON, J. P.

Suhl and Eckernfoerde, Germany

This is the oldest firearms manufacturing firm in Germany. It was founded in 1751 in Suhl. During this period the company produced high quality handguns and long guns. In 1938 it introduced a new double-action semi-automatic pistol, the Sauer 38H. This pistol had the first decocking lever ever used on a mass produced pistol. In 1951 the company relocated to Eckernfoerde where it continued to produced high quality forearms.NOTE: The Model 90 Supreme and Model 202 are currently imported by SIGARMS Inc.

PISTOLS

Written and compiled by our very good friend Jim Cate.

Bär Pistol

Invented by Burkard Behr and made by Sauer. This was Sauer's first modern small pistol. It has stacked barrels (over/under configuration) that allow the shooter to fire two shots, rotate the barrel, and then fire two more shots before loading. It was first patented in Germany in 1897 and in the USA in 1899. It shoots the 7mm B\x8a r cartridge only. (DO NOT ATTEMPT TO FIRE THE.25 ACP/6.35mm CARTRIDGE IN THIS PISTOL.) It was made from 1897 to 1911 or 1912. Some pistols have Bakelite grips; some have diamond-pattern checkered wood grips. A case extractor rod screws into the bottom of the frame. No trigger guard. Add $150 for original box and instructions.

Roth-Sauer Model

The very first automatic pistol produced by J.P. Sauer & Son and designed by Karl Krinka for George Roth. It is available only in 7.65 Roth-Sauer caliber. It is a locked breech design, beautifully finished and extremely well made. Later this design was modified and became the Roth-Steyr military pistol which was adopted by Austria in 1907. A difficult-to-find pistol.

Sauer Model 1913

First Series

Incorporates an extra safety button on the left side of the frame near the trigger and the rear sight is simply a milled recess in the cocking knob itself. The serial number range runs from 1 to approximately 4750 and this first series is found only in 7.65mm caliber. All were for commercial sales as far as can be determined. Some were tested by various militaries, no doubt.A.European variation—all slide legends are in the German languageB.English Export variation—slide legends are marked, J.P. Sauer & Son, Suhl - Prussia, "Sauer's Patent" Pat'd May 20 1912 Both were sold in thick paper cartons or boxes with the color being a reddish purple with gold colored letters, etc. Examples of the very early European variation are found with the English language brochure or manual as well as an extra magazine, cleaning brush and grease container. These were shipped to England or the U.S. prior to Sauer producing the English Export variation.

A. European variation:

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1500	900	650	400	250

B. English Export variation:

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1800	1200	800	500	300

Original box with accessories and manual: Add $500 if complete and in very good to excellent condition.

Second Series

Extra safety button eliminated, rear sight acts as cocking knob retainer.

Commercial variations

Normal European/German slide markings are normally found; however it has been called to my attention that there are English Export pistols in this SECOND SERIES which have the English markings on the slide which are similar to those found on the FIRST SERIES of the Model 1913. This is applicable to both the 7.65mm and 6.35mm model 1919 pistols. These are exceptional scarce pistols and should command at least a 50 percent premium, perhaps more due to their rarity. This commercial variation had factory manuals printed in English, Spanish and German which came with the cardboard boxed pistols. With the original Sauer box accessories and manual: Add $300 if in very good to excellent condition.

Police variations

These will be of the standard German Commercial configuration but nearly always having the Zusatzsicherung (additional safety) added to the pistol. This safety is found between the regular safety lever and the top of the left grip. Police used both calibers, 7.65mm and 6.35mm but the 7.65 was predominant. After the early part of the 1930s the 6.35 was not available to police departments. Thus the 6.35mm police marked Sauer is rather scarce in relation to the 7.65mm caliber. A few in 7.65mm are dated 1920 on the left side of the frame and were used by auxiliary policemen in Bavaria. Normal police property markings are on the front

or rear gripstraps. Most were originally issued with at least two magazines and a police accepted holster. The mags were usually numbered and the holsters are found with and without pistol numbers.

NOTE: Add 10 percent for one correctly numbered magazine, or 20 percent if found with both correctly numbered magazines. Add 30 percent if found with correct holster and magazines.

R.F.V. (Reich Finanz Verwaltung)

This Sauer variation is rarely found in any condition. The R.F.V. markings and property number could be 1 to 4 digits. This variation is found in both calibers and were used by the Reich's Customs and Finance department personnel.

Imperial Military variations

These were normal German commercial variations of the time period having either the Imperial Eagle acceptance marking applied on the front of the trigger guard and having the small Imperial Army inspector's acceptance marking (crown over a scriptic letter) on the right side of the frame close to the Nitro proof; or having just the Imperial Army inspector's marking alone. Usually these pistols are found in the 40000 to 85000 range. However, the quantity actually Imperial Military accepted is quite low even though thousands were privately purchased by the officer corps. There are examples in 6.35mm which are Imperial Military accepted but these are very scarce.

Caliber 7.65mm Imperial Military accepted pistols

–	700	500	350	275	150

NOTE: Add 30 percent for 6.35mm.

Paramilitary marked Sauer pistols of the 1925-35 period

A very few of the Model 1913 pistols will have been marked by paramilitary groups or organizations of this period. Usually this marking is no more than a series of numbers above another series of numbers, such as 23 over 12. These are found usually on the left side of the frame next to the left grip. Most of these numbers are indicative of property numbers assigned to a particular pistols belonging to a particular SA Group, Stahlhelm, or a rightwing organization such as the Red Front (early communist). Any pistol of this type should be examined by an expert to determine if it is an original example.

Norwegian police usage, post World War II

After the war was over many surplus German weapons were put back into use by the government of Norway. The Germans had occupied this country and large numbers of weapons remained when the fighting ended. This included a large number of surplus Sauer pistols being utilized by the police (POLITI) forces. Most of the Sauers that were used by the Politi which have been imported into the U.S. have been the Model 1913; however there were a number of the Model 1930 pistols which reached our country as well. All examples, regardless of the model, have the word POLITI stamped on the slide as well as a rampant lion on a shield under a crown marking. Following this is the property number and this number is also stamped into the left side of the frame. Most saw much usage during the post-war period. All are in 7.65mm caliber.

–	350	300	200	150	100

Model 1913/19 in 6.35mm

This particular pistol must be divided into three (3) subvariations. This variation appears to be in a serial number range of its own. The first subvariation appears to run from 1 to 40000. It is highly doubtful if this quantity was manufactured. The second subvariation incorporates a Zusatzsicherung or Additional Safety which can be seen between the normal safety lever and the top of the left grip. It locked the trigger bar when in use. This second range appears to run from approximately serial number 40000 to 51000 which probably was continuous in the number produced. Lastly, the third subvariation examples were manufactured during or after 1926. The trigger guard has a different shape; the slide has a greater area of vertical milled finger grooves; the added Additional safety (Zusatzsicherung) now acts as the hold open device as well. These are found up to approximately 57000. Then a few examples of the first subvariation are found from 57000 up to about 62500. This was, no doubt, usage of remaining parts.

NOTE: Any commercial pistol could be special ordered with a factory nickel finish,

special grip material (pearl, wood, etc.) as well as different types of engraving. It would be in your best interest to have these pistols examined by an expert.

1926 EXPORT MODEL

This variation's name comes from actual Sauer factory records found in the Suhl Archive. It is an interim pistol produced during the 1926 to early 1929 period. It is found only in the 7.65mm caliber. This was an advancement of the normal 1913 design which included changes in (1) the safety lever's design that became a slide hold open device as well, (2) shape of the frame was altered in that the trigger guard became more streamlined and the rear of the frame was shortened, and serrations were added to the slide as well as the cocking knob. These are found in the 162000 to 169000 range in relatively small clusters. Two to four thousand are presumed to have been manufactured. A scarce Sauer pistol! To date, none have been seen in nickel.

–	825	700	500	300	150

W.T.M.-Westentaschen Model—Vest Pocket Model

Several variations of vest pocket pistols were manufactured. The first was called a Model 1920 by the Sauer firm. We usually refer to it as the Model 1924. This pistol, as well as all other W.T.M. examples, were designed to carry in your pocket. They are quite small in size and are found only in the 6.35mm or.25 ACP caliber. Later on in 1928 an updated version became available and was referred to a the Model 1928. These differed in internal parts design, slide configuration and the bottom of the grip was marked, "Cal.6.35.28." The last version appeared in 1933 and still utilized the same grips but the trigger and some other small parts differed. All three were available in blue or nickel finish, as well as engraving and fancy grip material. A very few of the Model 1933 had stainless steel (NIROSTA marked) barrels.

–	700	575	400	275	150

NOTE: Add $200 for factory nickel, $250 for factory engraving, $250 for exotic grip material, $500 for factory paper box with cleaning brush, extra magazine and brochure, $750 in original factory imitation leather covered metal presentation case with accessories, $500 for NIROSTA marked stainless barrel.

Model 1930 variations

Dutch models

These different types of Dutch pistols will have JOH MUNTS - AMSTERDAM on the left side of the slide. The grips are usually a mottled gray color. Sauer manufactured different pistols for the Dutch police, Navy, Army, Department of Finance, S.M.N. (Steam Ships Netherlands) and possibly other agencies.

Dutch Police

First variation manufactured w/o adjustable front sight and w/o lanyard loop.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	650	450	350	250	125

Amsterdam Police

Manufactured w/o adjustable sight but having a lanyard loop.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	700	500	350	250	125

Navy

Made without adjustable sight and having the Anchor & Crown marked on the rear gripstrap.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1000	750	400	250	125

S.M.N.

Found with and w/o adjustable front sights, no lanyard loop, S.M.N. marked horizontally near bottom of rear gripstrap.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1000	700	375	225	100

Department of Finance

Found with and w/o adjustable front sight, no lanyard loop, DF over date-1933-on rear grip strap

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	850	700	385	250	150

NOTE: Accessories: cleaning rod, brush, aluminum oil bottle and manuals, add accordingly.

1930 Commercial Model

These pistols were for sale in Germany and other countries through normal commercial outlets. A very few are factory nickeled, engraved or both; some are with the NIROSTA marked barrels and a very few were made in Duralumin or Dural. The standard caliber was 7.65mm hut a very limited number were made in.22 LR (.22 Long). Standard grip material is black Bakelite. Most of the regular pistols were purchased by military officers, some went to paramilitary groups,

such as the SA.

Standard Commercial

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	600	450	300	200	125

Standard Commercial with NIROSTA marked barrel, 7.65mm

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	900	600	350	275	150

Standard Commercial in.22 LR (.22 Long)

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2500	1800	1200	500	300

Duralumin (Dural) Variation, 7.65mm

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3500	2750	2000	1200	450

NOTE: For any variation listed add $100 for nickel finish; $500 for engraving; $600 for both nickel and engraving; with nickel, engraving, and with a fancy grip material (pearl or ebony, etc.) $750.

BEHORDEN MODEL

The Behorden (Authority) Model is different from the Model 1930 in that it has a trigger safety and a loaded indicator provided.

Behorden Commercial

These are normally found with a high polished blued finish. It was available with a nickel finish, engraving, or both, as well as fancy grip material and a NIROSTA marked barrel. The regular caliber is 7.65mm, but a very few are know in.22 LR that are probably prototype pistols.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	675	550	400	350	200

NOTE: Add $100 for nickel finish, $250 for engraving, $350 for both, $500 with nickel, engraving, and a fancy grip material; $500 for NIROSTA marked stainless barrel. Add 300 percent for.22 caliber.

Late Behorden Commercial

These are actually Model 1930 pistols found in the 220000 to 223000 serial number range which do not have the trigger safety and/or the indicator pin.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	600	450	300	200	125

Duralumin Model (Dural)

The frame and slide are made of the Duralumin material. These are rare pistols!

Blue Anodized Variation

Found with and w/o NIROSTA marked barrels.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	4000	3500	2500	1500	850

NOTE: Add $250 for the stainless barrel.

Nonanodized Variation

Found with and w/o NIROSTA marked barrels.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	4000	3500	2500	1500	850

NOTE: Add $250 for the stainless barrel.

Presentation Examples of Anodized and Nonanodized Variations

Please consult an expert for pricing.

Police Models

Examples will be found with police acceptance on the left side of the trigger guard and in a few cases on the front or rear grip straps. Black Bakelite grips are standard.

Sunburst K Police Acceptance
Nonadjustable front sight (a round blade).

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	600	500	350	275	200

Sunburst K Police Acceptance
Adjustable front sight.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	750	625	450	300	225

Diamond in Sunburst Police Acceptance
All known are with the adjustable front sight.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	875	700	500	300	225

Grip Strap Marked Variations
(Having abbreviations of a city and the property number of the pistol on the grip strap.) Very few of these are known. Examples are S.Mg. 52, Sch. 78, etc.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	750	550	375	250	150

MODEL 36/37
>
These very few pistols are all prototype Sauer pistols which preceded the Model 38. They are in the 210,000 range. Please consult an expert to determine value! EXTREMELY RARE.

MODEL 38 AND 38-H
(H MODEL) VARIATIONS

Model 38

This pistol started at 260000. It is Crown N Nitro proofed, has a cocking/decocking lever, and a loaded indicator pin, and is double-action. It has a high polish blue; is in 7.65m/m (the standard production pistol); is found without the thumbsafety on the slide; with a pinned mag release. VERY RARE.

One Line Slide Legend Variation (pinned magazine release button - no screw)

Crown N proofs. Approximately 250 produced. Extremely rare!

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3800	3000	2000	600	300

Two Line Slide Legend Variation (pinned magazine release button - no screw)

C/N proofs, blued, with pinned magazine release (about 850 produced) VERY RARE.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2600	2000	1500	500	275

NOTE: Add $250 for factory nickel; $350 for factory chrome; $1000 for engraving; $500 for NIROSTA marked barrel.

Two Line Slide Legend Variation (magazine release button)

C/N proofs, blued, magazine release button retained by a screw. RARE.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	2500	1500	900	500	275

NOTE: Add $250 for factory nickel; $350 for factory chrome; $1000 for engraving; $500 for NIROSTA marked barrel.

SA der NSDAP Gruppe Thuringen Marked Variation

Blued, C/N proofs, with magazine release button held by a screw. VERY RARE.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	5000	4000	2500	650	275

Model 38 pistols converted to H Models by Sauer factory

Currently there are fewer than 30 known examples in collections. The thumbsafety levers were added. Unique milling on the left side of the slide determines these pistols in the 262xxx, 263xxx and 264xxx ranges. This includes SA der NSDAP Gruppe Thüringen marked pistols.

Model 38-H or H Model

This model has a thumbsafety on the slide, Crown N Nitro proof, high polish blued finish, a cocking/decocking lever, double-action, and is found in 7.65m/m caliber as the standard production pistol. This model is found only with the two line slide

legend or logo. Type 1, variation 2.

Standard Commercial Variation

Blued, C/N proofs, with magazine release button held by a screw. VERY RARE.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1200	900	600	300	175

NOTE: Add $100 for factory nickel (factory chromed has not been identified); $1000 for factory engraving; $250 for exotic grip material; $500 for NIROSTA marked stainless barrel.

SA der NSDAP Gruppe Thüringia Variation

Same as Standard. above except having SA markings on slide, with blued finish, VERY RARE.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	4000	3000	2500	900	400

NOTE: Add $700 for SA marked Akah holster in excellent condition.

L.M. Model

(Leicht Model-lightweight model); frame and slide made of DURAL (Duralumin), in the 264800 range, with thumb safety, and regular black Bakelite grips. EXTREMELY RARE.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	6500	5000	3000	1500	850

Flash Light Model

Only four known examples of this variation. Battery flash light attached by four screws to the pistol. Carried by the SS night partol at the Reich's chancellory in Berlin. No specific markings, but known serial numbers are 266814, 266842, 266845.

Too Rare To Price

Police Accepted Variation

Found with Police Eagle C acceptance on left trigger guard and having Crown N proofs. RARE.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	3000	2500	1850	500	175

TYPE TWO MODEL 38-H (H MODEL)

There are no Model 38 pistols in the Type Two description, only the H Model with thumbsafety. These begin at serial number 269100 and have the Eagle N Nitro proofs, with a blued high polish finish and black Bakelite grips. The normal caliber is 7.65mm.

A. H Model Type Two

Standard Commercial

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1000	850	600	300	200

NOTE: Add $1500 for boxed examples complete with factory manual, clean ring rod, all accessories, extra magazine, etc. $250 for factory nickel, $350 for factory chrome, $1000 for factory engraving.

.22 Caliber Variation

Slide and magazines are marked CAL..22 LANG. (Some with steel frame and slides; some with Dural frames and slides.) Found in 269900 range. Very Rare.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	6000	4500	3000	1000	600

Jager Model

A special order pistol in.22 caliber which is similar in appearance to Walther's 1936 Jagerschafts pistol. Very rare.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	6250	5000	3000	1000	400

Police Eagle C and Eagle F Acceptance Variations

These are the first Eagle N (post January 1940) police accepted pistols are found in the 270000 to 276000 ranges.

NIB Exc. V.G. Good Fair Poor
– 1250 800 600 325 200

NOTE: Add 50 percent for E/F.

German Military Variation

This is the first official military accepted range of 2,000 pistols. It is in a range found between 271000 to 273000. Two Eagle 37 military acceptance marks are found on the trigger guard.

NIB Exc. V.G. Good Fair Poor
– 2000 1500 1200 700 300

Second Military Variation

These pistols are found with the high polish finish but have only one Eagle 37 acceptance marks. The letter H is found on all small parts.

NIB Exc. V.G. Good Fair Poor
– 1650 1450 800 400 200

Police Eagle C Acceptance

This variation includes the remainder of the high polish blued police accepted pistols.

NIB Exc. V.G. Good Fair Poor
– 950 600 450 275 175

NOTE: Add $50 for matching magazine, $200 for both matching mags and correct police holster; $300 for both matching mags and correct matching numbered, police accepted and dated holster.

TYPE THREE 38-H MODEL (H MODEL)

This terminology is used because of the change of the exterior finish of the Sauer pistols. Due to the urgency of the war, the order was received to not polish the exterior surfaces of the pistols as had been done previously. There was also a change in the formulation of the grip's material. Later in this range there will be found stamped parts, zinc triggers and magazine bottoms, etc. used to increase the pistol's production. Type Three has a full slide legend.

A. H Model Type Three

Military Accepted

One Eagle 37 Waffenamt mark.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	850	650	400	275	150

Commercial

Only Eagle N Nitro proof marks.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	725	500	400	250	150

–	700	500	400	300	200

Police Accepted with the Police Eagle F Acceptance

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	750	600	500	250	175

NOTE: See Type Two Police info, prices apply here also.

TYPE FIVE MODEL 38 & H MODEL PISTOLS

There are two different basic variations of the Type Five Sauer pistols. Either may or may not have a thumbsafety lever on the slide. The main criteria is whether the frame is factory numbered as per normal and follows the chronological sequence of those pistols in the preceding model. After the frames were used which were already numbered and finished upon the arrival of the U.S. Army, the last variation came about. Neither variation has any Nitro proof marks.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1800	750	450	250	175

First Variation

Factory numbered seequential frames starting on or near serial number 506800. Slides and breech blocks may or may not match.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	550	450	300	225	100

Second Variation

Started with serial number 1; made from mostly rejected parts, generally have notched trigger guards, may or may not be blued, no Nitro proofs, slides may or may not have factory legends, etc. Approximately 300 assembled. Defintely rare Sauer pistols!

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	900	650	450	300	150

NOTE: There are some pistols which have post-war Russian Crown N Nitro proofs.

The Russians assembled or refurbished a very few pistols after the U.S. Army left this section after the war. Several have been found with newly made barrels in 7.65mm with a C/N proof. A hard to find Sauer!

SAVAGE & NORTH

Middletown, Connecticut

Figure 8 Revolver

A.36 caliber percussion revolver with a 7" octagonal barrel and 6-shot cylinder. The barrel marked “E. Savage, Middletown. CT./H.S. North. Patented June 17, 1856.” The four models of this revolver are: (1) With a rounded brass frame, and the mouths of the chamber fitting into the end of the barrel breech; (2) with a rounded iron frame and a modified loading lever that is marked “H.S. North, Patented April 6, 1858” ; (3) with a flat-sided brass frame having a round recoil shield; (4) with an iron frame. Approximately 400 of these revolvers were manufactured between 1856 and 1859.

–	–	11000	4400	1000	450

SAVAGE ARMS CORPORATION

Utica, New York
Westfield, Massachusetts

Elbert Searle was granted a patent on an automatic pistol which utilized the bullet's torque to twist the barrel into a locking position with the slide. The patent also featured a double-row staggered magazine which increased the capacity over ordinary pistols. The patent was sold to Savage and the first Savage automatic pistol, the Model 1907 was produced.NOTE: Savage automatic pistols with the original cardboard box will bring between $50 and $100 premium. If the instruction pamphlet, cleaning brush, or other advertising material is present the price will escalate.

Model 1907

A.32 or.380 semi-automatic pistol with a 3.75" or 4.25" barrel depending upon caliber and a 9- or 10-shot magazine. Blued with hard rubber rectangular grips. This model is often incorrectly termed the Model 1905 or Model 1910.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	525	350	250	150	100

NOTE: The.380 caliber model is worth approximately 30 percent more than the values listed.

Model 1907 Portugese Contract

Similar to the commerical guns but with a lanyard ring same as the French contract model. Original Portugese pistols will have the Portugese Crest on the grips. Only about 1,150 of these pistols were produced. Very rare. Proceed with caution.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1700	1250	950	600	300

Model 1915

Similar to the Model 1907, except fitted with a grip safety and with an internal hammer. Approximately 6,500 pistols were produced in.32 caliber and 3,900 in the.380 caliber. Manufactured between 1915 and 1917. The rarest of the regular-production Savage automatic pistols.

Model 1910 Test Pistol

This was a modified Model 1907 with a heavier slide that was not concave like the Model 1907. There was a total of nine Model 1910s built.

Too Rare To Price.

Model 1911 Test Pistol

This example was completely modified with a longer and thinner grip. Checkered wood grips were attached by friction instead of screws, the slide release was modified, a full grip safety was added, and a heavier serrated hammer (cocking lever) was added. Four of these pistols were built. Serial #1 has never been located.

Too Rare To Price.

Model 101

.22 caliber single-shot pistol resembling a revolver with a 5.5" barrel. Blued with hardwood grips. This pistol was made in Chicopee Falls or Westfield, Mass. Manufactured between 1960 and 1968.

SCHALL & CO.

New Haven, Connecticut

Manufactured the Fiala repeating pistol for Fiala. Later, after Fiala’s bankruptcy, Schall provided parts, repair service, and produced repeating pistols with the Schall name. Marketed by Schall between about 1930 and 1935.

Repeating Pistol

A.22 caliber pistol with 10-shot magazine. Tapered 6.5" barrel with fixed sights and blued finish. Rear sight is much simpler than those on the Fiala. Grips are wood with ribs running lengthwise. Typically marked “schall & co./new haven, conn usa” but guns exist with no markings. Note that the original Fiala pistols had 7.5" barrels, but not so the Schalls (a fact revealed to us by our friend Jack in Florida).

SIGARMS/SIG-SAUER

Eckernforde, West Germany

NOTE: SIGARMS currently offers an almost innumerable variety of semi-auto pistols. The main models are listed here. Values for similar models (i.e., those with similar model numbers) are generally comparable to the values given here with a 5-10 percent premium for scarce or desirable options.

CLASSIC SERIES

NOTE: For pistols with factory installed night sights add $90. Add $45 for pistols with K-Kote finish. Add $35 for nickel slides.

P210

This model was reintroduced into the U.S. in 2001 and is based on the Swiss military version first built in 1949. It is designed primarly as a target pistol and is furnished in four different variations. All variations are chambered for the 9mm cartridge.NOTE: Older P210 models imported before 1968 without importer stammps and pistols built during the late 1940s and early 1950s may bring a premium to the collector. Be aware that extra barrels, conversion kits, and other special order features will add additional value.

P210-8-9

This variation has adjustable target sights, select wood grips, lateral magazine catch, blued sandblasted finish, and adjustable trigger stop. Heavy frame. Barrel length is 4.8". Weight is about 37 oz.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*

P210-39 4200 3900 2750 2000 1000 500

2200	1900	1600	1250	700	300

NOTE: A.22 LR conversion is available for the P210-2/5/6 series but not the P210-8. Retail price is $700.00.

P210-9-6S

This 9mm pistol is fitted with a heavy frame, target sights, wood grips, and U.S.-style magazine release. Introduced in 2004.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
3300	2950	2500	2000	1450	500

P220

This is a high-quality, double-action semi-automatic pistol chambered for.38 Super,.45 ACP, and 9mm Parabellum. It has a 4.41" barrel and fixed sights and features the de-cocking lever that was found originally on the Sauer Model 38H. There are two versions of this pistol—one with a bottom magazine release (commonly referred to as the European model) and the other with the release on the side (commonly referred to as the American model) as on the Model 1911 Colt. The frame is a lightweight alloy that is matte-finished and is available in either blue, nickel, or K-Kote finish with black plastic grips. The.45 ACP magazine capacity is 7 rounds and the pistol weighs 25.7 oz.; the.38 Super magazine

capacity is 9 rounds and the pistol weighs 26.5 oz.; the 9mm magazine holds 9 rounds and the overall weight is 26.5 oz. This model was manufactured from 1976 and is still in production. The 9mm and.38 Super versions are no longer in production. The prices listed are for guns with a standard blue finish. **NOTE:**For the K-Kote finish add $40, for nickel slide add $40. Stainless steel add $100. In 2004 a blued version with tactical rail was offered.

2100	1700	1450	1000	600	350

P250 Compact

Introduced in 2008. A 9mm semiauto pistol of so-called “modular design” that enables the shooter to quickly remove the functional mechanism and place it into the polymer grip of his choice. This allows an immediate change in caliber and size; (subcompact, compact and full). And after any change the pistol delivers both outstanding accuracy and reliable functionality. Its modularity not only provides incredible ease of maintenance, but also provides a solution for accommodating different hand sizes— there are 6 different ergonomic combinations for each size, accomplished by changes in grip circumference and trigger style. Matte or duotone finish.

Simplex
A German design based on the Bergmann-Mars pistol. An 8mm caliber semi-automatic pistol with a 2.6" barrel and a front mounted 5-round magazine. Blued with hard rubber grips having the trade name “Simplex” cast in them. Manufactured from approximately 1901 to around 1906. Early samples may have come from Germany and later pistols are thought to have been produced in Belgium.

SMITH, OTIS

Rockfall, Connecticut

This company manufactured a line of single-action, spur-trigger revolvers that are chambered for.22,.32,.38, and.41 rimfire cartridges. The pistols have varying barrel lengths. The cylinder access pin is retained by a button on the left side of the frame. The cylinder usually holds five shots. The finishes are either blued or nickel-plated, with bird’s-head grips. The quality was considered to be mediocre.

Model 1883 Shell-Ejector

A single-action, break-open, self ejecting revolver with a ribbed 3.5" barrel chambered for.32 centerfire. It has a 5-shot fluted cylinder and a spur trigger. It was quite well made. The finish is nickel-plated, with black plastic grips.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	—	500	275	100	75

Model 1892

A double-action, concealed-hammer revolver chambered for the.38 centerfire cartridge. It has a 4" barrel and, for the first time, a conventional trigger and trigger guard. It is gateloaded and has a solid frame. It is nickel-plated with black plastic grips and also appeared under the Maltby, Henley & Company banner marked “Spencer Safety Hammerless” or “Parker Safety Hammerless.” The Otis Smith Company ceased operations in 1898.

SMITH & WESSON

Springfield, Massachusetts

SMITH & WESSON ANTIQUE HANDGUNS

NOTE: A surprising number of pistols are still found in their original boxes, even for older models. This can add 100 percent to the value of the pistol.

Model 1, 1st Issue Revolver

This was the first metallic-cartridge arm produced by Smith & Wesson. It is a small revolver that weighs approximately 10 oz. and is chambered for the.22 Short rimfire cartridge. The octagonal barrel is 3.25" long. It holds 7 cartridges. The barrel and nonfluted cylinder pivot upward upon release of the under the frame. This model has a square butt with rosewood grips. The oval brass frame is silver-plated. The barrel and cylinder are blued. The barrel is stamped with the company name and address; the patent dates also appear. The sides of the frame are rounded on the 1st issue. Other characteristics which distinguish the more valuable 1st issue from later issues include a perfectly round side plate and a hinged hammer spur. Smith & Wesson manufactured approximately 11,000 of these revolvers between 1857 and 1860. Since this was the first of its kind, it is not difficult to understand the need for the number of variations within this model designation. Many small improvements were made on the way to the next model. These variations are as follows:

1st Type

Serial range 1 to low 200s, revolving recoil shield, bayonet type catch on frame.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	—	15000	10000	8000	1000

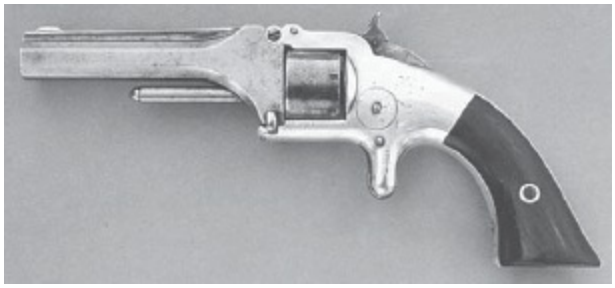
NOTE: Rarity makes valuation speculative.

2nd Type

Serial range low 200s to 1130, improved recoil plate.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	—	10000	6000	2500	500

3rd Type



Serial range 1130 to low 3000s, bayonet catch dropped for spring-loaded side catch.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	—	5500	4000	2500	500

4th Type

Serial range low 3000s to low 4200s, recoil shield made much smaller.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	—	2250	1800	1250	300

5th Type

Serial range low 4200s to low 5500s, has 5-groove rifling instead of 3.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	—	2250	1800	1250	300

6th Type

Serial range low 5500s to end of production 11670. A cylinder ratchet replaced the revolving recoil shield.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	—	1600	1400	1000	250

Model 1
2nd Issue

Similar in appearance to the 1st Issue this 2nd Issue variation has several notable differences that make identification rather simple. The sides of the frame on the 2nd Issue are flat not rounded as on the 1st Issue. The sideplate is irregular in shape—not round like on the 1st Issue. The barrel was 3-3/16" in length. The barrel is stamped “Smith & Wesson” while the cylinder is marked with the three patent dates: April 3, 1858, July 5 1859, and December 18, 1860. There have been 2nd Issue noted with full silver or nickel-plating. Smith & Wesson manufactured approximately 115,000 of these revolvers between 1860 and 1868. The serial numbers started around 1100 where the 1st Issue left off and continued to 126400. There were approximately 4,400 revolvers marked “2D Quality” on the barrels. These revolvers were slightly defective and were sold at a lesser price. They will bring an approximate 100 percent premium on today’s market.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	—	750	600	250	100

Model 1
3rd Issue

This is a redesigned version of its forerunners. Another.22 Short rimfire, 7-shot revolver, this model has a fluted cylinder and round barrel with a raised rib. This variation was manufactured totally from wrought iron. The three patent dates are stamped on top of the ribbed barrel as is "Smith & Wesson." It features bird's-head type grips of rosewood and is either fully blued nickel-plated, or two-toned with the frame nickel and the barrel and cylinder blued. There are two barrel lengths offered: 3.25" and 2-11/16". The shorter barrel was introduced in 1872. Serial numbering began with #1 and continued to 131163. They were manufactured between 1868 and 1882. The Model 1 3rd Issue was the last of the tip-up style produced by Smith & Wesson.

Model 1-1/2 1st Issue (1-1/2 Old Model)

This model was the first of the.32-caliber Rimfire Short revolvers that S&W produced. It is a larger version of the Model 1 but is physically similar in appearance. The Model 1-1/2 was offered with a 3.5" octagonal barrel and has a 5-shot nonfluted cylinder and a square butt with rosewood grips. In 1866 a 4" barrel version was produced for a short time. It is estimated that about 200 were sold. The finish is blued or nickel-plated. The serial numbering on this model ran from serial number 1 to 26300; and, interestingly to note, S&W had most of the parts for this revolver manufactured on contract by King & Smith of Middletown, Connecticut. Smith & Wesson merely assembled and finished them. They were

produced between 1865 and 1868.

Courtesy Mike Stuckslager

–	795	650	400	200	100

Note: Add a 50 percent premium for the 4" barrel variation.

Model 1-1/2 2nd Issue (1-1/2 New Model)

The factory referred to this model as the New Model 1-1/2 and it is an improved version of the 1st Issue. It is somewhat similar in appearance with a few notable exceptions. The barrel is 2.5" or 3.5" in length, round with a raised rib. The grip is of the bird's-head configuration, and the 5-shot cylinder is fluted and chambered for the.32 Long rimfire cartridge. The cylinder stop is located in the top frame instead of the bottom. The finish and grip material are the same as the 1st Issue. There were approximately 100,700 manufactured between 1868 and 1875.

Model 1-1/2 Transitional Model

Approximately 650 of these were produced by fitting 1st Issue cylinders and barrels to 2nd Issue frames. They also have 1st Model octagon barrels with 2nd Model bird's-head grips. These revolvers fall into the serial number range 27200-28800.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3000	1500	800	300

Model 2 Army or Old Model

Similar in appearance to the Model 1 2nd Issue, this revolver was extremely successful from a commercial standpoint. It was released just in time for the commencement of hostilities in the Civil War. Smith & Wesson had, in this revolver, the only weapon able to fire self-contained cartridges and be easily carried as a backup by soldiers going off to war. This resulted in a backlog of more than three years before the company finally stopped taking orders. This model is chambered for.32 Long rimfire cartridge and has a 6-shot nonfluted cylinder and 4", 5", or 6" barrel lengths. It has a square butt with rosewood grips and is either blued or nickel-plated. There were approximately 77,155 manufactured between 1861 and 1874.

NOTE: A slight premium for early two-pin model. For rare 8-inch model add 800 percent.

.32 Single-Action (so-called "1-1/2 Frame" Centerfire)

This model represented the first.32 S&W centerfire caliber top-break revolver that automatically ejected the spent cartridges upon opening. It is similar in appearance to the Model 1-1/2 2nd Issue. This model has a 5-shot fluted cylinder and a bird's-head grip of wood or checkered hard rubber and was offered with barrel lengths of 3", 3.5", 6", 8", and 10". The 8" and 10" barrel are rare and were not offered until 1887. This model pivots downward on opening and features a rebounding hammer that made the weapon much safer to fully load. There were approximately 97,599 manufactured between 1878 and 1892.

.38 Single-Action 1st Model (Baby Russian)

This model is sometimes called the "Baby Russian." It is a top break, automatic-ejecting revolver chambered for the.38 S&W centerfire cartridge. Offered with either a 3.25" or 4" round barrel with a raised rib, has a 5-shot fluted cylinder, and finished in blue or nickel plating. A 5" barrel was added as an option a short time later. The butt is rounded, with wood or checkered hard rubber grips inlaid with the S&W medallion. It has a spur trigger. Approximately 25,548 were manufactured in 1876 and 1877, of which 16,046 were nickel and 6,502 were blued.

–	700	350	225	175	75

.38 Single-Action 3rd Model

This model differs from the first two models because it is fitted with a trigger guard. It is chambered for the.38 S&W centerfire cartridge, has a 5-shot fluted cylinder, and is a top break design with automatic ejection upon opening. The barrel lengths are 3.25", 4", and 6". The finish is blued or nickel-plated. The butt is rounded, with checkered hard rubber grips featuring S&W medallions. There were approximately 26,850 manufactured between 1891 and 1911.

Courtesy Mike Stuckslager

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	1300	1000	600	200

.38 Single-Action Mexican Model

This extremely rare model is quite similar in appearance to the 3rd Model Single-Action. The notable differences are the flat hammer sides with no outward flaring of the spur. The spur trigger assembly was not made integrally with the frame but is a separate part added to it. One must exercise extreme caution as S&W offered a kit that would convert the trigger guard assembly of the Third Model to the spur trigger of the Mexican Model. This, coupled with the fact that both models fall within the same serial range, can present a real identification problem. Another feature of the Mexican Model is the absence of a half cock. The exact number of Mexican Models manufactured between 1891 and 1911 is unknown but it is estimated that the number is small.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3650	1500	950	400

.32 Double-Action 1st Model

This is one of the rarest of all S&W revolvers. There were only 30 manufactured. It also has a straight-sided sideplate that weakened the revolver frame. Perhaps this

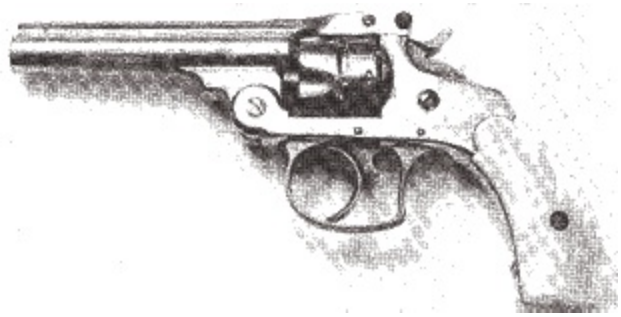
was the reason that so few were made. This model was the first break-open, double-action, automatic-ejecting.32 that S&W produced. It features a 3" round barrel with raised rib, a 5-shot fluted cylinder, and round butt with plain, uncheckered, black hard rubber grips. The finish is blued or nickel-plated. All 30 of these revolvers were manufactured in 1880.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	12000	7500	4000	1000

NOTE: Rarity makes valuation speculative.

.32 Double-Action 2nd Model

This revolver is chambered for the.32 S&W cartridge and has a 3" round barrel with a raised rib. The 5-shot cylinder is fluted, and the finish is blued or nickel-plated. It is a top break design with a round butt. The grips are either checkered or floral-embossed hard rubber with the S&W monogram. This model has an oval sideplate, eliminating the weakness of the 1st Model. There were approximately 22,142 manufactured between 1880 and 1882.



Courtesy Mike Stuckslager

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	700	350	225	175	75

.32 Double-Action 3rd Model

This model incorporates internal improvements that are not evident in appearance. The most notable identifiable difference between this model and its predecessors is in the surface of the cylinder. The flutes are longer; there is only one set of stops instead of two; and the free groove is no longer present. There were approximately 21,232 manufactured in 1882 and 1883.

Courtesy Mike Stuckslager

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	625	350	225	175	75

.32 Double-Action 4th Model

This model is quite similar in appearance to the 3rd Model except that the trigger guard is oval in shape instead of the squared back of the previous models. There were also internal improvements. There were approximately 239,600 manufactured between 1883 and 1909.

Courtesy Mike Stuckslager

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	575	300	200	125	65

NOTE: Add a 50 percent premium for revolvers built before 1898.

.32 Double-Action 5th Model

The only difference between this model and its predecessors is that this model has the front sight machined as an integral part of the barrel rib. On the other models, the sight was pinned in place. There were approximately 44,641 manufactured between 1909 and 1919.

Courtesy Mike Stuckslager

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	500	375	250	125	100

SAFETY HAMMERLESS

This model was a departure from what was commonly being produced at this time. Some attribute the Safety Hammerless design to D.B. Wesson's hearing that a child had been injured by cocking and firing one of the company's pistols. This story has never been proven. Nevertheless, the concealed hammer and grip safety make this an ideal pocket pistol for those needing concealability in a handgun. This is a small revolver chambered for.32 S&W and.38 S&W cartridges. It has a 5-shot fluted cylinder and is offered with a 2", 3", and 3.5" round barrel with a raised rib. The butt is rounded and has checkered hard rubber grips with the S&W logo. The finish is blue or nickel plated. The revolver is a top break, automatic-ejecting design; and the 1st Model has the latch for opening located in the rear center of the top strap instead of at the sides. The latch is checkered for a positive grip. This model is commonly referred to as the "Lemon Squeezer" because the grip safety must be squeezed as it is fired.

.38 Safety Hammerless 5th Model

This is the last of the “Lemon Squeezers,” and the only appreciable difference between this model and the 4th Model is that the front sight blade on the 5th Model is an integral part of the barrel and not a separate blade pinned onto the barrel. There were approximately 41,500 manufactured between 1907 and 1940; serial number range 220001 to 261493.

Courtesy Mike Stuckslager

NOTE: 2" barrel version add 50 percent.

Model 3 American 1st Model

This model represented a number of firsts for the Smith & Wesson Company. It was the first of the top break, automatic ejection revolvers. It was also the first Smith & Wesson in a large caliber (it is chambered for the.44 S&W American cartridge as well as the.44 Henry rimfire on rare occasions). It was also known as the 1st Model American. This large revolver is offered with an 8" round barrel with a raised rib as standard. Barrel lengths of 6" and 7" were also available. It has a 6-shot fluted cylinder and a square butt with walnut grips. It is blued or nickel-plated. It is interesting to note that this model appeared three years before Colt's Single-Action Army and perhaps, more than any other model, was associated with the historic American West. There were only 8,000 manufactured between 1870 and 1872.

Standard Production Model

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	7000	3500	1500	500

NOTE: Add 25 percent for "oil hole" variation found on approximately the first 1,500 guns. Add 50 percent for unusual barrel lengths other than standard 8". Original "Nashville Police" marked guns worth a substantial premium.

Transition Model

Serial number range 6466-6744. Shorter cylinder (1.423"), improved barrel catch.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	6000	3000	1500	500

U.S. Army Order

Serial number range 125-2199. One thousand (1,000) produced with "U.S." stamped on top of barrel; "OWA," on left grip.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	17500	7500	3000	500

.44 Rimfire Henry Model

Only 200 produced throughout serial range.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	12000	6000	3000	500

NOTE: Rarity makes valuation speculative.

Model 3 American 2nd Model

An improved version of the 1st Model. The most notable difference is the larger diameter trigger pivot pin and the frame protrusions above the trigger to accommodate it. The front sight blade on this model is made of steel instead of nickel silver. Several internal improvements were also incorporated into this model. This model is commonly known as the American 2nd Model. The 8" barrel length was standard on this model. There were approximately 20,735 manufactured, including 3,014 chambered for.44 rimfire Henry, between 1872 and 1874.NOTE: There have been 5.5", 6", 6.5", and 7" barrels noted; but they are extremely scarce and would bring a 40 percent premium over the standard 8" model. Use caution when purchasing these short barrel revolvers.

Model 3 Russian 1st Model

This model is quite similar in appearance to the American 1st and 2nd Model revolvers. S&W made several internal changes to this model to satisfy the Russian government. The markings on this revolver are distinct; and the caliber for which it is chambered,.44 S&W Russian, is different. There were approximately 20,000 Russian-Contract revolvers. The serial number range is 1-20000. They are marked in Russian Cyrillic letters. The Russian double-headed eagle is stamped on the rear portion of the barrel with inspector's marks underneath it. All of the contract guns have 8" barrels and lanyard swivels on the butt. These are rarely encountered, as most were shipped to Russia. The commercial run of this model numbered approximately 4,655. The barrels are stamped in English and include the words "Russian Model." Some are found with 6" and 7" barrels, as well as the standard 8". There were also 500 revolvers that were rejected from the Russian contract series and sold on the commercial market. Some of these are marked in English; some, Cyrillic. Some have the Cyrillic markings ground off and the English restamped.

This model was manufactured from 1871 to 1874.

Model 3 Russian 2nd Model

This revolver was known as the “Old Model Russian.” This is a complicated model to understand as there are many variations within the model designation. The serial numbering is quite complex as well, and values vary greatly due to relatively minor model differences. Before purchasing this model, it would be advisable to secure competent appraisal as well as to read reference materials solely devoted to this firearm. This model is chambered for the.44 S&W Russian, as well as the.44 Henry rimfire cartridge. It has a 7" barrel and a round butt featuring a projection on the frame that fits into the thumb web. The grips are walnut, and the finish is blue or nickel-plated. The trigger guard has a reverse curved spur on the bottom. There were approximately 85,200 manufactured between 1873 and 1878.

THOMPSON/CENTER ARMS

Rochester, New Hampshire

NOTE: In late 2006 it was announced that Thompson/Center Arms had been acquired by Smith & Wesson.

CONTENDER

Introduced in 1967 this model is the basis for all past and present variations. The standard version is offered with a 10" octagon barrel and is available in 10" Bull barrel, 10" vent rib barrel, 14" Super models, 14" Super with vent rib, 16" Super models, and 16" Super models with vent rib. A stainless steel finish is available on all models except the 10" octagon barrel. The action on these handguns is a single-shot, break open design. Unless otherwise stated the barrels are blued. The Competitor grip is walnut with rubber insert mounted on back of grip. A finger groove grip is also available made from walnut with finger notching and thumb rest. Forend is American black walnut in various length and designs depending on barrel size. Stainless steel models have rubber grips with finger grooves. Standard sights are standard Patridge rear with ramp front. An adjustable rear sight is offered as an option. Barrels with vent ribs are furnished with fixed rear sight and bead front sight. Due to the numerous variations of the Contender several breakdowns will be listed to help the reader find the closest possible handgun he may be looking for.

NOTE: Early frames with no engraving, called flatsides, and those with eagle engraving bring between $2,000 and $2,500 on the collector market.

10" Octagon Barrel Model

This was the first Contender design and is offered in.22 LR only. It is supplied with adjustable rear sight and mounting holes for scope. Grips are Competitor or rubber. Weighs about 44 oz.

U

UBERTI, ALDO/UBERTI USA

Ponte Zanano, Italy

This company manufactures high-grade reproductions of famous Western-style American firearms. Their products have been imported over the years by a number of different companies. They produce both blackpowder guns and the cartridge firearms that are included in this section. This Italian manufacturer builds high quality firearms of the American West. Featured are Colt, Winchester, and Remington. Each importer stamps its name on the firearm in addition to the Uberti address.NOTE: In 2000 Beretta Holding Company purchased Uberti.

Paterson Revolver

This is an exact copy of the famous and rare Colt pistol. Offered in.36 caliber with engraved 5-shot cylinder, the barrel is 7.5" long and octagonal forward of the lug. The frame is casehardened steel as is the backstrap. Grips are one-piece walnut. Overall length is 11.5" and weight is about 2.5 lbs.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
400	300	200	125	100	75

Walker Colt Revolver

This is a faithful reproduction of the famous and highly sought-after Colts. Caliber is.44 and the round barrel is 9" in length. The frame is case hardened steel and the trigger guard is brass. The 6-shot cylinder is engraved with fighting dragoons scene. Grip is one-piece walnut. Overall length is 15.75" and weight is a hefty 70 oz.

Model 9

A 6.35mm semi-automatic pistol. Smaller than the Model 8, but built as the Model 1 with exposed barrel. Same finishes and engraving as the Model 8. Introduced 1921 and produced until 1944. All values the same as the Model 8.

Courtesy James Rankin

Sport Model 1926, Walther Hammerless, Target 22, Walther Standard Sport, Walther 1932 Olympia, Sport Model Target, Special Stoeger Model

All of these.22 LR caliber semi-automatic pistols are the same target pistol introduced by Walther in 1926. A well-made pistol with a barrel length of between 6"-16". It has one-piece checkered wrap-around wood grips. There was also a.22 Short version of the Olympia model produced for rapid fire Olympic shooting. There was also a torpedo-shape target weight available for shooters.

Courtesy Orvel Reichert

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1000	850	550	350	250

NOTE: Add $200 for target weight. Add $500 for case.

Walther 1936 Olympia

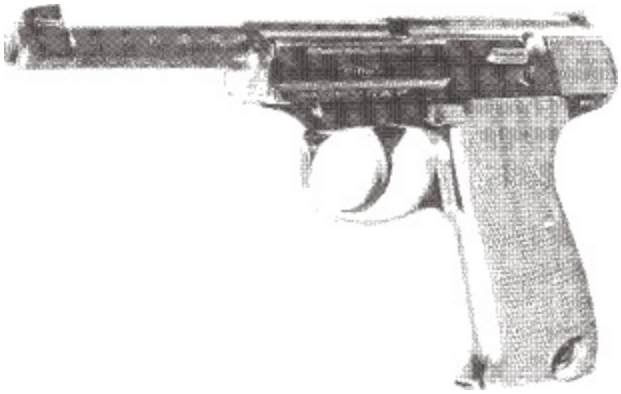
This semi-automatic target pistol in.22 caliber resembled the earlier 1932 Olympia, but with many improvements. There were four standard models produced with many variations of each one. These variations included many barrel lengths, and both round and octagon barrels. There were duraluminum slides, frames and triggers. Various weight configurations to as many as four separate weights to one gun. One-piece wrap-around checkered wood grips in different configurations for the individual shooter. Produced until 1944. The four models were:

1. Funfklamph Pentathlon
2. Jagerschafts–Hunter
3. Sport or Standard Model
4. Schnellfeur–Rapid Fire

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1500	1300	750	475	250

NOTE: Prices are for Standard Model. Add $100 for Pentathlon or Hunter, $200 for Rapid Fire. Add $250 for weights.Model MP

A 9mm semi-automatic pistol that was the forerunner of the Model AP and P.38 series. Found in variations that resemble a large Model PP or the P.38. Blued finish with one-piece wrap-around checkered wood grips.



Courtesy James Rankin

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	35000	30000	25000	20000	15000

Model AP

A 9mm semi-automatic pistol that was the forerunner of the Model P.38. A hammerless pistol in various barrel lengths. Sometimes with duraluminum frames, and some with stocks. Blued finish with one-piece wraparound checkered wood grips.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	28000	25000	20000	15000	10000

NOTE: With stock add $4000.

MODEL PP

A semi-automatic pistol in.22,.25,.32 and.380 caliber. Introduced in 1928. It was the first successful commercial double-action pistol. It was manufactured in finishes of blue, silver, and gold, and with three different types of engraving. Grips were generally two-piece black or white plastic with the Walther banner on each grip. Grips in wood or ivory are seen, but usually on engraved guns. There are many variations of the Model PP and numerous NSDAP markings seen on the pre-1946 models that were produced during the Nazi regime. All reflect various prices.

MODEL PPK

A semi-automatic pistol in.22,.25,.32 and.380 caliber. Introduced six months after the Model PP in 1929. A more compact version of the Model PP with one less round in the magazine and one-piece wraparound checkered plastic grips in brown, black, and white with the Walther banner on each side of the grips. The Model PPK will be found with the same types of finishes as the Model PP as well as the same styles of engraving. Grips in wood or ivory are seen with some of the engraved models. As with the Model PP there are many variations of the Model PPK and numerous NSDAP markings seen on the pre-1946 models that were produced during the Nazi regime. All reflect various prices.

Model PP Mark II

These Walthers were manufactured under license by Walther and produced by the Manurhin Company. They were sold exclusively by Interarms, Alexandria, Virginia. The Mark IIs were the same pistols as those above and have the same types of finish and engraving as well as the same value.

Model PP Manurhin

Manurhin Company manufactured with Manurhin logo and inscription. Usually “licensed by Walther” somewhere on the pistol. The same pistols as those above, bearing the same types of finish and engraving, and having the same values.

Model PP Sport, Manurhin

.22 caliber. This is the same gun as the Model PP with different barrel lengths running from 5-3/4" to 7-3/4". It is basically a target.22 with adjustable rear sights for elevation and windage. The front sight is also adjustable. There is a barrel bushing at the muzzle that attaches the front sight to the barrel. The grips are contoured checkered plastic and are either squared at the bottom of the grips or are in the shape of an inverted bird's-head.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	900	600	450	375	275

Model PP Sport C, Manurhin

.22 caliber. This is the same gun as the Model PP Sport but in single-action with a spur hammer. It has front and rear adjustable sights and squared target grips in

checkered black, brown and plastic. Blued and silver finish.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	900	600	450	375	275

Model PP Sport, Walther

A.22 caliber Sport was manufactured by Manurhin, but sold by Walther with the Walther logo and inscription. This is the same gun as the Model PP Sport, Manurhin. Only sold for a period of two years.

WEBLEY SEMI-AUTOMATIC PISTOLS

WEBLEY-FOSBERY AUTOMATIC REVOLVER

Text by Jodeph Schroeder:

Recoil forces the top half of this unusual pistol back to cock the hammer, while a stud in the frame cams the cylinder around to bring a fresh chamber into position. Early examples under serial number 75 or so appear to be hand-made as no two seem to be identical; these bring a 100 percent premium over late-model pistols. Other low-number guns, under serial number 300 or so, also differ in appearance from the later production and bring a 25 percent premium. Early production was all in.455 Webley with a 6-round cylinder; a.38 ACP version with an 8-round cylinder was introduced about 1903 but is much scarcer than the.455.

Courtesy Joseph Schroeder

.455 Caliber

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	9000	4500	3000	2000	1250

.38 Caliber

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*

– 10000 7250 4500 3000 2000

Model 1904

Made experimentally in both.38 ACP and.455 calibers, the highest serial numbered 1904 known is in the 30s and very few seem to have survived. A later Webley experimental, the Model 1906, made in.45 for the U.S. Army trial but apparently never submitted. Either model is too rare to price.

Courtesy Joseph Schroeder

Model 1905

Webley's first commercial semi-automatic pistol was this compact.32 caliber. The earliest Model 1905s have a diagonal flat machined on the slide and a hammer-mounted safety; these bring about a 50 percent premium. The Model 1905 was replaced by the Model 1908 after about perhaps 20,000 were made.

Courtesy Joseph Schroeder

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1200	1000	750	400	250

Model 1907

The 1907 is a.25 caliber pistol with an outside hammer and was one of Webley's most popular handguns; it remained in production until WWII and over 50,000 were made.

Courtesy Joseph Schroeder

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	800	600	400	200	100

Model 1908

The Model 1908 is a slight redesign of the Model 1905. Webley's most popular self-loading pistol, it remained in production until WWII. Examples bearing a crown and the letters “MP” were made for the Metropolitan Police and bring a slight premium.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	650	550	350	175	125

Model 1909

The Model 1909 is a modified and enlarged version of the Model 1908, chambered for the 9mm Browning Long cartridge. It was never popular, and manufacture ended in 1914 with just under 1,700 made. Its most unusual feature was the slide release on top of the slide.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1475	850	500	300	200

Model 1910.380

The Model 1910.380 was simply a Model 1908 modified to accept the.380 cartridge. Never very popular, under 2,000 were sold.

Model 1910.38 ACP

This was Webley's first locked-breech pistol, based closely on the experimental Model 1906 design and chambered for the.38 ACP cartridge. There are two models, both with internal hammers, but one with a grip safety and the later without. Total production for both was under 1,000, so both are rare.

Courtesy Joseph Schroeder

–	2250	1500	900	500	350

Model 1911

The Model 1911 is a single-shot.22 caliber training version of the Model 1908, and developed specifically for the Metropolitan Police. It features a “blow open” action that ejects the fired cartridge but remains open for reloading, and the bottom of the frame is slotted for attaching a shoulder stock. Stocks are quite rare, and will probably add more than 100 percent to the value of the pistol.

Courtesy Joseph Schroeder

–	1750	1400	1100	800	300

Model 1912

A perceived need for a hammerless version of the Model 1907.25 caliber led to the introduction of the Model 1912. It actually does have an internal hammer, but the recoil spring is two coils in the slide instead of the large V-spring under the right grip frame found in all other Webley semi-automatic pistols. Not as popular as the Model 1907, production totaled almost 15,000 vs. over 50,000 for the hammer model.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1200	1000	750	400	200

Model 1913

The Model 1913 was the result of years of development in conjunction with the British government and was finally adopted in 1913 as the Model 1913 MK1N for Royal Navy issue. It has the same breech-locking system as the Model 1910, but has an external hammer and is chambered for the.455 Webley Self-Loading cartridge. About 1,000 Model 1913s were sold commercially and serial-numbered along with the smaller-caliber pistols. In 1915 a variation of the Model 1913 with butt slotted for a shoulder stock, an adjustable rear sight, and a hammer safety adopted for use by the Royal Horse Artillery. Shoulder stocks are very rare, and will double values listed for the RHA model. All militaries were numbered in their own series; about 10,000 made in both variations.

Model 1922

The Model 1922 was a redesign of the Model 1909 in hopes of military adoption. The grip safety was replaced by a manual safety mounted on the slide, the grip angle was changed, and a lanyard ring added to the butt. Unfortunately for Webley its only official use was by the Union Defense Force of South Africa (1,000 pistols). South African guns are marked with a large “U” with an arrow in it and bring a 20 percent premium.

WESSON FIREARMS, DAN

Norwich, New York

In 1996 the assets of the Wesson Firearms Co. were purchased by the New York International Corp. All interchangeable barrel models were produced. There are no plans at this time to build fixed barrel models. At the present time, parts and service for original Dan Wesson revolvers are available from the new company. Full production of new models occurred in 1997. These firearms are laser marked on the barrel or frame with: "NYI" in an oval and below "DAN WESSON FIREARMS" on the next line "NORWICH, NEW YORK USA." NOTE: In April, 2005 Dan Wesson Firearms was acquired by CZ-USA. Production continues (somewhat irregularly) at the Norwich, New York, facility.

NEW GENERATION SMALL-FRAME SERIES

NOTE: The "7" prefix denotes stainless steel frame and barrel. For models listed add between 4 percent and 9 percent depending on barrel length and for stainless steel.

Model 22/722

This is a 6-shot revolver chambered for.22 caliber cartridge. Interchangeable barrel lengths are 2.5", 4", 5.6", 8", and 10". Adjustable rear sight and interchangeable front sight. Hogue finger groove rubber grips. Weight is 36 oz. for 2.5" barrel and 58 oz. for 10" barrel.

WESSON FIREARMS CO., INC.

Palmer, Massachusetts

The company was founded in 1968 by Daniel B. Wesson, the great-grandson of D.B. Wesson, co-founder of Smith & Wesson. This line of handguns is unique for its barrel/shroud interchangeability. Dan Wesson revolvers have established themselves as champion metallic silhouette competition guns. The company offers a comprehensive line of handguns for almost every use. The company will also custom build a handgun to customer specifications. Dan Wesson Arms was restructured on January 4, 1991, and identified as Wesson Firearms Company, Inc. Wesson handguns made after this date will be stamped with this new corporate name. In 1995 the company declared bankruptcy. (See WESSON FIREARMS, DAN)

WHITE, ROLLIN

Lowell, Massachusetts

Pocket Pistol

A.32 or.38 rimfire spur trigger single-shot pistol with a 3" or 5" octagonal barrel. Brass or iron frames with walnut grips. The.38 caliber version with the 5" barrel was not produced in large quantities and therefore is worth approximately 25 percent more than the values listed. The barrels are marked “Rollin White Arms Co., Lowell, Mass.”

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	900	750	350	150

Pocket Revolver

A.22 caliber spur trigger revolver with a 3.25" octagonal barrel and 7-shot cylinder. The brass frame silver-plated, barrel blued and grips of walnut. This revolver was marked in a variety of ways including “Rollin White Arms Co., Lowell, Mass.,” “Lowell Arms Co., Lowell, Mass.,” or “Made for Smith & Wesson by Rollin White Arms Co., Lowell, Mass.” Approximately 10,000 were made during the late 1860s.

WHITNEY ARMS COMPANY

INCLUDING
ELI WHITNEY, SR. / P. & E.W. BLAKE /
ELI WHITNEY, JR.

As the United States' first major commercial arms maker, Eli Whitney's New Haven plant, which began production in 1798 and continued under family control for the next 90 years, was one of the more important American arms manufactories of the 19th century. Its products, accordingly, are eminently collectible. Moreover, during its 90 years of operation, the Whitney clan produced a number of unusual arms, some exact copies of regulation U.S. martial longarms, others variations and derivatives of U.S. and foreign longarms, a variety of percussion revolvers, and finally a variety of single-shot and repeating breechloading rifles in an attempt to capture a portion of the burgeoning market in these cartridge arms during the post-Civil War period. Contrary to the prevailing myth, Eli Whitney, Sr., who also invented the cotton gin, did NOT perfect a system of interchangeability of parts in the arms industry. His contributions in this line were more as a propagandist for the concept that was brought to fruition by others, notably Simeon North and John Hall.

Hooded Cylinder Pocket Revolver

This is an unusual revolver that is chambered for.28 caliber percussion. It has a manually rotated, 6-shot hooded cylinder that has etched decorations. The octagonal barrel is offered in lengths of 3" to 6". There is a button at the back of the frame that unlocks the cylinder so that it can be rotated. The finish is blued, with a brass frame and two-piece rounded walnut grips. It is marked “E. Whitney N. Haven Ct.” There were approximately 200 manufactured between 1850 and 1853.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	5750	3250	1500	600

Two Trigger Pocket Revolver

This is a conventional-appearing pocket revolver with a manually rotated cylinder. There is a second trigger located in front of the conventional trigger guard that releases the cylinder so that it can be turned. It is chambered for.32 caliber percussion and has an octagonal barrel from 3" to 6" in length. It has a 5-shot unfluted cylinder that is etched and a brass frame. The remainder is blued, with squared walnut two-piece grips. An iron-frame version is also available, but only 50 were produced. It would bring approximately 60 percent additional. There were approximately 650 total manufactured between 1852 and 1854.

–	–	2750	2000	850	300

WHITNEY-BEALS PATENT REVOLVER

This was an unusual, ring-trigger pocket pistol that was made in three basic variations.

Courtesy Milwaukee Public Museum, Milwaukee, Wisconsin

First Model

This version is chambered for.31-caliber percussion and has barrels of octagonal configuration from 2" to 6" in length. It has a brass frame and a 6-shot cylinder. It is marked “F. Beals/New Haven, Ct.” There were only 50 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	5000	3500	1500	450

.31 Caliber Model

This version has an iron frame and a 7-shot cylinder. The octagonal barrels are

from 2" to 6" in length. It is marked “Address E. Whitney/Whitneyville, Ct.” There were approximately 2,300 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	2500	1500	600	200

.28 Caliber Model

Except for the caliber, this model is similar to the.31 Caliber Model. There were approximately 850 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	2750	1750	700	300

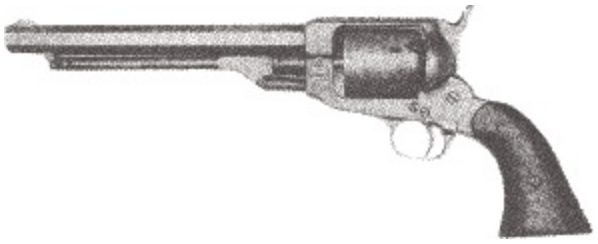
WHITNEY 1851 NAVY

This is a faithful copy of the 1851 Colt Revolver. It is virtually identical. There is a possibility that surplus Colt parts were utilized in the construction of this revolver. There were approximately 400 manufactured in 1857 and 1858.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	9000	4250	1750	650

Revolver

This is a single-action revolver chambered for.36 caliber percussion. It has a standard octagonal barrel length of 7.5". It has an iron frame and a 6-shot unfluted cylinder that is roll engraved. The finish is blued, with a case colored loading lever and two-piece walnut grips. The barrel is marked either “E. Whitney/N. Haven” or “Eagle Co.” There are a number of minor variations on this revolver, and we strongly urge competent appraisal if contemplating a transaction. There were 33,000 total manufactured between 1858 and 1862.



Courtesy Wallis & Wallis, Lewes, Sussex, England

FIRST MODEL

Nearly the entire production of the First Model is marked “Eagle Co.” The reason for this marking is unknown. There are four distinct variations of this model.

First Variation

This model has no integral loading-lever assembly and has a thin top strap. There

were only 100 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	5400	3750	1500	550

Second Variation

This version is similar to the First Variation, with an integral loading lever. There were approximately 200 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	5000	3000	1200	400

Third Variation

This is similar to the Second, with a three-screw frame instead of four screws. The loading lever is also modified. There were approximately 500 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	4800	2500	1000	300

Fourth Variation

This version has a rounded frame and a safety notch between the nipples on the rear of the cylinder. There have been examples noted marked "E. Whitney/N. Haven." There were approximately 700 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	4800	2500	1000	300

SECOND MODEL

First Variation

This version features a more robust frame with a brass trigger guard. The barrel is marked "E. Whitney/N. Haven." The cylinder pin is secured by a wing nut, and there is an integral loading lever. There were approximately 1,200 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3750	2000	900	300

Second Variation

This version has six improved safety notches on the rear of the cylinder. There were approximately 10,000 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3200	1750	750	250

Third Variation

This version has an improved, Colt-type loading-lever latch. There were approximately 2,000 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3200	1750	750	250

Fourth Variation

This is similar to the Third except the cylinder is marked "Whitneyville." There were approximately 10,000 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3200	1750	750	250

Fifth Variation

This version has a larger trigger guard. There were approximately 4,000 manufactured.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	3200	1750	750	250

X

XL
HOPKINS & ALLEN

Norwich, Connecticut

Derringer

A.41 caliber spur trigger single-shot pistol with a 2.75" octagonal barrel and either iron or brass frame. Blued, nickel-plated with rosewood grips. The barrel marked "XL Derringer." Manufactured during the 1870s.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1650	1295	950	500	150

Vest Pocket Derringer

As above, in.22 caliber with a 2.25" round barrel and normally full nickel-plated. The barrel marked "XL Vest Pocket." Manufactured from 1870s to 1890s.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	1350	750	325	125

XPERT
HOPKINS & ALLEN

Norwich, Connecticut

Xpert Derringer

A.22 or.30 caliber spur trigger single-shot pistol with round barrels, 2.25" to 6" in length and a nickel-plated finish with rosewood grips. The breechblock pivots to the left side for loading. The barrel marked "Xpert-Pat. Sep. 23. 1878." Manufactured during the 1870s.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	–	875	700	400	125

Z

ZEHNER, E. WAFFENFABRIK

Suhl, Germany

Zehna

A 6.35mm semi-automatic pistol with a 2.5" barrel and 5-shot magazine. The slide marked “Zehna DRPA,” and the caliber on later production models. Blued with a black plastic grips bearing the monogram “EZ.” Approximately 20,000 were made from 1921 to 1927.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	395	300	250	175	100

ZULAICA, M.

Eibar, Spain

Zulaica

A solid-frame.22 caliber revolver with a 6-shot cylinder that has zigzag grooves on its exterior surface. It is fired by an external hammer and the frame is hollow with a rod inside of it that connects to the breechblock. There is a serrated cocking piece connected to this rod that is found at the top rear of the frame. When fired, the cartridge case blows from the cylinder and activates the breechblock similar to a semi-automatic pistol.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	1000	800	600	350	250

ROYAL

The name Royal was applied to a number of pistols produced by this company, as listed.

Royal

A 6.35mm or 7.65mm semi-automatic pistol that is normally marked on the slide “Automatic Pistol 6.35 Royal” or “Automatic Pistol 7.65 Royal.”

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	300	175	100	75	50

Royal

As above, in 7.65mm caliber with a 5.5" barrel and 12-shot magazine.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	325	200	125	100	75

Royal

A rather poor copy of the Mauser Model C/96 semi-automatic pistol with fixed lockwork.

NIB	*Exc.*	*V.G.*	*Good*	*Fair*	*Poor*
–	900	700	500	300	150

Vincitor

A 6.35mm or 7.65mm caliber semi-automatic pistol patterned after the Model 1906 Browning. The slide marked “SA Royal Vincitor.” Blued with plastic grips.
